//FORWARDED BY ORDER//

SECTION OFFICER

NOTIFICATION

In exercise of the powers conferred by **Section 585 read with 592 of the Greater Hyderabad Municipal Corporation Act, 1955; Proviso under sub section (1) read with sub section (2) of Section 14, 32, 46 and 58 of the Andhra Pradesh Urban Areas (Development) Act, 1975; Section 56 (1) of Hyderabad Metropolitan Development Authority (HMDA) Act, 2008; Section 18 of the Andhra Pradesh Municipal Corporations Act, 1994; Section 326 of the Andhra Pradesh Municipalities Act, 1965 and Section 44 (1) of the Andhra Pradesh Town Planning Act,1920 and in supersession of all the existing rules on the subject**, the Government of Andhra Pradesh hereby issue the following rules applicable to all Urban Development Authority areas and Urban Local Bodies together with Gram Panchayat areas in the State covered in Master Plans / General Town Planning Schemes / Outline Development Plans.

RULES

1. SHORT TITLE, APPLICABILITY & COMMENCEMENT:

- (a) These Rules may be called '**The Andhra Pradesh Building Rules - 2012**'.
- (b) They shall apply to the building activities in the areas falling in;
 - (i) Hyderabad Metropolitan Development Authority (HMDA),
 - (ii) All Urban Development Authorities,
 - (iii) All Municipal Corporations,
 - (iv) All Municipalities,
 - (v) All Nagar Panchayats,
 - (vi) Gram Panchayat areas covered in Master Plans/General Town Planning Schemes notified under Andhra Pradesh Town Planning Act,1920 and
 - (vii) Industrial Area Local Authority (IALA) / Special Economic Zone (SEZ) notified by Government.
- (c) These rules shall apply to all building activity. All existing rules, regulations, byelaws orders that are in conflict or inconsistent with these Rules shall stand modified to the extent of the provisions of these rules.
- (d) They shall come in to force from the date of publication in the Andhra Pradesh Gazettee.

2. DEFINITIONS: In these rules,

- (a) '**Competent Authority**' means:
 - (i) The Metropolitan Commissioner, Hyderabad Metropolitan Development Authority in HMDA area exclusive of Greater Hyderabad Municipal Corporation (GHMC) Area,
 - (ii) The Commissioner, Greater Hyderabad Municipal Corporation (GHMC)

- (iii) The Vice Chairman of the respective Urban Development Authority.
 - (iv) The Director of Town & Country Planning in case of Municipal Corporations, Municipalities, Nagara Panchayats not covered in Urban Development Authorities and Gram Panchayat areas covered in Master Plans / General Town Planning Schemes notified under Andhra Pradesh Town Planning Act, 1920.
- (b) **'Enforcement Authority'** means:
- (i) The Metropolitan Commissioner, Hyderabad Metropolitan Development Authority.
 - (ii) The Vice Chairman of the respective Urban Development Authority.
 - (iii) The Commissioner of respective Urban Local Body.
 - (iv) The Executive Authority of the Gram Panchayat.
 - (v) The Executive Authority of the Special Unit created as the case may be for the purpose of sanctioning and monitoring building and development activity, as applicable.
- (c) **'Group Development Scheme'** is reckoned as development of Residential Buildings in a Campus or Site of 4000sq.m and above in area and could be row houses, semi-detached, detached Houses, Apartment blocks or High-Rise buildings or mix or combination of the above.
- (d) **'Group Housing'** means the development of building having 5 or more multiple dwelling units and common services on a given site or plot in a single or multiple blocks without customary subdivision of land by way of individual plots.
- (e) **'Height of Building'** means height measured from the abutting road and in case of undulated terrain height can be considered as average of the corresponding ground level. The parapet wall, staircase head room, lift room, water tank are excluded from the height of the building.
- (f) **'High-Rise Building'** means a building with 18m or more in height. However, chimneys, cooling towers, boiler rooms, lift machine rooms, cold storage and other non-working areas in case of industrial buildings and water tanks and architectural features in respect of other buildings are excluded.
- (g) **'Parking Complex/Parking Lot'** means premises either built or open which is utilized purely for parking of vehicles permitted in specific areas.
- (h) **'Sanctioning Authority'** means:
- (i) The Metropolitan Commissioner, Hyderabad Metropolitan Development Authority.
 - (ii) The Vice Chairman of the respective Urban Development Authority.
 - (iii) The Commissioner of respective Urban Local Body.
 - (iv) The Executive Authority of the Gram Panchayat.
 - (v) The Executive Authority of the Special Unit created as the case may be for the purpose of sanctioning and monitoring building and development activity, as applicable.
- (i) **'Transferable Development Right (TDR)'** means an award specifying the built up area an owner of a site or plot can sell or dispose or utilize elsewhere, in lieu of surrendering land free of cost which is required to be set apart or affected for public purpose as per the Master Plan or in road widening or covered in recreational use zone, etc. The award is in the form of a TDR Certificate issued by the Competent Authority.

Terms and expressions which are not defined in these Rules shall have the same meaning as in the respective rules / regulations / bye-laws of the respective local authorities and as defined in the National

Building Code as the case may be, unless the context otherwise requires.

3. RESTRICTION OF BUILDING ACTIVITY IN THE VICINITY OF CERTAIN AREAS:

(a) Water Bodies

- (i) No building / development activity shall be allowed in the bed of water bodies like river or nala and in the Full Tank Level (FTL) of any lake, pond, cheruvu or kunta / shikam lands.

Unless and otherwise stated, the area and the Full Tank Level (FTL) of a Lake / Kunta shall be reckoned as measured and as certified by the Irrigation Department and Revenue Department.

- (ii) The above water bodies and courses shall be maintained as Recreational/Green Buffer Zone and no building activity shall be carried out within:

(1) 100m from the boundary of the River outside the Municipal Corporation / Municipality / Nagara Panchayat limits and 50m within the Municipal Corporation / Municipality / Nagara Panchayat limits. The boundary of the river shall be as fixed and certified by the Irrigation Department and Revenue Department.

(2) 30m from the FTL boundary of Lakes / Tanks / Kuntas of area 10Ha and above.

(3) 9m from the FTL boundary of Lakes / Tanks / Kuntas of area less than 10Ha / shikam lands;

(4) 9m from the defined boundary of Canal, Vagu, Nala, Storm Water Drain of width more than 10m.

(5) 2m from the defined boundary of Canal, Vagu, Nala, Storm Water Drain of width up to 10m.

- (iii) Unless and otherwise specified in the Master Plan / Zonal Development Plan.

(1) In case of (ii) (1) & (2) above, the buffer zone may be utilised for road of minimum 12m width, wherever feasible.

(2) In case of (ii) (2) above, in addition to development of recreational / green belt along the foreshores, a ring road or promenade of minimum 12m may be developed, wherever feasible.

(3) The above buffer zone to be left may be reckoned as part of tot lot or organized open space and not for setback requirements.

- (iv) In case of Protection of Catchment area of Osmansagar and Himayatsagar lakes covered under the G.O.Ms.No.111 MA dated 08.03.1996, the restrictions on building and development activity imposed there in shall be applicable in Hyderabad Metropolitan Development Authority (HMDA) area.

- (v) In case of areas along the Sea Coast, the Coastal Regulation Zone (CRZ) regulations shall be followed.

(b) Railways

The distance between the Railway Property Boundary and the edge of the building shall be 30m as per Indian Railways Works Manual or as per No Objection Certificate (NOC) given by the Railway Authorities.

(c) Electrical Lines

- (i) In case of sites in the vicinity of High Tension Electricity Transmission Lines besides taking other safety precautions, a minimum safety distance (both vertical and horizontal) of 3m shall be maintained between the building and the High Tension Electricity

Lines and 1.5m shall be maintained between the building and the Low Tension Electricity Lines.

- (ii) In case of Electricity Tower lines, the land all along below the tower line shall be developed as green belt to an extent of the width of tower base and on either side of green belt there shall be a minimum of 10m wide roads or as defined in the Master Plan.

(d) **Airport**

(i) Building Restrictions

- (1) For building activity within the Restricted Zone / Air Funnel Zone near the airport, necessary clearance from the concerned Airport Authority shall be obtained.
- (2) The building heights and other parameters shall be regulated as per the stipulations of the Airport Authority of India as notified in Gazette of India Extraordinary (S.O.1589) dated 30-06-2008 and as amended from time to time by Ministry of Civil Aviation, Government of India.
- (3) Irrespective of their distance from the aerodrome, even beyond 22km limit from the Aerodrome Reference Point, no radio masts or similar installation exceeding 152m in height shall be erected except with the prior clearance from Civil Aviation Authorities.
- (4) In respect of any land located within 1000m from the boundary of Military Airport no building is allowed except with prior clearance from the concerned airport authority with regard to building height permissible and safe distance to be maintained between the building and boundary of the aerodrome.

(ii) Other Structures

- (1) No chimneys or smoke producing factories shall be constructed within a radius of 8km from the Airport Reference Point.
- (2) Slaughter House, Butcheries, Meat shops and Solid Waste Disposal Sites and other areas for activities like depositing of garbage which may encourage collection of high flying birds, like eagles and hawks, shall not be permitted within 10 km from the Airport Reference Point.
- (3) Within a 5km radius of the Aerodrome Reference Point, every structure/installation/building shall be designed so as to meet the pigeon/bird proofing requirement of the Civil Aviation Authorities. Such requirement may stipulate the prohibition of any cavity, niche, or other opening on the exterior of such building/installation/structure so as to prevent the nesting and habitation of pigeon or other birds.

(e) **Provisions laid under Environmental Impact Assessment Notification-2006:**

As per the provisions laid under the EIA Notification S.O.1533, Dt.14.9.2006 and it's amendment dt.01.12.2009 issued by MOE&F, GOI and Notifications issued from time to time with reference to "Building / Construction Projects/ Area Development Projects and Townships" complying with the following threshold limits fall under category B and are **required to obtain prior Environmental Clearance (EC) from State Environmental Impact Assessment Authority (SEIAA), Ministry of Environment and Forests, Government of India.**

Building/Construction Projects/Area Development Projects and Townships			
Project / Activity		B Category with threshold limit	Conditions, if any
8(a)	Buildings and Construction Projects	≥ 20000 sq.m and $< 1,50,000$ sq.m of built up area#	#(Built up area for covered construction; in case of facilities open to the sky, it will be the activity area
8(b)	Townships and Area Development Projects	Covering an area ≥ 50 ha and or built up area $\geq 1,50,000$ sq.m ++	++All Projects under Item8(b) shall be appraised as Category B1

(f) **Defense Establishments**

- (i) In case of Sites within 500m distance from the boundary of Defense Areas / Military Establishments prior clearance of Defense Authority shall be obtained.
- (ii) In case of Naval Science and Technological Laboratory (NSTL), Visakhapatnam, no building shall be allowed with in a distance of 20m from the boundary wall of NSTL, Visakhapatnam.

(g) **Oil / Gas Pipelines**

In case of Sites in the vicinity of Oil / Gas pipelines, clearance distance and other stipulations of the Respective Authority shall be complied with. The Oil / Gas Authorities shall also specify the clearances required stretch wise to Local Body.

(h) **Heritage Structures**

- (i) In case of Sites located within the distance up to 100m from protected monuments as notified under Archeological Monuments and Ancient Sites and Remains Act 1955 and as amended no construction is allowed.
- (ii) For the Sites located within distance of above 100m and up to 200m from the protected monuments, the construction is allowed only after obtaining prior permission from the National Monument Authority.
- (iii) For the Sites located within the vicinity of any Heritage Structure notified as per the respective law, the prior clearance from the concerned authority shall be obtained.
- (iv) For the development / redevelopment of any notified Heritage Structure the stipulations as prescribed by the respective authority shall be followed.

(i) **Religious Structures**

- (i) In case of Sites located within a radius of 100m from the notified religious structure as given in the list in Annexure – VII / notified from time to time, the construction is allowed up to 10m height only.
- (ii) For the Sites located within a radius of above 100m and up to 300m from the notified religious structure as given in the list in Annexure – VII / notified from time to time, only non high rise structures are allowed.

(j) **Special Regulations for Banjara Hills & Jubilee Hills Areas of Hyderabad**

- (i) The following are the Special Regulations to maintain special characteristics of Banjara Hills and Jubilee Hills areas covered by Block 1 & 2, and part of Block No. 3 of Ward no. 8, of erstwhile Municipal Corporation of Hyderabad area of GHMC.

TABLE – I

Sl. No.	Type of the Building	Maximum Height
1.	Individual Residential Buildings/ Apartment Complexes	15m (Including Stilt floor)
2.	Commercial / Institutional Buildings	15m

- (ii) The building with height beyond 10m in these areas shall be permitted only if the plot abuts to a minimum of 12m wide road.
- (iii) In case of Jubilee Hills Co-operative House Building Society and Prashasan Nagar Co-operative House Building Society Layout, Jubilee Hills the height of the building is restricted to 10m excluding stilt with a maximum FAR of 1:1.
- (iv) In case of plots abutting Road No.1, 2 & 3 Banjara Hills and Road No.36 Jubilee Hills the building height shall be limited to 30m and further the said height relaxations are allowed only on plots where the land owners have surrendered their land in the past or will surrender their land free of cost to Municipal Corporation for road widening.
- (v) The setbacks shall be followed as per Table-III of rule-5 and also parking & other requirement shall be as per these rules.

4. REQUIREMENT OF APPROACH ROAD FOR BUILDING SITES / PLOTS:

- (a) The minimum abutting existing road width required for various uses of building activities shall be as given below.

TABLE – II

Category	Type / Use of Building Plot permissible	Minimum abutting existing road width required (in meters)
A	SITES IN OLD /EXISTING BUILT-UP AREAS /CONGESTED AREAS /SETTLEMENT / GRAM KHANTAM/ABADI (see Annexure-I)	
	All Residential (other than Group Housing) & Commercial Buildings with maximum permissible height of 10 m For other categories the Minimum road width shall be as given in B1 Category	9 *
B	SITES IN NEW AREAS / APPROVED LAYOUT AREAS	
B 1	Non-High Rise (Residential) Buildings including Group Housing (Cellar and / or Stilt as permissible + maximum up to 5 floors), Basic level social amenities like Nursery School,	9 **

	Primary School / Religious Place /Clinic / Dispensary / Diagnostic Laboratory	
B 2	High Rise Buildings / Complexes up to height of 24 meters, Non High Rise Group Housing (Cellars as applicable + 6 floors), Group Housing with more than 100 units, Group Development Scheme; Middle school / Tutorial institution / General Industry / Godown / Petrol / Diesel/ Gas Filling Station; High School, Junior College/ Commercial Complex, Computer units /Office Building, ITES Complex, Nursing Home /Hospital of not more than 20 beds / Community Hall/Function/Marriage Hall/ Assembly Hall/Cinema Theater; Service establishment / Workshop; Others not specified in the Table and all Non High-Rise buildings up to 18m height	12
B 3	General Degree and other non-professional College / Polytechnic, ITI; Professional College Campus; Multiplex Complexes, Shopping Malls (above 4000sq.m), Hospitals of more than 20 beds and all High-Rise buildings above 24m and up to 30 m height	18
B4	All High Rise Building above 30 meters will be permitted as per the Minimum Road width and setbacks as specified in Table-IV of rule-7	

- (b) *In case of Sites in Category-A, if a Site is abutting to a road which is less than 9m in width, a building may be permitted with a maximum height of 10m in such site, after leaving 4.5m from the Centre Line of such road for widening and the same shall be handed over to the Local Body and shall leave the prescribed setback as per Table-III after the said road widening portion. No relaxations are permissible in such cases.
- (c) **In case of Sites in Category-B, if a Site is abutting to a road which is less than 9m in width, Individual Residential Building may be permitted with a maximum height of 12m, after leaving 4.5m from the Centre Line of such road for widening and the same shall be handed over to the Local Body and shall leave the prescribed setback as per Table-III of rule-5 after the said road widening portion. No relaxations are permissible in such cases.
- (d) In case of Notified Slums / Economically Weaker Section (EWS) Buildings, the special regulations as notified by the Government from time to time shall be followed.
- (e) The sites in old / Existing Built-up Areas / Congested Areas / Settlement / Gram Khantam / Abadi (Annexure-I) and List of Areas Prohibited for High-Rise Buildings (Annexure-II) shall be notified by the Local Bodies in consultation with the Competent Authority. The Government may add to or delete from the list of the said areas.
- (f) In case of single plot sub-division approved by the competent authority, a means of independent access of minimum 3.6m pathway may be considered for Individual Residential Building and 6m for Non-High-Rise Group Housing Building.

5. PERMISSIBLE SETBACKS & HEIGHT STIPULATIONS FOR ALL TYPES OF NON-HIGH RISE BUILDINGS

(Buildings below 18m in height inclusive of Stilt / Parking Floor):

(a) The height of buildings permissible in a given site / plot shall be subject to restrictions given in **Annexure - I to II**.

(b) The minimum setbacks and permissible height as per **Table - III** and other conditions stipulated below shall be followed.

TABLE - III

Sl. No.	Plot Size (in Sqm) Above - Up to	Parking provision	Height (in m) Permissible Up to	Building Line or Minimum Front Setback to be left (in m)					Minimum setbacks on remaining sides (in m)
				Abutting Road Width					
				Up to 12 m	Above 12m & up to 18m	Above 18m & up to 24 m	Above 24m & up to 30m	Above 30m	
1	2	3	4	5	6	7	8	9	10
1	Less than 50		7	1.5	1.5	3	3	3	-
2	50-100	-	7	1.5	1.5	3	3	3	-
			10	1.5	1.5	3	3	3	0.5
3	100 - 200	-	10	1.5	1.5	3	3	3	1.0
4	200 - 300	Stilt floor	7	2	3	3	4	5	1.0
			10	2	3	3	5	6	1.5
5	300 - 400	Stilt floor	7	3	4	5	6	7.5	1.5
			12	3	4	5	6	7.5	2.0
6	400 - 500	Stilt floor	7	3	4	5	6	7.5	2.0
			12	3	4	5	6	7.5	2.5
7	* 500 - 750	Stilt floor	7	3	4	5	6	7.5	2.5
			12	3	4	5	6	7.5	3.0
			15	3	4	5	6	7.5	3.5
8	750 - 1000	Stilt + One Cellar floor	7	3	4	5	6	7.5	3.0
			12	3	4	5	6	7.5	3.5
			15	3	4	5	6	7.5	4.0
9	1000 - 1500	Stilt + 2 Cellar floors	7	3	4	5	6	7.5	3.5
			12	3	4	5	6	7.5	4.0
			15	3	4	5	6	7.5	5.0
			18**	3	4	5	6	7.5	6.0
10	1500 - 2500	Stilt + 2 Cellar floors	7	3	4	5	6	7.5	4.0
			15	3	4	5	6	7.5	5.0
			18**	3	4	5	6	7.5	6.0
11	Above 2500	Stilt + 2 or more Cellar floors	7	3	4	5	6	7.5	5.0
			15	3	4	5	6	7.5	6.0
			18**	3	4	5	6	7.5	7.0

- (c) Stilt Floor meant for parking is excluded from the permissible height in the above Table. Height of stilt floor shall not be less than 2.5m. In case of parking floors where mechanical system and lift are provided, height of such parking floor shall not be less than 4.5m.
- (d) *In case of commercial buildings proposed in plots having an extent of 500-750sq.m cellar floor for parking may be considered subject to condition that required parking shall be fulfilled as per Table-V of rule-13 and feasibility on ground.
- (e) **Buildings of height above 15m and below 18m in Sl.Nos.9, 10 and 11 above, shall be permitted only if such plots abut minimum 12m wide roads only.
- (f) **Other conditions:**
- (i) The setbacks are to be left after leaving the affected area of the plot / site, if any, for road widening.
 - (ii) Where a site abuts more than one road, then the front setback should be insisted towards the bigger road width and for the remaining side or sides, the setback as at Column-10 shall be insisted. In case of individual residential buildings the option is given to the applicant to propose front setback on one of the roads. In such case he shall not have access from the other side / sides. On the other side / sides the applicant can leave the setback either as per the required front setback based on the road width or to provide the side setback as given in Column-10.
 - (iii) A strip of at least 1m greenery / lawn along the frontage of the site within the front setback shall be developed and maintained with greenery.
 - (iv) For Plots above 300sq.m in addition to (iii) above, a minimum 1m wide continuous green planting strip in the periphery on remaining sides are required to be developed and maintained within the setback.
 - (v) For all residential / institutional / industrial plots above 750sq.m, in addition to (iii) and (iv) above, 5% of the site area to be developed as organized open space and be utilized as greenery, tot lot or soft landscaping etc., and shall be provided over and above the mandatory setbacks. Such organized open space could be in more than one location and shall be of a minimum width of 3m with a minimum area of 15sq.m at each location.
 - (vi) If the strip of greenery / lawn and the organized open space (tot lot) are not maintained, 10% of additional Property Tax every year would be imposed as penalty by the Sanctioning Authority till the condition is fulfilled.
 - (vii) In all plots 750sq.m and above, provision shall be made for earmarking an area of 3m X 3m for the purpose of setting of public utilities like distribution transformer, etc. within the owner's site subject to mandated public safety requirements.
 - (viii) In case of plots 300 - 750sq.m, it is permitted to transfer up to 1m of setback from any one side to any other side without exceeding overall permissible plinth area. The transfer of setback from front setback is not allowed.
 - (ix) In case of plots above 750sq.m, it is permitted to transfer up to 2m of setback from any one side to any other side without exceeding overall permissible plinth area, subject to maintaining of a minimum 2.5m setback on other side and a minimum building line. The transfer of setback from front setback is not allowed.
 - (x) For narrow plots having extent not more than 400sq.m and where the length is 4 times of the width of the plot, the setbacks on sides

may be compensated in front and rear setbacks so as to ensure that the overall aggregate setbacks are maintained in the site, subject to maintaining a minimum of side setback of 1m in case of buildings of height up to 10m and minimum of 2m in case of buildings of height above 10m and up to 15m without exceeding overall permissible plinth area. (This Rule shall not be applicable for made-up plots).

- (xi) Where the lighting and ventilation of a building is through the means of a chowk or inner courtyard or interior open space / duct, such open space shall be open to sky and of area at least 9sq.m and no side shall be less than 2m. Such open spaces / ducts may be allowed above stilt floor.
- (xii) The space between 2 blocks shall not be less than the side setback of the tallest block as mentioned in Table - III and this shall not be considered for organised open space (tot lot).
- (xiii) Where all the owners of sites along an abutting road come forward for widening of the road by undertaking preparation of a Road Development Plan which would improve circulation in the area and duly approved by the competent authority, and by leaving the area affected in the widening of such road free of cost and implement it within one year, then higher height of the corresponding widened road width would be considered for such sites.
- (xiv) Splay at road junctions, including 'Y' junctions shall be provided as follows. The area of such splay would be deemed to form part of the road junction.

Sl.No	Road Width (in m)	Splay / Offset (in m)
1	Less than 12	3 X 3
2	Above 12 up to 24	4.5 X 4.5
3	Above 24	6 X 6

- (xv) As per the provisions of the Andhra Pradesh Fire Service Act, 1999, Residential buildings of height more than 18 m, Commercial buildings of height 15m and above and buildings of public congregation like Educational Buildings, Cinema Theatres, Function Halls and other Assembly Buildings on plot area of 500Sq.m. and above or of height above 6m are required to obtain prior clearance from Andhra Pradesh State Disasters Response & Fire Services Department from fire safety point of view.
- (xvi) Stepped type buildings or incremental type buildings may be allowed only in respect of individual residential or educational / institutional buildings and such incremental development would be considered only after a minimum time period of 5 years.
- (xvii) For the purpose of these Rules, the following conversion from M.K.S. and F.P.S. system shall be reckoned for the **road widths only**:
- (1) 3m = 10ft (2) 6m = 20ft (3) 7.5m = 25ft (4) 9m = 30ft
 (5) 12m = 40ft (6) 15m = 50ft (7) 18m = 60ft (8) 24m = 80ft
 (9) 30m = 100ft (10) 45m = 150ft (11) 60m = 200ft.
- (xviii) All building applications for sanction of building permission for construction of above 10m height shall be accompanied with the following details:
- (a) Report of Soil Test / Geo-technical Investigation Report issued after personal inspection by Institution / Consultant empanelled with / licenced by the local authority.

- (b) Structural designs and drawings prepared duly taking the soil bearing capacity into consideration and certified by qualified Structural Engineer / Consultant Firm empanelled with / licenced by the local authority. The Structural Engineer / Consultant Firm is held responsible for defect in the design.
- (c) Building Plan and Application shall be invariably signed by the owner of the property, builder if any, the Architect and the Structural Engineer who designed the structure. They shall give their present and permanent addresses.
- (d) If the construction is being taken up by a builder, an attested copy of the registered agreement entered between the owner of the property and the builder shall be submitted. In case of any changes in the agreement at a later date, a copy of the same shall also be submitted to the local authority.
- (e) An undertaking on a Stamp Paper of Rs.100/- duly signed by the owner and builder specifying that no flat or built-up area shall be given possession to the purchaser / tenant unless they obtain the occupancy certificate from the local authority and provide all regular service connections.
- (f) Contractor / Builders / Developer / Owner shall submit All Risks Insurance Policy for the construction period.

6. RESTRICTIONS ON PROJECTIONS IN MANDATORY OPEN SPACES:

The following are the Restrictions on Projections in the mandatory open spaces / setbacks / interior open spaces:

- (a) Cornice, Chajjas / weather shades only of width not exceeding 60cm shall be allowed in the mandatory setbacks.
- (b) No balcony projections or corridor shall be permitted projecting within the mandatory open spaces / setbacks in case of non-high rise buildings. These, if provided for, shall be set back as per the minimum mandatory open spaces and the setbacks shall be clear from the edge of the balcony or corridor. However, a Portico or Canopy without access to the top may be considered in the front open space.
- (c) In case of Individual Residential Building in plots more than 300sq.m:
 - (i) In the front setback only a security guard booth of 2sq.m is allowed.
 - (ii) Septic tank, well may be allowed in the rear and side open spaces.
 - (iii) A setback of at least 1m from the property or boundary line of the plot shall be provided for these structures.
 - (iv) Parking sheds, generator room may be allowed in the rear and side open Spaces.
 - (v) The height of these accessory buildings shall not be more than 2.5m and shall not occupy more than 1/4th of the plot width. These shall be so located that they do not hinder the fire safety measures and operations.

7. REQUIREMENTS FOR HIGH RISE BUILDINGS:

(a) High Rise Buildings / Complexes

- (i) High Rise Buildings / Complexes shall be permissible only in areas other than those given in Annexure - I & II.
- (ii) The minimum size of plot for High Rise building shall be 2000sq.m.
- (iii) In respect of sites proposed for high rise buildings and affected in road widening where there is shortfall of the net plot size, up to 10% of such shortfall in net plot area would be considered with the proposed height and corresponding minimum all round setbacks.

- (iv) Every application to construct or reconstruct a High Rise building or alteration to existing High Rise building shall be made in the prescribed form and accompanied by detailed plans, floor plans of all floors along with complete set of structural drawings and detailed specifications duly certified by a qualified licenced structural engineer.
- (v) Prior Clearance from Airport Authority:
For any High Rise Building located in the vicinity of airports as given in the National Building Code, the maximum height of such building shall be decided in consultation with the Airport Authority and shall be regulated by their rules / requirements.
- (vi) Prior No Objection Certificate (NOC) from the Andhra Pradesh State Disasters Response & Fire Services Department:
For all High Rise Buildings prior No objection Certificate (NOC) from the Andhra Pradesh State Disasters Response & Fire Services Department shall be obtained and copy of the approved plan and No Objection Certificate (NOC) issued by the said department shall be enclosed along with the building application.
- (vii) In every high rise building site, an organized open space shall be utilized as greenery, tot lot or soft landscaping, etc. shall be provided over and above the mandatory setbacks to be left in and around the building. This space shall be at least 10% of total site area at ground level open to sky and shall be a minimum width of 3m. This may be in one or more pockets with minimum area of 50sq.m at each location.
- (viii) In addition to the above, a minimum of 2m wide green planting strip in the periphery on all sides within the setbacks are required to be developed and maintained.
- (ix) Buildings abutting major road of 30m and above width shall be permitted only after providing black-topped service roads of minimum 7m width with minimum 2 Lane carriageway within the defined right of way. It will be the responsibility of the developer / builder / owner to provide the above service road of the standards fixed by the Sanctioning Authority at his own cost. The Sanctioning Authority may consider sanctioning building permission if the developer / builder / owner deposits the full cost for laying such service road to the Sanctioning Authority. The amount so levied and collected shall be maintained in a separate exclusive account by the Sanctioning Authority and utilized only for this purpose.
- (x) The minimum abutting road width and all round open space / setback for High Rise Building / Complex shall be as follows:

TABLE – IV

Height of building (in meters)		Minimum abutting road width required (in meters)	Minimum all-round open space on remaining sides (in meters) *
above	Up to		
1	2	3	4
-	21	12	7
21	24	12	8
24	27	18	9
27	30	18	10
30	35	24	11
35	40	24	12
40	45	24	13
45	50	30	14
50	55	30	16
After 55m 0.5m additional setback for every 5m of height shall be insisted			

- (xi) * The front open space shall be on the basis of the abutting road width and shall be either as given in Col. 4 of above Table - IV or the Building Line given in Table - III of rule-5 whichever is higher.
- (xii) The open space to be left between two blocks shall be equivalent to the open space mentioned in Col. 4 of above Table - IV and this shall not be considered for organized open space (Tot lot).
- (xiii) In case of high rise buildings up to 30m height, it is permitted to transfer up to 2m of setback from one side to the other side, which needs to be uniform at any given point, subject to maintaining of minimum setback of 7m on all sides subject to not exceeding the permissible / allowable plinth area.
- (xiv) The balcony projection of up to 2m may be allowed projecting onto the open spaces for upper floors from 6m height onwards.
- (xv) Where the lighting and ventilation of a building is through the means of a chowk or inner courtyard or interior open space/duct, such open space shall be open to sky and area of at least 25sq.m and no side shall be less than 3m.

(b) Tower and Podium Type Building:

- (i) Height of the building shall be allowed up to 50m.
- (ii) For Podium, i.e., Ground plus first floor: around setbacks shall be 7m.
- (iii) For Tower block: The coverage and around setbacks shall be minimum 50 % of the Podium Block, and shall be atleast 3m from the Podium edge on all sides,
- (iv) The fire safety and fire escape measures for the Tower Block shall be independent of the Podium Block.

(c) "Stepped Type" or "Pyramidal Type" Building:

Such type of High Rise Building blocks may be allowed for heights above 30m with the following open space requirements:

- (i) At Ground level: Minimum 9m all round open space for the first five floors.
- (ii) At Upper floors: Increase of 1m all round open space or more, for every 5 upper floors or 15m height or part thereof, over and above the ground level open space of minimum 9m.

(d) Multiplex Complexes:

In case of Multiplex Complexes, "The Andhra Pradesh Rules for Construction and Regulation of Multiplex Complexes, 2007" issued vide G.O.Ms.No. 486, Dt.07.07.2007 shall be followed (Annexure-III).

(e) Hospital Buildings with more than 30m height

In case of Hospital Buildings with more than 30m height, "The Andhra Pradesh Fire Prevention and Safety measures in High Rise Hospital Buildings (above 30m height) Rules 2011" issued vide G.O.Ms.No.2, Dt.03.01.2011 shall be followed (Annexure-IV).

8. GROUP DEVELOPMENT SCHEMES:

- (a) The minimum site / plot area shall be 4000sq.m.
- (b) The minimum abutting existing road width shall be 12m and black topped.
- (c) If the site is not abutting to an existing road, the proposals should be promoted with the immediate improvement of the accessibility of the site from the nearest main road by way of an approved Road Development Plan by the Competent Authority with a minimum width of 12m which

should be implemented by the Licenced Developer within a period of three years.

- (d) Group Development Schemes shall be considered where the site is developed together with construction of building and all amenities and facilities and not disposed as open plots.
- (e) All such applications shall in addition to the requirements under these Rules be accompanied by the provisional plans of.
 - (i) A Services and Utilities Plan as per standards for water supply system, drainage and storm water disposal system, sewerage system, rain water harvesting structures, and for other utilities.
 - (ii) A Landscaping plan including rain water harvesting / water recycling details.
 - (iii) Parking & Internal Circulation Plan along with common pool parking area plan, if any.
- (f) The above shall be drawn to suitable scale with relevant details.
- (g) Minimum of 10% of site area shall be earmarked for organised open space and be utilised as greenery, tot lot or soft landscaping, etc. and shall be provided over and above the mandatory setbacks. Such open space shall be open to sky with a minimum width of 3m. This may be in one or more pockets with minimum area of 50sq.m at each location.
- (h) No additional or proportionate open space charges need to be levied in such schemes.
- (i) These shall not be applicable in case of Government sponsored Housing Scheme / approved Non Government Organisations (NGOs) or private schemes, and the guidelines and requirements as given in the National Building Code for Low Cost Housing / Government orders shall be followed.
- (j) The Building setbacks shall be as per the type of housing & requirements given above for the said type of housing and as per Table - III of rule-5 and Table - IV of rule-7. The open space to be left between two blocks also shall be equivalent to the setback mentioned in Column -10 of Table-III of rule-5 and Column - 4 of Table- IV of rule-7 as the case may be.
- (k) A thorough public access road of 12m width with 2-lane black-topped is to be developed within the applicant's site on any one side at the periphery / as per suitability and feasibility for the convenience of accessibility of other sites and lands located in the interior. This condition would not apply if there is an existing abutting peripheral road on any side.
- (l) In case of blocks up to 12m height, access through pathways of 6m width branching out from the internal roads / loop road would be allowed. All internal roads and pathways shall be developed with good design, practices, good built environment and standards.
- (m) Road requirements:
 - 9m to 18m for main internal approach roads;
 - 9m for other internal roads and also for looped roads.
 - 8m for cul-de-sacs roads (with a minimum radius 9m.) between 50-100m length.
- (n) All roads and open spaces mentioned in this Rule shall be handed over to local body at free of cost through a registered gift deed before issue of occupancy certificate. The society / association may in turn enter into agreement with the local authority for utilizing, managing and maintaining the roads and open spaces. In case of any violation or encroachment, the local authority shall summarily demolish the

encroachments and resume back the roads and open spaces and keep it under its custody.

9. ROW TYPE HOUSING / ROW TYPE SHOPPING PRECINCTS:

- (a) Row Houses shall abut internal roads only.
- (b) Minimum site area shall be not less than 1000sq.m.
- (c) Minimum size of individual plot shall be 50sq.m.
- (d) Maximum plot size shall be 125sq.m.
- (e) Number of plots in a row shall not be more than 8.
- (f) Separation between two blocks shall not be less than 6 m which may be an open space or an alley/pedestrian plaza.
- (g) Only internal staircase is allowed.
- (h) Minimum width of internal roads: 9m.
- (i) Internal cul-de-sac road 6m with maximum length 50m is allowed.
- (j) Minimum open space : 10 % of site area.
- (k) Height permissible:
 - i. Ground + 1 floor or 7m in plot area up to 100sq.m.
 - ii. Ground + 2 floors or 10m in plot area of above 100sq.m.
- (l) Minimum setbacks: Front 3m ; Rear 1.5m.
- (m) The setbacks in a row can be interchangeable.
- (n) In case of row type shopping precincts, back to back shops with above front setback of 3m would be allowed.
- (o) In case of very large projects more than 5 acres, common amenities and facilities like shopping center, community hall/club house etc. are required to be provided in minimum 5 % of the site area.
- (p) In case of Row Type Shopping Precincts, common basement parking in one or more levels would be permissible subject to conditions mentioned in Rule -13.

10. CLUSTER HOUSING

- (a) Minimum site area shall be not less than 1000sq.m.
- (b) Minimum plot size 25sq.m with maximum number of 20 houses in a cluster.
- (c) Minimum size of cluster open space 36sq.m with a minimum width of 6m.
- (d) Height permissible 2 floors or 6m.
- (e) Minimum access road 9m.
- (f) Internal access may be through pedestrian paths of 6m.
- (g) Minimum space between two clusters shall be 6m which may be utilised as pathway / alley.
- (h) Building setbacks: No setbacks are needed for interior clusters as the lighting and ventilation is either from the central open space of cluster and the surrounding pedestrian pathway / access road of the cluster. However, interior courtyards may be provided for larger plots and building areas to facilitate lighting and ventilation. For end clusters sides that are abutting peripheral thoroughfare roads or property boundary, setback / building line shall be as per Table – III of rule-5.
- (i) In case of very large projects more than 5 acres, common amenities and facilities like shopping center, community hall/club house etc. are required to be provided in minimum 5 % of the site area.

11. PROVISIONS FOR ECONOMICALLY WEAKER SECTION (EWS) / LOW INCOME GROUP (LIG) HOUSING CATEGORY

- (a) In case of areas falling in Hyderabad Metropolitan Development Authority (HMDA), Visakhapatnam Urban Development Authority (VUDA), Vijayawada–Guntur–Tenali–Mangalagiri Urban Development Authority

(VGTMUDA) where the proposed site area for residential projects is 4000sq.m and above, the developer shall provide at least 20% of developed land for Economically Weaker Sections (EWS) and Low Income Groups (LIG) housing in such projects.

- (b) In case of areas falling in Municipal Corporations and the Urban Development Authorities in the State except Greater Hyderabad Municipal Corporation, Greater Visakhapatnam Municipal Corporation, Vijayawada Municipal Corporation, Guntur Municipal Corporation, HMDA, VUDA, VGTMUDA areas where the proposed site area for residential projects is 3000sq.m and above, the developer shall provide at least 20% of developed land for Economically Weaker Sections (EWS) and Low Income Groups (LIG) housing in such projects.
- (c) In case of areas falling in Municipalities / Nagar Panchayats constituted under the provisions of the Andhra Pradesh Municipalities Act, 1965 and excluding the Municipalities which are within the jurisdiction of any Urban Development Authority where the proposed site area for residential projects is 2000sq.m and above, the developer shall provide at least 20% of developed land for Economically Weaker Sections (EWS) and Low Income Groups (LIG) housing in such projects.

12. BUILDINGS WITH CENTRAL COURTYARD FOR COMMERCIAL USE:

- (a) 'U' type commercial buildings with central courtyard are allowed with a minimum plot area of 2000sq.m with the following conditions:
- (b) The Front setback shall be as per Table-III of rule-5 & Table-IV of rule-7 for Non High Rise & High Rise buildings respectively.
- (c) The minimum open space / setback on sides and rear except front, shall be
- 2m for building height up to 15m;
 - 3m for building height up to 18m;
 - 7m in case of high rise buildings up to 30m height and buildings coming under purview of Andhra Pradesh Fire Services Act-1999.
- (d) The area so saved is transferred to the central area / space or courtyard;
- (e) The depth of such courtyard shall be at least 50% of the average building depth and the minimum width shall be 10m.

13. PARKING REQUIREMENTS:

- (a) In all Buildings provision shall be made for parking spaces as per the following requirements:

TABLE – V

Sl. No.	Category of building/ activity	Parking area to be provided as percentage of total built up area					
		HMDA Area		All Municipal Corporations & UDA Areas		Municipalities/ N.Ps/ G.Ps. other than UDA Areas	
		GHMC	Municipalities/ N.Ps/ G.Ps. in HMDA Area	All Municipal Corporations	Municipalities/ N.Ps/ G.Ps. in UDA Areas	Selecti on & Special Grade Municipalities	Other Municipal ities/ N.Ps/ G.Ps.
1	2	3	4	5	6	7	8
1	Multiplexes	60	50	60	50	60	50

2	Shopping Malls (above 4000 sq.m), Information Technology Enabling Services Complexes	60	50	50	40	40	30
3	Hotels, Restaurants, Lodges, Cinema halls, Business buildings, Other Commercial buildings, Kalyana Mandapams, Offices, & High-Rise Buildings / Complexes of Non Residential Category	40	30	30	25	25	25
4	Residential Apartment Complexes, Hospitals, Institutional buildings, Industrial buildings, Schools, Colleges, Other Educational Buildings & Godowns & Others	30	20	20	20	20	20

- (b) The parking spaces may be provided in
- (i) Basements or cellars (one or more) / multi-level (allowed for plots 750sq.m and above only) or
 - (ii) Stilt floor or in upper floors (at any level) or
 - (iii) The Open space over and above the setbacks i.e. after leaving the setbacks to be left around the building with adequate vehicular access, aisle, drives, ramps required for maneuvering of vehicles, or
 - (iv) Common pool parking area (in the case of Group Housing Scheme / Cluster Housing / Row Housing Schemes).
 - (v) Any of the above or all the above or combination of the above.
 - (vi) Wherever Mechanical system and car lifts are proposed enabling two tier parking, the required parking is computed accordingly.
- (c) The other aspects for providing parking spaces are:
- (i) Misuse of the area specified for parking of vehicles for any other use shall be summarily demolished / removed by the Enforcement Authority.
 - (ii) The parking spaces should be efficiently designed and clearly marked and provided with adequate access, aisle, drives and ramps required for maneuvering of vehicles.
 - (iii) Cellar floor shall be used only for parking and not for any habitation purpose. There shall be ventilation to cellars with not less than 2.5% of each cellar floor area.

- (iv) In respect of Apartment Complexes / Building / Block of residential nature, in sites up to 750sq.m the Parking requirement shall be deemed to be met if the entire stilt floor is left for parking.
- (v) Common and Continuous cellar parking floors between adjoining buildings would be allowed depending upon structural safety aspects, mutual agreement between owners, etc.
- (vi) In the Stilt floor a watchman room and 2 toilets (W.C), with maximum built up area of 25sq.m may be allowed. Such space shall not be disposed and shall be part of common facility of the complex. For the sites above 750sq.m area it is permitted subject to fulfillment of parking requirement as per Table-V.
- (vii) For parking spaces in basements and upper floors, at least two ramps of minimum 3.6m width or one ramp of minimum 5.4m width and adequate slope 1 in 8 shall be provided. Such ramps shall not be allowed in mandatory setbacks including building line, however they may be permitted in the side and rear setbacks after leaving minimum 7m of setback for movement of fire-fighting vehicles. Access to these may also be accomplished through provisions of mechanical lifts.
- (viii) The minimum width of the drive way shall be 4.5m.
- (ix) In case where the permissible set back is less than 4.6m the pillars position in stilt floor shall be so designed that there shall be clear space of 3.6m (excluding Greenery) is available for movement of vehicles.
- (x) Cellar shall be with a setback of at least 1.5m in the sites of extent of up to 1000sq.m, 2m in the sites of extent of more than 1000sq.m and up to 2000sq.m, and 3m in the sites of extent of more than 2000sq.m from the property line. In case of more than one cellar, 0.5m additional setback for every additional cellar floor shall be insisted.
- (xi) Up to 10% of cellar may be utilised for utilities and non-habitation purpose like A/C Plant room, Generator room, Sewerage Treatment Plant (STP), Electrical installations, Laundry, etc,
- (xii) Visitors' parking shall be provided with minimum 10% of the parking area mentioned in Table-V and may be accommodated in the mandatory setbacks other than front setback where ever such setbacks are more than 6m (excluding green strip).How ever this is not permissible in case of transfer of setback. The Visitors' Parking facility shall be open to all visitors which shall be properly demarcated on ground.

14. ENCOURAGEMENT FOR PROVISION OF PARKING COMPLEXES

To encourage parking complexes, Parking lots and enclaves, owners who develop parking complexes / parking lots, the following incentives would be considered:

- (a) Equivalent built up area of such Parking Complex / or area of Parking lot as the case may be would be considered as Transferable Development Right by the Competent Authority.
- (b) In an existing area/locality where an owner or two or more owners come together and develop combined or Common Parking Complex, Pedestrian Plaza / Subway, or improve / facilitate additional access by linking with surrounding roads etc for public usage are provided, as part of their premises / land development / improving the urban design aspects, additional bonus built up area / Transferable Development Right (TDR) would be considered by the sanctioning authority.

- (c) The setbacks for Parking Complexes shall be as follows:
front setback – as per building line in Table-III of rule-5.
Setbacks on remaining sides – 50% of setbacks given in Table-III of rule-5.
- (d) No fees and other charges shall be charged by the Sanctioning Authority for the area / floors developed as Parking Complex / Parking lot;
- (e) A moratorium on property tax for 5 years would be considered;
- (f) For the next 5 years – Property Tax shall be levied on the lowest slab of residential category.
- (g) Such parking complexes may be permitted along main commercial roads, City Centers, close to Bus Stations, Railway Stations and any Public Transport System so as to encourage parking facility, etc. Access to these parking spaces in such Complexes may be accomplished through provision of mechanical lifts. Such areas may be identified by the sanctioning authority and notified to public every year.

15. COMPLIANCE OF NATIONAL BUILDING CODE PROVISIONS FOR AMENITIES AND FACILITIES IN ALL BUILDINGS

(a) Non High Rise Buildings

- (i) The building requirements and standards other than heights and setbacks specified in the National Building Code - 2005 shall be complied with.
- (ii) Such buildings shall be undertaken by owners by engaging registered architect, licenced builders / developers and licenced structural engineers. The designs and building plans shall be countersigned by the owner, licenced developer, registered architect, licenced engineer and a qualified & licenced Structural Engineer who shall be responsible for the supervision, structural safety, fire safety and specifications compliance of such buildings.
- (iii) The work of the building services like sanitation, plumbing, fire safety requirements, lifts, electrical installations, and other utility services shall be executed under the planning, design and supervision of qualified and competent technical personnel.
- (iv) The parking requirements shall comply as given in these rules. The parking facilities and vehicles driveways etc. shall be maintained to the satisfaction of the Sanctioning Authority.
- (v) All Public and Semi-Public Buildings and Institutional Buildings shall be designed and constructed to provide facilities to the Specially Enabled Persons as prescribed in the National Building Code of India as given in Annexure – V.
- (vi) In all Buildings, the requirements of parts of the building like size and area requirements of habitable rooms, kitchen, bathrooms and Water closets, other areas, corridor and staircase widths, service ducts, etc. shall conform to the National Building Code of India.
- (vii) Rain Water Harvesting Structures shall be provided as given in G.O.Ms.No.350 MA, Dated. 09.06.2000 (Annexure-VI).
- (viii) Provisions of the Andhra Pradesh Water, Land and Trees Act, 2002 shall be complied in such sites and schemes where ever applicable.
- (ix) Buildings shall be designed for compliance with earth quake resistance and resisting other natural hazards. The Completion Certificate shall mention that the norms have been followed in the design and construction of buildings for making the buildings resistant to earthquake, compliance with structural safety and fire safety requirements.

- (x) In case of Group Housing Buildings where there are 100 units and above, a minimum 3% of the total built up area shall be planned and developed for common amenities and facilities like convenient shopping, committee hall / club house, crèche, gymnasium etc. as per National Building Code of India (NBC)-2005. Amenities block shall not be part of the residential blocks. However in case of single apartment block, amenities can be provided in the same block.
 - (xi) In case of Group Housing Buildings where there are 100 units and above, buildings proposed for Nursing Homes, Hospitals and Hotels provision for Solar Water Heating System and Solar Lighting System in the building and in the site for outdoor lighting, etc. shall be made and the applicant shall give a bank guarantee to this effect to the sanctioning authority for compliance of the same.
 - (xii) In case of Group Housing Buildings where there are 100 units and above, Nursing Homes, Hospitals and Hotels provision for Recycling of Water shall be made.
- (b) **High Rise Buildings: in addition to the above the following conditions shall also be complied with**
- (i) In addition to the required staircases and lifts, there shall be at least one fire escape staircase and lift. These staircases and lifts shall be got certified from the manufacturer's authorized service technical personnel from time to time.
 - (ii) Such buildings shall be undertaken by owners by engaging registered architect, licenced builders / developers and licenced structural engineers. The designs and building plans shall be countersigned by the owner, licenced developer, registered architect, licenced engineer and a qualified & licenced Structural Engineer who shall be responsible for the supervision, structural safety, fire safety and specifications compliance of such buildings.
 - (iii) Provision for power generator shall be made.
 - (iv) These buildings shall be planned, designed and constructed to ensure fire safety requirements are met and maintained and shall comply in accordance with the Fire Protection Requirements of National Building Code of India (NBC)-2005 / Andhra Pradesh Fire Services Act, 1999.
 - (v) The facilities for providing fire protection and firefighting facilities in such buildings should be in compliance with the stipulations laid down and clearance issued by the Andhra Pradesh State Disasters Response & Fire Services Department from time to time. No Objection Certificate (NOC) from the Andhra Pradesh State Disasters Response & Fire Services Department shall be obtained from time to time regarding the fire safety requirements and facilities installed. The designs and installations regarding fire protection and safety measures including exit requirements and smoke containment and smoke management measures shall be undertaken through a fire engineer / fire consultant.
 - (vi) Buildings shall be designed for compliance with earth quake resistance and resisting other natural hazards. The Completion Certificate shall mention that the norms have been followed in the design and construction of buildings for making the buildings resistant to earthquake, compliance with structural safety and fire safety requirements.

16. CONCESSIONS IN ROAD WIDENING CASES:

- (a) Where any land or site or premises for building is affected in the Statutory Plan / Master Plan Road or Circulation network or a road required to be widened as per Road Development Plan, such area so affected in the road or circulation network shall be surrendered free of cost to the Sanctioning Authority by the owner of land. No development permission shall be given unless this condition is complied with.
- (b) Upon surrendering such affected area the owner of the site would be entitled to a Transferable Development Right (TDR) as given in Rule-17.

OR

The owner shall be allowed to construct an extra floor with an equivalent built area for the area surrendered subject to mandated public safety requirements.

OR

The owner shall be allowed to avail concessions in setbacks including the front set-back (subject to ensuring a building line of 6m in respect of roads 30m and above, 3m in respect of roads 18m and below 30m and 2m in respect of roads less than 18m and subject to ensuring minimum side and rear setback of 2m in case of building of height up to 12m and 2.5m in case of buildings of height above 12m and up to 15m and 3m for buildings of height above 15 and up to 18m).

- (c) The extent of concessions given shall be such that the total built up area after concession shall not exceed the sum of built up area allowed (as proposed) on total area without road widening and built up area equivalent to surrendered area.
- (d) In case of plots less than 750sq.m in addition to concessions in setbacks and height, the cellar floor may be allowed keeping in view of its feasibility on ground.
- (e) In case of High Rise Buildings the concessions in setbacks, other than the front setback would be considered subject to maintaining minimum clear setback of 7m on the sides and rear side and such minimum setback area shall be clear without any obstructions to facilitate movement or fire fighting vehicles and effective firefighting operation.
- (f) The above concessions shall be considered at the level of Sanctioning Authority / Competent Authority. The Sanctioning Authority / Competent Authority may consider any other concession as deemed fit with the prior approval of Government.

17. GRANT OF TRANSFERABLE DEVELOPMENT RIGHT:

- (a) Transferable Development Right" (TDR) can be awarded only when such lands are transferred to the local body / Urban Development Authority as the case may be by way of registered gift deed. The award would be in the form of a TDR certificate issued by the Competent Authority / Sanctioning Authority.
- (b) Grant of TDR can be considered by the Competent Authority / Sanctioning Authority for the following areas subject to the owners complying with the conditions of development above, as per the following norms:
- (i) **For the Master Plan Road / Road Development Plan undertaken and developed:** equivalent to 200% of built up area of such area surrendered. **For conservation and development of lakes / water bodies / nalas foreshores & Recreational buffer development with greenery, etc:** equivalent to 100% of built up area of such recreational buffer area developed at his cost.

(ii) **For Heritage buildings and heritage precincts maintained with adaptive reuse:** equivalent to 100% of built up area of such site area.

(c) The TDR may be arrived at on the basis of relative land value and equivalent amount in both export and Import areas, as per the Registration Department records. The Competent Authority shall have the discretion in the matter of applicability of TDR. The TDR shall not be allowed in unauthorized buildings / structures / constructions and shall be considered only after the land is vested with the local authority / UDA. The TDR certificate issued would be valid or utilized / disposed only within the concerned local body area and as per guidelines and conditions prescribed.

(d) **GUIDELINES ON TRANSFERABLE DEVELOPMENT RIGHT:**

In order to adopt uniform guidelines throughout the State the following conditions and guidelines are prescribed.

(i) As and when the owner of the building intends to construct the building in the remaining area of the site, he is entitled to construct the building as per the provisions of these Building Rules. In the event the owner doesn't take up any construction, the owner is entitled for TDR which can be used / disposed depending on convenience.

(ii) A composite Register shall be maintained by the Sanctioning Authority as per the proforma enclosed at Annexure -VIII on the award of TDR and its sale / disposal and utilization. A responsible officer shall be the custodian of the Register.

(iii) At the time of sale / disposal / utilization of a particular TDR, the utilization details of the sale / disposal need to be entered at relevant columns in the register and that therefore the relevant file need to be referred to the custodian of the Register for making necessary entries in the register. The custodian is held responsible to enter relevant details in the register and also to enter utilization details in the TDR. When TDR Certificate is sold / utilized totally, the same shall be surrendered by the owners and the custodian shall take possession of the Certificate and make necessary entries in the register. As per Government Orders, TDR award is to be arrived on the basis of relevant land value at both export and import areas as per prevailing Registration value.

(iv) TDR can either be sold or can be utilized by the same owner depending on convenience.

(v) TDR can be allowed to be utilized for construction of one additional floor over the normal permissible floors without insisting additional setbacks subject to compliance of other norms.

(vi) Every TDR sold or disposed shall be accompanied by a prescribed agreement on Rs.100/- non-judiciary stamp paper between the person disposing the TDR and the person who intend to utilize the TDR. Draft agreement as per Annexure - XI.

(e) **DOCUMENTS REQUIRED WITH APPLICATION FOR GRANT OF TRANSFERABLE DEVELOPMENT RIGHT CERTIFICATE:**

Application to be made by owner in the prescribed format giving the following details:

- (i) Name of the owner with clear address, contact phone number, etc.
- (ii) Copy of the ownership documents along with clear site plan and location plan.

- (iii) Site Plan showing the land surrendered, its extent, location with dimensions.
- (iv) Building permission Plan for the site by the urban local body.
- (v) Details of Building permission granted / applied for like use or purpose of building, number of floors permitted, all-round setbacks, floor area permitted and utilized, parking area permitted; etc.
- (vi) Whether already benefit of relaxations been utilized for the site?
- (vii) Whether any Court case is pending against Urban Local Body?
- (viii) Land value of the site where TDR is to be availed (latest copy from concerned Sub Registrar to be enclosed)
- (ix) TDR admissible in terms of sq.m and equivalent land value.

18. URBAN DESIGN AND ARCHITECTURAL CONTROL

For certain areas as well as sites abutting major roads of 30m and above, the Competent Authority may enforce urban design and architectural control. These shall be detailed out keeping in view the development conditionalities and requirements given in these Regulations and the National Building Code norms. For this purpose, urban design and architectural control sheets / Plans approved by the Competent Authority shall be complied with.

19. BUILDING PERMIT / LICENSE FEES

- (a) The Sanctioning Authority shall along with the Building Application levy and collect 2% of the Building Permit / License fees, subject to a maximum of Rs.10,000 as initial fees. The balance Building Permit / License Fees together with other fees and Charges shall be levied and collected before the issue of permission / sanction.
- (b) In case of rejection of building application, the above initial fees would be forfeited.
- (c) No fees and charges would be levied for parking spaces provided in any floor.
- (d) The permission is valid for 5years in case of High Rise Buildings & Group Development Schemes and 3years in case of Non High Rise Buildings subject to condition that the construction shall be commenced within 18months. The permission can be revalidated for another 2years on payment of building permit fee.

20. LEVY OF SPECIAL FEES AND OTHER PROVISIONS FOR CERTAIN AREAS:

The Sanctioning Authority with the specific approval of the Government may, when implementing such Projects, levy Special fees and other fees / charges for lands / sites / premises abutting or in the vicinity of the Ring Road or other highways / major roads or the Mass Rail Transit System / Light Rail Transit System / Multi Modal Transit System / Bus Rapid Transit System route indicated in the Master Plan, at the rates and procedure prescribed by the Government.

21. CITY LEVEL INFRASTRUCTURE IMPACT FEES APPLICABLE IN CERTAIN CASES:

- (a) With a view to ensure development of City Level Infrastructure facilities and the City Level Infrastructure Impact Fees shall be levied as given in the table below:

TABLE – VI

Areas	Height (No. of Floors), Use of the Building and Rate in Rs. per sq. m of Built Up Area							
	Above 15 m & up to 7floors		Above 7 floors & up to 10 floors		Above 10 floors & up to 17 floors		Above 17 floors	
	Residential	Commercial, Offices, ITES, Institutional, Educational & Others (except Industrial)	Residential	Commercial, Offices, ITES, Institutional, Educational & Others (except Industrial)	Residential	Commercial, Offices, ITES, Institutional, Educational & Others (except Industrial)	Residential	Commercial, Offices, ITES, Institutional, Educational & Others (except Industrial)
1	2(a)	2(b)	3(a)	3(b)	4(a)	4(b)	5(a)	5(b)

- (b) For The first 15m height of the building (excluding stilt floor) there will be no levy of City Level Impact Fee.
- (c) In case of Multiplexes the rates given in the Multiplex Rules shall be applicable.
- (d) The Government may revise the above rates from time to time.
- (e) The above rates shall not be applicable for Government Departments and Public Agencies like Urban Development Authority, Andhra Pradesh Industrial Infrastructure Corporation (APIIC), Local Bodies and Hyderabad Metropolitan Water Supply & Sewerage Board (HMWSSB). This exemption shall not be applicable for commercial projects taken up by such agencies.
- (f) The amount levied and collected under the above Rule shall be credited and maintained in a separate escrow account by the concerned sanctioning authority and 50% of it shall be utilised for development of infrastructure in the same area and balance amount is to be utilised towards improvement of city level capital infrastructure in the area. An Infrastructure Plan and Action Plan for implementation is required to be undertaken by the Competent Authority and the said Fund is utilised accordingly.

22. INCENTIVES FOR OWNERS LEAVING MORE SETBACKS / INSTALLING SOLAR HEATING SYSTEM / LIGHTING / RAIN WATER HARVESTING / RECYCLING OF WASTE WATER:

The following incentives in terms of rebate in Property Tax will be given by the local authority for owners or their successors-in-interest who:

- (i) Install and use solar heating and lighting system: 10% rebate.
- (ii) Undertake both recycling of waste water and rain water harvesting structures: 10% rebate.

23. TECHNICAL APPROVAL FROM THE COMPETENT AUTHORITY

- (a) Hyderabad Metropolitan Development Authority (HMDA) / Urban Development Authority (UDA) Areas:

In case of areas falling under the jurisdiction of HMDA / UDA, the development control powers shall be as per the delegation issued by the concerned HMDA / UDA from time to time.

- (b) **Areas not covered under HMDA / UDA Areas:**

- (i) Where the Town Planning Section Head is below the cadre of Deputy Director, the Sanctioning Authority is empowered to sanction the building permission up to 10m height in plot area up to 300sq.m, in the sites where the proposed activity is permissible in normal course as per Zoning Regulations.

If the site area is above 300sq.m and up to 1000sq.m. prior Technical Approval from the concerned Regional Deputy Director shall be obtained where the proposed activity is permissible in normal course as per Zoning Regulations.

- (ii) Where the Town Planning Section Head is in the cadre of Deputy Director or above, the Sanctioning Authority is empowered to sanction the building permission in plot area up to 1000sq.m, in the sites where the proposed activity is permissible in normal course as per Zoning Regulations.

- (iii) Other than (i) & (ii) above the proposals of building approvals shall be submitted to The Director of Town and Country Planning for prior Technical Approval.

- (iv) In the Gram Panchayat areas covered under sanctioned General Town Planning (GTP) Scheme the Sanctioning Authority is empowered to sanction the individual residential building permission up to 10m height in plot area up to 300sq.m, in the sites where the proposed activity are permissible in normal course as per Zoning Regulations. In respect of other cases prior Technical Approval shall be obtained from the Competent Authority i.e. Director of Town & Country Planning.

- (v) In Case of Group Development, Group Housing Schemes like Cluster Housing / Row Housing / Semidetached Housing Schemes and Gated Community, Technical approval from the Competent Authority is required to be obtained.

24. HIGH RISE BUILDING COMMITTEE

The following committees shall be constituted for scrutiny of High Rise Building applications.

- (a) Greater Hyderabad Municipal Corporation (GHMC)/Greater Visakhapatnam Municipal Corporation (GVMC)/Vijayawada Municipal Corporation (VMC).

1. Chief City Planner / Town Planning Section Head : Member Convener
2. Engineering Section Head : Member
3. Director of Town & Country Planning (DT&CP) or his nominee : Member
4. Town Planning Section Head of Urban Development Authority (UDA) or his nominee : Member

The Committee shall give the recommendations to the Commissioner.

- (b) Hyderabad Metropolitan Development Authority (HMDA)/All Urban Development Authorities (UDA) (Other than the area covered in "a" above.)

1. Head of the Town Planning wing of concerned UDA -Member Convener
2. Town Planning Section Head or his nominee of concerned ULB-Member
3. Engineering Section Head of concerned UDA / ULB -Member
4. Director of Town & Country Planning or his nominee. -Member

The Committee shall give the recommendations to the Metropolitan Commissioner / Vice Chairman.

- (c) Other Municipal Corporations / Municipalities / Nagar Panchayats. (Other than the area covered in (a) & (b) above i.e. DT&CP Jurisdiction)

1. Commissioner of concerned ULB -Member
2. Regional Deputy Director of Town Planning -Member
3. Superintendent Engineer Public Health -Member
4. Town Planning Section Head of concerned ULB -Member Convener
5. Senior Practicing Architect / Planner nominated by DT&CP -Member

The Committee shall give the recommendations to the Director of Town & Country Planning.

- (d) Gram Panchayats covered in Sanctioned Master Plan Area. (Other than the area covered in (a), (b) & (c) above i.e. DT&CP Jurisdiction)

1. Regional Deputy Director of Town Planning (RDDTP) -Member Convener
2. Superintendent Engineer Public Health -Member
3. Senior Practicing Architect / Planner nominated by DT&CP -Member

The Panchayat Secretary shall submit the proposal through the concerned Regional Deputy Director of Town Planning (RDDTP) to place before the committee and the committee shall give the recommendations to the Director of Town & Country Planning.

The guidelines for Nomination of Senior Practicing Architect / Planner shall be followed as mentioned in Annexure - XII.

25. COMPLIANCE BY OWNER FOR ENSURING CONSTRUCTION IS UNDERTAKEN AS PER SANCTIONED PLAN:

- (a) The owner and builder / developer shall give an Affidavit duly notarized to the effect that in the case of any violation from the sanctioned building plan, the Enforcement Authority can summarily demolish the violated portion.
- (b) In respect of Apartment Buildings, the owner or builder shall give a Declaration duly specifying the number of floors permitted, along with the extent of each floor. In case of any violation with regard to the Declaration, the Enforcement Authority can demolish the violations.
- (c) Before release of the building sanction by the sanctioning authority, the owner of the plot / site is not only required to produce the original Sale Deed, registered under the provisions of the Indian Registration Act, 1908 / Certified copy issued by Stamps and Registration Department for the perusal of the sanctioning authority and cross verification with the attested copy submitted with the building application.
- (d) The owner is required to hand over 10% of the built-up area in the ground floor or first floor or the second floor, as the case may be, to the sanctioning authority by way of a Notarised Affidavit. In respect of row houses / detached houses / cluster housing 5% of the units shall be handed over by way of notarized affidavit to the sanctioning authority. The Notarised Affidavit shall be got entered by the sanctioning authority in the Prohibitory Property Watch Register of the Registration Department. Then only the Building sanction will be released.

- (e) Individual buildings in plots up to 200sq.m with height up to 7m in respect of Municipal Corporations including Greater Hyderabad Municipal Corporation (GHMC) and 300sq.m with height up to 7m in respect of Municipalities / Nagar Panchyats are exempted from the conditions (c) & (d) above.

26. OCCUPANCY CERTIFICATE:

- (a) Occupancy Certificate shall be mandatory for all buildings. No person shall occupy or allow any other person to occupy any building or part of a building for any purpose unless such building has been granted an Occupancy Certificate by the Sanctioning Authority. Partial Occupancy Certificate may be considered by the Sanctioning authority on merits i.e. flats / units or area within a complex which have fulfilled all the requirements in addition to basic facilities like lifts water supply, sanitation, drainage, roads, common lighting etc. However, in respect of individual buildings in plots up to 100sq.m with height up to 7m obtaining Occupancy Certificate is optional.
- (b) The owner shall submit a notice of completion through the registered architect and licenced builder / developer along with prescribed documents and plans to the Sanctioning Authority. The Sanctioning Authority or the person authorized, on receipt of such notice of completion shall undertake inspection with regard to the following aspects:
- (i) *No. of Floors.
 - (ii) External setbacks.
 - (iii) Usage of the building.
 - (iv) Parking space provision.
 - (v) Abutting road width
- * The total height of the building may vary to a maximum of 1m with no change in the permitted number of floors subject to compliance of fire service norms.
- (c) The Sanctioning Authority shall communicate the approval or refusal of the Occupancy Certificate within 15days or may issue the same after levying and collecting compounding fee, if any. If the authority fails to issue the occupancy certificate within the above stipulated period the responsibility shall be fixed with the concerned officer who fails to process the file.
- (d) The Sanctioning Authority is empowered to compound the offence in relation to setbacks violations (other than the front setback) in respect of non high rise buildings only up to 10%, duly recording thereon the violations in writing. The rate of Compounding fee shall be equivalent to one hundred percent of the value of the land as fixed by the Registration Department at the time of compounding for the violated portion and the Government may revise this rate from time to time. Compounding of such violation shall not be considered for buildings constructed without obtaining any sanctioned plan.
- (e) For all high rise buildings, the work shall be subject to inspection by the Andhra Pradesh State Disasters Response & Fire Services Department and the Occupancy Certificate shall be issued only after clearance from the Andhra Pradesh State Disasters Response & Fire Services Department with regard to Fire Safety and Protection requirements.
- (f) The sanctioning authority shall ensure that all public and semi public buildings are constructed disable friendly and provide facilities for specially enabled persons as per National Building Code -2005 of India while issuing occupancy certificate.
- (g) The functional/line agencies dealing with electric power, water supply, drainage and sewerage shall not give regular connections to the building unless such Occupancy Certificate is produced, or alternatively may

charge 3 times the tariff till such time Occupancy Certificate is produced. This condition shall also be applicable to all unauthorized constructions and buildings constructed without sanctioned building plan. In addition to the above, the Local Body shall collect every year two times the property tax as penalty from the owner / occupier.

- (h) The Registration Authority shall register only the permitted built up area as per the sanctioned building plan and only upon producing and filing a copy of such sanctioned building plan. On the Registration Document it should be clearly mentioned that the registration is in accordance with the sanctioned building plan in respect of setbacks and number of floors.
- (i) The financial agencies / institutions shall extend loan facilities only to the permitted built up area as per the sanctioned building plan.

27. ENFORCEMENT

- (a) In addition to the enforcement powers and responsibilities given in the respective laws of the local authority, in respect of these Rules:
 - (i) The Enforcement Authority concerned shall be wholly and severally responsible for ensuring and maintaining the right of way / width of the road and building restrictions as given in these Rules.
 - (ii) The Enforcement Authority shall summarily remove any violation or deviation in building construction in maintaining the road widths and building line.
 - (iii) In respect of apartment complexes, shopping complexes and all high rise buildings, periodical inspections shall be carried out indicating the stage of work with reference to sanctioned plan. In case of any deviations from the sanctioned plan, necessary action shall be taken as per rules.
 - (iv) Any person who whether at his own instance or at the instance of any other person or anybody including the Government Department undertakes or carries out construction or development of any and in contravention of the statutory master plan or without permission, approval or sanction or in contravention of any condition subject to which such permission or approval or sanction has been granted shall be punished with imprisonment for a term which may extend to three years, or with fine which may extend to ten percent of the value of land or building including land in question as fixed by the Registration Department at the time of using the land or building. Provided that the fine imposed shall, in no case be less than fifty percent of the said amount.

(b) Constitution of Town Planning and Building Tribunal:

The Government shall constitute a Town Planning and Building Tribunal for dealing with all town planning, enforcement and building issues by making necessary amendments to the corresponding Acts if required.

(c) Constitution of Building Ombudsman:

The Government may constitute a Building Ombudsman for dealing with all complaints of building violations, shortfall in building standards, services and specifications and safety aspects. The Government shall separately work out the procedure, role and details of the functioning of the Building Ombudsman.

28. LIMITATIONS OF BUILDING SANCTION:

Sanction of building permission by the Sanctioning Authority shall not mean responsibility or clearance of the following aspects:

- (a) Title or ownership of the site or building.
- (b) Easement Rights.

- (c) Structural Reports, Structural Drawings and structural aspects.
- (d) Workmanship, soundness of structure and materials used,
- (e) Quality of building services and amenities in the construction of building.
- (f) Other requirements or licences or clearances required for the site / premises or activity under various other laws.

29. LICENSING OF REAL ESTATE COMPANIES, DEVELOPERS, BUILDERS, TOWN PLANNERS, ENGINEERS & OTHER TECHNICAL PERSONNEL MANDATORY:

- (a) The Licencing of Real Estate Companies, Developers & Builders shall be in accordance with the rules as per Annexure – IX.
- (b) The Licencing of Architects, Engineers, Supervisor, Surveyor and Structural Engineer & Town Planners shall be as per the Annexure – X.
- (c) No developer / builder / real estate firm or company / engineer / town planner/other technical personnel shall be allowed to undertake development/do business / practice in a Municipal Corporation / Urban Development Authority / Municipality / Nagar Panchayat Area unless they are licenced with the sanctioning authority of the respective area.
- (d) Architects shall be required to be registered with the Council of Architecture.
- (e) The engaging of the services of a licenced developer / builder shall be mandatory for Apartment Buildings, Group Housing, all types of Group Development Schemes, all High-Rise Buildings and all Commercial Complexes.

Developments undertaken for construction of individual residential houses, educational/institutional/industrial buildings and developments undertaken by public agencies are exempted from the above condition.

- (f) Any developer / builder undertaking development or any firm doing property business in any Municipal Corporation / Urban Development Authority / Municipality / Nagar Panchayat or soliciting property sale/transactions or advertising as such in case of above, shall necessarily mention the details of it's licence number, licence number of the licenced developer to whom the approval is given by the said Municipal Corporation / Urban Development Authority / Municipality / Nagar Panchayat, together with the permit number and it's validity for information and verification of public / prospective buyers.
- (g) Absence of the above or suppressing of the above facts or in the case of other licences and other technical personnel who violate the conditions would invite penal action including debarring of the real estate firm / development firm / company from practice in the local authority area for 5 years besides prosecution under the relevant laws / code of conduct by the sanctioning authority.
- (h) Any licenced developer / builder / other technical personnel who undertake construction in violation of the sanctioned plans shall be black-listed and this would entail cancellation of their licence besides being prosecuted under the relevant laws / code of conduct.

ANNEXURE-III
(Rule-7.d)
GOVERNMENT OF ANDHRA PRADESH
ABSTRACT

Municipal Administration & Urban Development Department - Andhra Pradesh Rules for Construction and Regulation of Multiplex Complexes, 2007 - Notification -Issued.

Municipal Administration & Urban Development (M1) Department

G.O.Ms.No.486

Dated:07-07-2007,

ORDER:

The following Notification shall be published in the Extraordinary Issue of the Andhra Pradesh Gazette Dated 09-07-2007.

NOTIFICATION

In exercise of powers vested in Section 58 of the Andhra Pradesh Urban Areas (Development) Act, 1975, Section 585 of the HMC Act, 1975, Section 44 (2) (v) of the AP Town Planning Act, 1920, Section 326 (1) of the AP Municipalities Act, 1965 and Section 125 of the Andhra Pradesh Panchayat Raj Act, 1994, the Government of Andhra Pradesh hereby issue the following Rules.

1. These Rules may be called "The Andhra Pradesh Rules for Construction and Regulation of Multiplex Complexes, 2007"
2. (i) These Rules shall be applicable to the whole of the State of Andhra Pradesh.
(ii) These Rules shall come into force from the date of publication in the Andhra Pradesh Gazette. All existing rules, regulations, bylaws, orders that are in conflict or inconsistent with these Rules shall stand modified to the extent of the provisions of these rules.
(iii) Provisions of the Andhra Pradesh Cinemas (Regulation) Act, 1955 will need to be strictly adhered to. It is, however, clarified that the rules of the Andhra Pradesh Cinema (Regulation) Rules 1970 will apply to the multiplex buildings as a whole and not the individual cinema halls within it. The provisions of the said Andhra Pradesh Cinema (Regulation) Rules 1970 are deemed to be relaxed to allow activities mentioned in the definition of Multiplex as given below;
3. **Definitions:**
 - (a) "Multiplex complex" shall mean an integrated entertainment and shopping center/complex or a shopping mall and having at least three (3) cinema halls/screens. Apart from Cinema Halls, the entertainment area may have restaurants, cafeteria, fast food outlets, video games parlors, pubs, bowling alleys, health spa/ centers, convention centers, hotels and other recreational activities. However, habitable areas like hotels, service apartments shall not be allowed in the same block where the Multiplexes are set up and shall be allowed only as a separate block. Such a Complex may be spread over the site or be in one or more blocks which may be high-rise buildings or normal buildings.
 - (b) 'Building Approving Authority' means in UDA areas the Commissioner of Municipal Corporation in municipal Corporation area or the Vice-Chairman of the Urban Development Authority in areas outside the limits of Municipal Corporation as the case may be. In case of areas falling in non UDA areas, Building Approval Authority will be respective local body. However they shall obtain prior Technical Approval from the Director of Town & Country Planning.
 - (c) "Licensing Authority: means the licencing authority under the AP Cinema (Regulation) Act, 1955 and rules made there under for issuing licences for cinema theatres in the Multiplex Complex.
 - (d) Words, expressions and definitions not defined herein shall have the same meaning as given in the National Building Code of India, 2005.
4. **Redevelopment of existing cinema halls into Multiplex Complex:**
Conversion of existing cinema halls' to multiplex complexes will be allowed if they comply with the requirements given hereunder.
5. **Site Requirements for Multiplex Complexes:**
 - (i) The minimum size of plot for a Multiplex shall be 3000 sq m.
 - (ii) The minimum abutting road width for a multiplex shall be 18 m existing. The abutting road has to be black-topped with minimum 2 -lane carriageway. Service roads are required for sites abutting 30 m and above roads and approach shall be allowed only through service road. The width of the service road shall be minimum 7m with minimum 2-lane black topped carriageway and shall be undertaken by the owners of such buildings to the extent of the width of their site.
6. **Location Criteria:**
 - (A) The locational criteria of a Multiplex Complex shall be the same as given in the Andhra Pradesh Cinemas (Regulation) act, 1955 and Clause 3.2 of Part 4 of National Building Code. And in addition to this, shall comply with Clause 3.2 of Part 4 of National Building Code (wherever applicable).
The location shall be further subject to:
 - i) The requirement of furnishing traffic impact study and based on the traffic impact study a traffic management plan for such Complex will be required to be undertaken through a qualified consultant.
 - ii) NOC from the Police Department (Traffic) and Director-General of Fire Services will be a pre-requisite for considering the building permission by the Building approving authority.
 - iii) Multiplex Complexes shall not be allowed in Congested areas and settlement areas / Abadi / Gram khantam areas,

- in areas restricted for High-rise buildings and abutting major road junctions.
- iv) Multiplex Complexes shall not be allowed in purely residential areas/localities.
 - v) Where zoning regulations of a statutory Plan/Scheme are in force, multiplex complex site location shall be governed as per such zoning regulations.
- (B) Multiplexes may be permitted in a zone or scheme declared as tourism zone/area along with other recreational facilities.
- (C) Government may by Notification, declare certain roads in any UDA/local area where Multiplex Complexes shall not be allowed.

7. **Building Requirements:**

7.1. The building bulk, coverage and height shall be governed by the minimum around setbacks to be left, the organised open spaces to be left and the height restrictions imposed by the Airport authority (if applicable) / Defence authorities (if applicable) and Fire Services Department and the Area-level Impact fee on built up area required to be paid, as applicable.

7.2. Every application to construct or reconstruct a Multiplex Complex shall be made in the prescribed form and accompanied by detailed plans and floor plans of all floors drawn by a registered architect, along with complete set of structural drawings and detailed specifications duly certified by a qualified structural engineer. Necessary prior No Objection Certificate shall be submitted from the Airport Authority (if applicable), and Directorate of Fire Services along with the application. The fire safety requirements shall be duly certified by a fire engineer.

7.3. The minimum around setbacks for a multiplex Complex shall be as follows:

(A)

TABLE		
Height of the Building (in m.)	Minimum Front open space (in m.)	Minimum open space on remaining sides (in m.)
1	2	3
Up to 15	12	6
Above 15 & Upto 21mt		7
Above 21mt & Upto 24 mt		8
Above 24 m & Upto 27 mt		9
Above 27 m & Upto 30 mt		10
Above 30 m & Upto 34 mt		11
Above 35 m & Upto 40 mt		12
Above 40 m & Upto 45 mt	13	13
Above 45 m & Upto 50 mt	14	14
Above 50 m	15	16

- i) Provided the maximum height of the block/portion wherein the Multiplex screens are set up shall not exceed 30 metres;
 - ii) Provided in case of sites located in Gram Panchayat areas and outside UDA areas, the maximum height of all blocks permissible shall be 30 metres;
 - iii) Provided that in case of two or more blocks in the same site, the space between the two blocks shall be as given in Column (3) of the above Table.
 - iv) Provided that for heights of blocks above 30 m and up to 45 m, the minimum abutting road width shall be 24 m while for blocks of height above 45 m, the minimum abutting road width shall be 30m
- (B) No relaxation in the above-mentioned open Spaces or transfer of setbacks shall be allowed:

7.4. **Construction Requirements:**

- i) The building requirements, building services, specifications and standards specified in the National Building Code, 2005 shall be complied with.
- ii) Construction of such buildings shall be undertaken by owners by engaging registered architect, licenced builder, fire engineer and licenced structural engineer. The designs and building plans shall be countersigned by the owner, licenced builder, registered architect, licenced engineer, qualified & licenced structural Engineer and a fire engineer who shall be responsible for the supervision, structural safety, fire safety and compliance of the specifications for such buildings.
- iii) Buildings shall be designed for earth quake resistance and resistance for other natural hazards. The Completion Certificate obtained from the registered architect shall mention that the norms have been followed in the design and construction of buildings for making the buildings earthquake resistant, compliance with structural safety and fire safety requirements as per the relevant provisions of National Building Code & A.P Fire Services Act.
- iv) The exit and fire safety requirements shall be in accordance with Part-IV of National Building Code of India. The fire safety measures shall be undertaken by engaging the services of a fire protection engineer. The following minimum Fire Fighting Installations are to be provided as per Table 23, Part - 4 of National Building Code of India, 2005:

SI.No	Fire Fighting Installation
1.	Fire Extinguishers as per IS 2190
2.	Hose reel
3.	Wet riser
4.	Yard hydrant
5.	Automatic sprinkler system in entire Building
6.	Automatic detection and alarm system in entire Building (except Cellars)
7.	Manually operated electrical alarm system in entire Building (except Cellars)

8.	Underground static water tank of 2,00,000 Liters capacity
9.	Terrace tank of 20,000 Liters capacity
10.	Two Electrical Main pumps of 2850 LPM capacity
11.	Diesel pump (Standby of 2850 LPM capacity)
12.	Electric Jockey pump of 180 LPM capacity

- v) The work of other building services like sanitation, plumbing, lifts, electrical installations, and other utility services shall as per National Building Code standards and shall be executed under the planning, design and supervision of qualified and competent technical personnel.
- vi) The means of escape shall be provided as per the Clause 4 (Exit Requirements), Part 4 of National Building Code of India.
- (a) Capacities of Exits shall be calculated as per Clause 4.4, Part 4 of NBC, 2005.
 - (b) Arrangement of Exits shall be as per Clause 4.5, Part 4 of NBC, 2005.
 - (c) Number of Exits shall be provided as per Clause 4.6, Part 4 of National Building Code, 2005.
 - (d) Doorways shall be provided as per Clause 4.7, Part 4 of National Building Code, 2005.
 - (e) Corridors and Passageways shall be provided as per Clause 4.8, Part 4 of National Building Code, 2005.
 - (f) Internal Staircases shall be provided as per Clause 4.9, Part 4 of National Building Code, 2005.
 - (g) Pressurization of Staircases shall be provided as per Clause 4.10, Part 4 of National Building Code, 2005.
 - (h) External Staircases shall be provided as per Clause 4.11, Part 4 of National Building Code, 2005.
 - (i) Horizontal Exits may be provided as per Clause 4.12, Part 4 of National Building Code, 2005.
 - (j) Fire Tower shall be provided as per Clause 4.13, Part 4 of National Building Code, 2005.
 - (k) Ramps shall be provided as per Clause 4.14, Part 4 of National Building Code, 2005.
 - (l) Fire Lift shall be provided as per Clause 4.15, Part 4 of National Building Code, 2005.
 - (m) Emergency and Escape Lighting shall be provided as per Clause 4.16, Part 4 of National Building Code, 2005.
 - (n) Illumination of Means of Exit shall be provided as per Clause 4.17, Part 4 of National Building Code, 2005.
 - (o) Fire Detection and Warning shall be provided as per Clause 4.18, Part 4 of National Building Code, 2005
- vii) **"SMOKE MANAGEMENT":** The following measures are to be provided to prevent the spread of smoke easily to the other floors, which may affect the life safety of the occupants particularly, the Cinema viewers;
- (A) For Types 1 to 3 constructions as given Clause 3.3 in the National Building Code (Part-IV), a doorway or opening in a separating wall on any floor shall be limited to 5.6m² in area with a maximum height/width of 2.75 m. Every wall opening shall be protected with fire-resisting doors having the fire rating of not less than 2 h in accordance with accepted standard [4(7)]. All openings in the floors shall be protected by vertical enclosures extending above and below such openings, the walls of such enclosures having a fire resistance of not less than 2 h and all openings therein being protected with a fire resisting assembly as specified in clause 3.4.8 & 3.4.9 of Part-4 of NBC.
 - (B) Openings in walls or floors which are necessary to be provided to allow passages of all building services like cables, electrical wirings, telephone cables, plumbing pipes, etc, shall be protected by enclosure in the form of ducts/shafts having a fire resistance not less than 2 h. The inspection door for electrical shafts/ducts shall not be less than 2 h and for other services shafts/ducts, the same shall have fire resistance not less than 1h. Medium and low voltage wiring running in shafts/ducts, shall either be armored type or run through metal conduits. Further, the space between the conduits pipes and the walls / slabs shall be filled in by a filter material having fire resistance rating of not less than 1 h as per clause 3.4.8.3 of Part-4 of National Building Code.
 - (C) Openings in separating walls and floors-Attention shall be paid to all such factors as will limit fire spread to these opening and maintain fire rating of the structural member. Every wall opening shall be protected with Fire resisting doors having fire rating of not less than two hours. All openings in the floors shall be protected by vertical enclosures extending above and below such openings, the wall of such enclosures having a fire resistance of not less than two hours and all openings therein being protected with a fire resisting assemble as per Clause 3.4.8, Part 4 of National Building Code of India, 2005.
 - (D) Every vertical opening between the floors shall be suitably enclosed or protected, as necessary to provide the following:
 - i) Reasonable safety to the occupants while using the means of egress by preventing spread of fire, smoke, or fumes through vertical openings from floor to floor to allow occupants to complete their use of the means of egress. Further it shall be ensured to provide a clear height of 2100 MM in the passage/escape path of the occupants.
 - ii) Limitation of damage to the building and its contents (Clause 3.4.8.4) Part -- 4 of National Building Code of India, 2005.

- (E) Where openings are permitted, they shall not exceed three-fourths the area of the wall in the case of an external wall and they shall be protected with fire resisting assemblies or enclosures having fire resistance equal to that of the wall or floor in which these are situated. Such assemblies and enclosures shall also be capable of preventing the spread of smoke or fumes through the openings so as to facilitate the safe evacuation from the building in case of fire.
- (F) (i) Air conditioning and ventilating systems shall be so installed and maintained as to minimize the danger of spread of fire, smoke or fumes from one floor to other or from outside to any occupied building or structure (Clause 3.4.11.1) Part 4 of National Building Code of India 2005.
 (ii) Air-conditioning and ventilating systems circulating air to more than one floor or fire area shall be provided with dampers designed to close automatically in case of fire and thereby preventing spread of fire or smoke and shall be in accordance with the accepted standard [4(10)]. Such a system shall also be provided with automatic controls to stop fans in case of fire, unless arranged to remove smoke from a fire, in which case these shall be designed to remain in operation
 (iii) Effective means for preventing circulation of smoke through the A C system in case of fire in air filters or from other sources drawn into the system, and shall have smoke sensitive devices for actuation in accordance with the accepted standards (Clause 3.4.11.3) Part 4 of National Building Code of India 2005.
 (iv) Separate air handling units for each floor shall be provided to avoid the hazards arising from spread of fire and smoke through air conditioning ducts (Clause 3.4.11.4) Part 4 of National Building Code of India 2005.
 (v) Fire Dampers shall be provided in the AC system in accordance with the accepted standards designed so as to close automatically in case of fire and thereby preventing spread of fire or smoke.
- (G) Pressurization of stair cases shall be done as per Clause 4.10, Part 4 of National Building Code of India 2005.
- (H) Provision of pressurized lift lobby with self-closing smoke stop doors of 2 hour Fire resistance, one in the lift lobbies of all the cellars.
- (I) Smoke venting facilities for safe use of exits shall be provided as per Clause 3.4.12, Part 4 of National Building Code of India 2005.
- (J) Basement ventilation shall comply to Clause C 1.6 of Annexure-C of Part 4 of National Building Code of India, 2005.

7.5. Parts of the Building requirements:

The parts of the Building requirements shall conform to National Building Code of India, 2005 with regard to:

A. MATERIALS: Flame retardant material only should be made use for interior decoration and upholstery to prevent generation of toxic smoke/flames. The surface interior finishes shall comply as per Clause 3.4.15, Part 4 of National Building Code of India 2005.

B. COMPARTMENTATION: (i) The Building shall be suitably compartmentalized so that Fire/Smoke remained confined to the area where Fire Incident has occurred and does not spread to the remaining part of the Building as per Clause C - 9, Annexure "C", Part 4 of National Building Code of India, 2005.

(ii) Fire doors with 2 hour fire resistance shall be provided at appropriate place along the escape route and particularly at the entrance to the lift lobby and stair well to prevent spread of fire and smoke as per Clause 4.2.9, Part 4 of National Building Code of India 2005.

(iii) In Multiplexes, large inter floor openings may be there, in which conventional compartmentation may be difficult. In such case, special compensative measures are required as per reputed Standards. (eg. NFPA, 1992).

C. FIRE LIFT: Fire lifts complying to clause C1.5 Q of Annexure-C of Part 4 of National Building Code of India 2005 shall be provided.

D. EMERGENCY LIGHTING: Illumination of means of exit in stair case and corridors shall comply with Clause C.1.14 of Annexure-C, Part 4 of National Building Code of India 2005.

E. FIRE OFFICER: Qualified Fire Officer with experience of not less than 3 years shall be appointed who will be available on the premises as per Clause C 6, Annexure-C, Part 4 of National Building Code of India 2005.

F. BUILDING EVACUATION SUPERVISOR: Appointment of Building Evacuation Supervisor as per Annexure "E", Part 4 of National Building Code of India, 2005 for conducting periodical Fire Drills and to ensure safe evacuation in case of any emergency.

7.6. Seating arrangements in theaters:

- i) The seating arrangements shall conform to the Exit facilities as per Clause 6.4.4, Part - 4 of National Building Code of India, 2005."
- ii) Notwithstanding (i) above, the distance between the screen and the first front row of seats shall not be less than the height of the screen or the top picture height of the screen.

7.7. Parking Requirements:

a) The parking requirements within the site shall be as follows:

Type of Building	Parking area to be provided as percentage of total built up area (inclusive of all internal aisles, driveways, stairs, etc.)	
	In Municipal Corporation area	In other areas
Multiplex complexes (inclusive of all activities areas)	60%	50%

b) The parking spaces may be provided in:

- i) basements or cellars or
- ii) on stilt floor or
- iii) In the open space over and above the minimum required set-backs (except the front set-back) to be left around the building with adequate vehicular access, aisle, drives, ramps required for maneuvering of vehicles.
- iv) Multi-level parking complex adjoining to the complex within the site may be considered provided that a minimum clear open space of 6m from the site boundary is ensured.

7.8. Landscaping and greenery:

- i) A minimum 2 m wide green planting strip in the periphery on all sides within the set-backs are required to be developed and maintained.
- ii) In addition to (i) above, an organized open space of at least 10% of total site area shall be maintained and utilized as greenery over and above the mandatory around set-backs. This could be part of the interior open space or be in one or more pockets.
- iii) The landscaping and greenery shall be undertaken as per the guidelines given in the National Building Code and subject to provision of hard and motorable leveled ground to facilitate operation of Hydraulic Platform.
- iv) Trees shall be planted within the periphery of the site at the rate of 1 tree per 100 sq.m of site area.

8. City / Area level impact fee payable:

In addition to the building permit fees and other charges payable, City / Area level impact fee shall be payable for heights of floors above 15m where the height of the building or block is more than 15m at the following rates:

Height	Rate in Rs. Per sq.m of Built up area		
	Metro areas (Hyderabad / Visakhapatnam / Vijayawada Mpl. Corps.)	Other Mpl. Corps.	Other Mpl. & Panchayat areas
Above 15 m and upto 24 m	1000	800	500
Above 24 m and upto 30 m	1500	1200	800
Above 30 m and upto 50 m	2000	1500	1000
Above 50 m	2500	2000	1500

- i) While calculating the Impact fee parking areas / blocks will be exempted.
- ii) The Impact fees so collected by the Building approving authority shall be maintained in a separate escrow account and utilized only for upgrading of infrastructure and services in the area concerned.
- iii) **Fire Precaution Fund:** A fee at the rate of Rs.10 per sq.m of built up area shall be payable towards Fire Precaution Fund to the Fire Services Department.

9. Building Permission to be obtained before commencement of construction:

After obtaining the provisional license and site clearance from the Licensing authority, the owner / applicant shall obtain necessary building permission from the Building approving authority as the case may be, before commencing the construction.

10. Occupancy Certificate to be obtained:

The final license shall be issued by the Licensing Authority only after the owner / applicant submits a final NOC from the Fire Service department and an Occupancy Certificate in the prescribed format from the Building Approving Authority.

For obtaining the Occupancy Certificate, the owner shall submit a notice of completion through the registered architect and licensed builder / developer along with prescribed documents and plans and Final NOC from the Fire Service Department to the Building Approving Authority. The Building Approving Authority on receipt of such notice of completion shall undertake inspection with regard to the following aspects:

- (a) Number of floors.
- (b) External set-backs
- (c) Parking space provision
- (d) Abutting road width,

and shall communicate the approval or refusal of the occupancy certificate within 15 days.

11. Maintenance & Management:

Such multiplex complexes shall be under the overall control and management of a single management body who shall be responsible for the public safety, maintenance and public convenience / amenities.

(A copy of this notification is available on the Internet and can be accessed with the address www.aponline.gov.in)

(BY ORDER AND IN THE NAME OF THE GOVERNOR OF ANDHRA PRADESH)

**S.P.SINGH,
PRINCIPAL SECRETARY TO GOVERNMENT**

**ANNEXURE – IV
(Rule-7.e)
GOVERNMENT OF ANDHRA PRADESH
ABSTRACT**

Municipal Administration & Urban Development Department – The Andhra Pradesh Fire Prevention and Safety Measures in High-rise Hospital Buildings (above 30m height) Rules, 2011 - Orders – Issued.

Municipal Administration & Urban Development (M1) Department

G.O.Ms.No.2

Dated: 03.01.2011

Read the following:

1. G.O.Ms.No.45 MA&UD (M1) Dept., Dated 04.02.2006
2. From the Director General Fire & Emergency Services Department, A.P. Hyderabad, Lr.No.2444/S2/2008, Dated 07.11.2008 & 03.03.2010.
3. G.O.Ms.No.244 MA&UD (M1) Dept., Dated 07.03.2009.
4. From Commissioner, GHMC Lr.No.218/AD/FPW/GHMC/ 2010 dt:30.06.2010.
5. Govt Lr.No. 803/M1/2007 dt: 21.08.2010
6. From Home (Pri.A2) Dept, U.O.No.13734/Pri.A/A2/2008-9, dt:18.11.2010

* * *

ORDER:

In the GO 1st read above, orders were issued constituting High Power Committee pursuant to the Hon'ble High Court orders dated 24.01.2006 in W.P.No.26365 of 2005 to go into all aspects of buildings constructed (Multistoried or otherwise) without obtaining No Objection Certificate from Fire Service Department in violation of statutory provisions and to make comprehensive suggestions for taking remedial steps for Fire Protection and Safety Measures in all such buildings.

2. The Director General of Fire & Emergency Services, A.P. Hyderabad in her letter 2nd read above has informed that according to Section 13 (2) of the Andhra Pradesh Fire service Act,1999 " the Director General or any member of the service duly authorized by him in this behalf, shall within sixty days of receipt of such application, on being satisfied about the provision of fire prevention and safety measures as stipulated in the National Building Code of India, as amended from time to time or any other law for the time being in force regulating such purpose or activity, shall issue a no objection certificate with such conditions as may be considered necessary and if not so satisfied, reject the same for reasons to be recorded in writing". She has further informed that " According to note 12, table 23 part 4 of National Building Code of India, 2005, buildings above 30 Mts height not to be permitted for Group "B" (Educational), Group "C" (Residential), Group "D" (Assembly) and Group "E" (Mercantile) Occupancies". She has also informed that so far, two applications are received for the issuance of NOC for construction of Hospital Buildings of above 30 mts and requested the Government to issue guidelines on par with multiplex guidelines for construction of hospitals at a height of more than 30 mts by Following international standards of design, construction and operational management.

3. In the High Power Committee meeting held on 06-03-2010, it was decided that the Commissioner, Greater Hyderabad Municipal Corporation, Hyderabad may engage a reputed consultant for preparation of guidelines for fire prevention and safety measures for the hospital buildings above 30 meters of height and place the report before the High Power Committee. Pursuant to the above, the Commissioner, Greater Hyderabad Municipal Corporation, Hyderabad has engaged the services of JNTUH and furnished the Draft Fire Safety Guidelines for High-rise Hospitals vide reference 4th read above.

4. After due deliberations and discussions, the High Power Committee has accepted the report of Fire Safety Guidelines for High-rise Hospital Buildings prepared by JNTU, Hyderabad along with additional fire safety measures suggested by the Director General, State Disaster Response and Fire Services, A.P., Hyderabad.

5. Government after careful examination of the matter and the recommendations of High Power Committee and the additional fire safety measures suggested by Director General, State Disaster Response and Fire Services, A.P., Hyderabad and also as recommended by Home Department, hereby approve the same and issue the following rules for Fire prevention and Safety Measures to be adopted in High-rise Hospital Buildings of above 30 mts height.

6. A copy of these rules (containing 40 pages) is available on the internet and can be accessed with the address www.aponline.gov.in

7. The following notification will be published in the Andhra Pradesh Gazette.

NOTIFICATION

In exercise of the powers conferred by Section 44(1) of the Andhra Pradesh Town Planning Act, 1920, Section 585 of the Greater Hyderabad Municipal Corporation Act, 1955, Section 326(1) of the Andhra Pradesh Municipalities Act, 1965, Section 58 of the Andhra Pradesh Urban Areas (Development) Act, 1975, Section 268 of the Andhra Pradesh Panchayat Raj Act, 1994, and Section 56 of the Hyderabad Metropolitan Development Act, 2008, the Government of Andhra Pradesh hereby make the following Rules for prevention of Fire and Safety measures in High-Rise Hospital Buildings.

Short title, Extent and commencement	1. (1) These rules may be called the Andhra Pradesh Fire Prevention and Safety Measures for High-rise Hospital Buildings Rules, 2011. (2) They shall be applicable in all Municipal Areas and Urban Development Areas and Hyderabad Metropolitan Development Area in the whole of the State of Andhra Pradesh. (3) They shall come into force on such date/dates as may be specified by the Government
Definitions	2. In these rules, unless the context otherwise requires, (a) 'Building' means a building intended for the use of a hospital of the height of above 30 meters ; (b) 'Municipal Laws' means,- (i) the Andhra Pradesh Town Planning Act, 1920. (ii) the Greater Hyderabad Municipal Corporation Act, 1955 in respect of GHMC (iii) the Visakhapatnam Municipal Corporation Act, 1979 in respect of the Visakhapatnam Municipal Corporation. (iv) the Vijayawada Municipal Corporation Act, 1981 in respect of Vijayawada Municipal Corporation. (v) The Andhra Pradesh Municipal corporation Act, 1994 in respect of the Municipal Corporations; (vi) the Andhra Pradesh Municipalities Act, 1965 in respect of the Municipalities; (vii) the Andhra Pradesh Urban Areas (Development) Act, 1975 ; (viii) the Andhra Pradesh Panchayata Raj Act, 1994 in respect of the Nagar Panchayats and (ix) The Hyderabad Metropolitan Development Authority Act, 2008 (Act 8 of 2008) (c) words used but not defined in the rules shall have the meaning assigned to in the Municipal Laws and the Andhra Pradesh Fire Services Act.
Application of Bye-Laws and Rules framed under the Municipal Laws	3. All Bye-laws made under the Municipal Corporation Laws and all Rules framed under the Andhra Pradesh Municipalities Act, 1965 , the Andhra Pradesh Town Planning Act, 1920, the Andhra Pradesh Urban Areas (Development) Act, 1975 and the Hyderabad Metropolitan Development Authority Act, 2008 shall mutatis mutandis apply subject to such variations as may be specified in these Rules: Provided that the said Rules or Bye Laws in so far as they are not inconsistent with these rules shall continue to be applicable as those Bye-Laws and Rules are as applicable to the Municipal Corporation or Municipalities or Urban Areas or Hyderabad Metropolitan Development Area as the case may be.
Annexure	4. The Annexure shall form part and parcel of these rules, which specify the requirements to be complied with by all persons for construction of Buildings.

ANNEXURE

1.0 OPEN SPACES

In order to facilitate firefighting operations and also prevent fire exposure to adjacent buildings, it is essential to have adequate open spaces around the building.

Open spaces around the building shall be as per section 8.2.3.1 Table 2, NBC part III

Height of the Building (in mtrs.)	Minimum open space on all sides (in mtrs.)
Above 30 m & up to 35 m	11
Above 35 m & up to 40 m	12
Above 40 m & up to 45 m	13
Above 45 m & up to 50 m	14
Above 50 m & up to 55 m	15
Above 55 m & up to 60 m	16

- a) The Maximum permissible height of Hospital Buildings shall be 60.00 meters
- b) *"The height of Ambulatory patients wards shall be minimum of 3.6 mts." And "The height of all critical patient and treatment areas like OT,s, ICU's, and other life threatening diseases shall be a minimum of 4.0 mts."
- c) No relaxation in the above mentioned open spaces in any case including road widening shall be allowed.
- d) Minimum 7 meters wide hard leveled motor able open to sky drive-way shall be provided around the building for the movement and operation of specialized fire vehicles e.g. Hydraulic Platform, Turn Table Ladder, etc.
- e) Abutting Road on any side shall not be considered as open space for this purpose.

2.0 FIRE-RESISTIVE REQUIREMENTS

2.1 EXTERIOR WALLS, COLUMNS AND BEAMS

Load bearing exterior walls shall be 3 hour fire resistance provided the building is protected with automatic sprinkler system.

Columns and beams shall be 3 hour fire resistance provided the building is protected with automatic sprinkler system.

Non-load bearing exterior walls shall be 2 hour fire resistance provided the building is protected with automatic sprinkler system.

Opening protection, where required, shall correspond to the rating of the exterior wall. The allowable maximum area of exterior wall openings shall be in accordance with IBC Table 704.8.

2.2 INTERIOR WALLS

Load bearing interior walls shall have minimum 3 hour fire resistance rating provided the building is protected with automatic sprinkler system. They shall be permitted to be reduced to 2 hour fire resistance rated based on compliance with the high-rise provisions in NFPA 5000, Section 33.1.3 as follows:

1. Exits are constructed as smoke proof enclosures;
2. Sprinkler control valves with supervisory initiating devices, and water flow initiating devices are provided on each floor; and
3. There are no areas that exceed the maximum allowable quantities per control area in accordance with NFPA 5000, Section 34.1.3.

Non-load bearing interior walls shall be permitted to have no fire resistance rating based solely on the specified construction type herein, provided the building is protected with an approved automatic sprinkler system. Interior walls shall be fire resistance rated where required by other provisions in this code.

2.2.1 Separation of Occupancies

Where separated use design is employed and distinct separated occupancies are provided, the health care part of the building shall be separated from other occupancies with 2 hour fire resistance rated barrier construction. Other occupancies shall be separated in accordance with NFPA 5000, Section 6.2.3 and 6.2.4.

2.2.2 Protection of Openings

Opening protection, where required, shall be fire resistance rated based on the rating of the wall assembly having the opening in accordance with NFPA 5000, Table 8.7.2, unless otherwise specified herein. Every opening in a fire barrier shall be protected to limit the spread of fire and restrict the movement of smoke from one side of the fire barrier to the other. The fire resistance rating for opening protectives in 2-hour rated fire barriers, smoke barriers and smoke partitions shall be a minimum of 1-1/2 hours.

2.2.3 Suites

Corridor walls shall be effective in limiting the transfer of smoke and shall be permitted to terminate at the ceiling where the ceiling is constructed to limit the transfer of smoke. The walls shall be 1 hour barrier fire resistance rated in buildings provided with full automatic sprinkler protection.

Sleeping Suites - The size limit on sleeping suites shall not exceed an area of 460 m².

Exception: The area shall be permitted not to exceed 700 m² when the following conditions are met:

- Direct visual supervision is provided from a normally attended location within the suite, and,
- The patient sleeping room is provided with a total coverage smoke detection system per NFPA 101 Sections 9.6.2.8 and 18.3.4

Non-Sleeping Suites – The size limit shall not exceed 930 m².

2.2.3.1 Doors

See section on Exit Corridors – Doors herein.

2.2.3.2 Miscellaneous Openings

In other than smoke compartments containing patient bedrooms, miscellaneous openings, such as mail slots, pharmacy pass-through windows, laboratory pass-through windows, and cashier pass-through windows, shall be permitted to be installed in vision panels or doors without special protection, provided that both of the following criteria are met:

- (1) The aggregate area of openings per room does not exceed 80 in.2 (0.05 m²).
- (2) The openings are installed at or below half the distance from the floor to the room ceiling.

2.2.3.3 Transfer Grilles

Transfer grilles are not permitted in walls or doors of suites, regardless of whether or not they are protected by fusible link-operated dampers.

Exception: Doors to toilet rooms, bathrooms, shower rooms, sink closets, and similar auxiliary spaces that do not contain flammable or combustible materials shall be permitted to have ventilating louvers or to be undercut.

2.2.4 Exit Access Corridors

2.2.4.1 Walls

Corridor walls shall form a barrier to limit the transfer of smoke and shall be permitted to terminate at the ceiling where the ceiling is constructed to limit the transfer of smoke. The walls shall be 1 hour fire rated provided the building is protected with automatic sprinkler system. The exceptions are as follows:

Exception No. 1: Such spaces may be unlimited in size and open to the corridor where the following are met:

- a) The spaces are not used for patient sleeping rooms, treatment rooms, or hazardous areas.
- b) The open space is protected by an electrically supervised, automatic smoke detection system, or the entire space is arranged and located to permit direct supervision by the facility staff from a nurses' station or similar space.

- c) The corridors onto which the spaces open in the same smoke compartment are protected by an electrically supervised, automatic smoke detection system, or the smoke compartment in which the space located is protected throughout by quick response sprinklers.
- d) The space does not obstruct access to required exits.

Exception No. 2: Waiting areas and similar spaces shall be permitted to open to corridors without opening protection provided the following are met:

- a) The aggregate waiting area in each smoke compartment does not exceed 55.7 m².
- b) Each area is protected by an electrically supervised, automatic smoke detection system, or each area is arranged and located to permit direct supervision by the facility staff from a nurses' station or similar space; and
- c) The area is arranged not to obstruct access to required exits.

Exception No. 3: This requirement shall not apply to spaces for nurses' stations.

Exception No. 4: Gift shops not exceeding 46.45 m² in area shall be permitted to open to a corridor or lobby without opening protectives, provided the building is protected throughout by an approved automatic sprinkler system.

2.2.4.2 Doors

Corridor doors in fully sprinklered buildings shall be 3/4-hour fire resistance rated with positive latching, and shall be effective in limiting the transfer of smoke. They shall comply with NFPA 101, Section 18.2.2.2. Roller latches shall not be permitted. Door closing devices shall not be required on doors in corridor wall openings other than those serving required exits, smoke barriers, enclosures of vertical openings, and hazardous areas.

2.2.4.3 Glazing

Vision panels consisting of fire rated glazing or wired glass panels in approved frames shall be fire rated in accordance with the provisions for opening protection and shall be smoke-tight. Glazing in fire rated assemblies shall also comply with NFPA 101, Section 8.3.3.

Fire window assemblies shall not be permitted in fire barriers having a fire resistance rating of 2 hours or greater (see NFPA 5000, Table 8.7.2).

2.2.4.4 Elevator Lobbies

Elevator lobbies shall be required on every floor and shall be enclosed by smoke partition walls having a minimum fire resistance rating of 1-hour.

Exception No. 1: Elevator lobbies are not required at the street floor protected with an automatic sprinkler system.

Exception No. 2: Elevator lobbies are not required where elevators are not required to be located in a shaft enclosure.

Exception No. 3: Enclosed elevator lobbies are not required where the elevator hoistway is pressurized.

2.2.4.5 Miscellaneous Openings

In other than smoke compartments containing patient bedrooms, miscellaneous openings, such as mail slots, pharmacy pass-through windows, laboratory pass-through windows, and cashier pass-through windows, shall be permitted to be installed in vision panels or doors without special protection, provided that both of the following criteria are met:

- (1) The aggregate area of openings per room does not exceed 80 in.² (0.05 m²).
- (2) The openings are installed at or below half the distance from the floor to the room ceiling.

2.2.4.6 Transfer Grilles

Transfer grilles are not permitted in walls or doors of corridors, regardless of whether or not they are protected by fusible link-operated dampers.

Exception: Doors to toilet rooms, bathrooms, shower rooms, sink closets, and similar auxiliary spaces that do not contain flammable or combustible materials shall be permitted to have ventilating louvers or to be undercut.

2.2.5 Smoke Partitions

2.2.5.1 Materials

The walls shall be constructed of materials as permitted by the building construction type.

2.2.5.2 Fire Resistance Rating

Unless otherwise required, smoke partitions shall have a minimum fire resistance rating of 1 hour and shall limit the transfer of smoke.

2.2.5.3 Continuity

Smoke partitions should extend from the floor to the underside of the floor or roof deck above, through any concealed spaces, such as those above suspended ceilings, and through interstitial structural and mechanical spaces. Other alternatives are provided in NFPA 101, Section 8.4.

2.2.5.4 Penetrations and Joints

Penetrations through a smoke partition shall be protected by a system or material that is capable of limiting the transfer of smoke and shall be fire resistance rated per NFPA 5000, Table 8.7.2 based on the rating of the penetrated assembly unless otherwise specified herein.

2.2.5.5 Ducts and Air Transfer Openings

Air-transfer openings in smoke partitions shall be provided with approved combination fire and smoke dampers designed and tested in accordance with the requirements of UL Standards 555 and 555S or ISO equivalent. Dampers shall limit the transfer of smoke and be fire resistance rated based on the rating of the wall assembly having the opening in accordance with NFPA 5000, Table 8.7.2, unless otherwise specified herein. Where the installation of dampers will interfere with the operation of a smoke control system, approved alternative protection shall be utilized.

2.2.5.6 Opening Protectives

Opening protectives for smoke partitions shall comply with NFPA 5000, Section 8.10.3. Doors shall be fire resistance rated based on the rating of the wall assembly having the opening in accordance with NFPA 5000, Table 8.7.2, unless otherwise specified herein. Doors shall limit the transfer of smoke and shall not include transfer grilles. Doors that are normally required to be kept closed shall be automatic-closing or self-closing per NFPA 5000, Section 11.2.1.8.1.

Fire window assemblies, where provided, shall have a minimum fire resistance rating of 20 minutes per Table 8.7.2.

2.2.6 Horizontal Exits

2.2.6.1 Walls

Fire barriers separating building areas between which there are horizontal exits shall have hour fire resistance rating and shall provide a separation that is continuous to ground.

Where a fire barrier provides a horizontal exit in any story of a building, such fire barrier shall not be required on other stories, provided that the following criteria are met:

- (1) The stories on which the fire barrier is omitted are separated from the story with the horizontal exit by construction having a fire resistance rating at least equal to that of the horizontal exit fire barrier.
- (2) Vertical openings between the story with the horizontal exit and the open fire area story are enclosed with construction having a fire resistance rating at least equal to that of the horizontal exit fire barrier.
- (3) All required exits, other than horizontal exits, discharge directly to the outside.

Where walls terminate at exterior walls at an angle of less than 180 degrees, the outside walls shall be 1-hour fire resistance rated with $\frac{3}{4}$ -hour opening protection for a distance of 3.05 m on each side of the intersecting wall.

2.2.6.2 Openings

Every opening in a fire barrier shall be protected to limit the spread of fire and restrict the movement of smoke from one side of the fire barrier to the other. Doors in horizontal exits shall be designed and installed to minimize air leakage in accordance with NFPA 105, Standard for the Installation of Smoke Door Assemblies.

The fire protection rating for opening protectives in horizontal exits (fire barriers), shall be 1-1/2 hours in accordance with Table 8.7.2, NFPA 5000. Fire window assemblies shall not be permitted in wall openings unless as part of the door assembly.

All fire doors in horizontal exits shall be self-closing or automatic-closing and shall have positive latching hardware. An approved vision panel shall be required in each horizontal exit door. Center mullions shall be prohibited.

2.2.7 Exit Passageways

2.2.7.1 Walls

An exit passageway that serves as a discharge from a stair enclosure for more than 3 stories shall have a fire resistance barrier rating of not less than 2-hours.

An exit passageway not serving as a stair discharge or serving stairs connecting 3 stories or less shall have an enclosure fire resistance barrier rating of not less than 1 hour.

2.2.7.2 Openings

The fire resistance ratings of opening protectives shall be as follows:

- 1-1/2-hour for 2-hour exit passageways; and $\frac{3}{4}$ -hour for 1-hour exit passageways.

Openings in exit passageways shall be limited to only those necessary to provide egress from normally occupied areas and those necessary for egress from passageways.

2.2.7.3 Penetrations

Penetrations into and openings through an exit enclosure assembly shall be prohibited except for the following:

- Electrical conduits serving the enclosure, required exit doors, ductwork and equipment necessary for independent stair pressurization, water and steam piping necessary for the heating or cooling of the exit enclosure, sprinkler piping, standpipes, fire alarm circuits that are protected in accordance with NFPA 101, Section 8.3.5.

Penetrations shall also be prohibited between adjacent exit enclosures.

2.2.8 Smoke Barriers

2.2.8.1 Walls

Smoke barrier walls shall be constructed per NFPA 101, Section 8.5 and shall have a minimum 1- hour fire-resistance rating.

Walls shall form an effective membrane continuous from outside wall to outside wall and from the top of the foundation or floor/ceiling assembly below to the underside of the floor or roof sheathing, deck or slab above, including continuity through concealed spaces, such as those found above suspended ceilings, and interstitial structural and mechanical spaces. The supporting construction should be protected to afford the required fire-resistive rating of the wall or floor supported.

Exception: Smoke barriers are not required in interstitial spaces where such spaces are designed and constructed with ceilings that provide resistance to the passage of fire and smoke equivalent to that provided by smoke barrier walls.

2.2.8.2 Opening Protectives

Smoke barrier doors shall have a minimum 45-minute fire rating. Fire window assemblies shall have a minimum fire resistance rating of 45 minutes per Table 8.7.2, NFPA 5000. Doors shall be automatic-closing or self-closing. Cross-corridor openings in the means of egress shall be protected by a pair of swinging doors or a horizontal sliding door per NFPA 101, Section 18.3.7.7. Corridor openings not in the means of egress shall be permitted to use single leaf doors.

Where, a pair of opposite swinging doors are installed, they shall be without a center mullion. Vision panels shall also be provided, as for horizontal sliding doors and vision panels shall consist of fire-rated glazing materials in approved frames, the area of which should not exceed that tested. The doors shall be close fitting within operational tolerances, and shall not have undercuts, louvers or grilles. The doors shall have head and jamb stops, astragals or rabbets at meeting edges and shall be automatic closing by smoke detection or self-closing. Positive latching devices shall not be required. Air leakage criteria and installation requirements shall be per NFPA 101, Section 8.5.2.

2.3 STRUCTURAL FRAME

The structural frame shall have 3 hour fire resistance rating.

2.4 FLOORS AND FLOOR-CEILINGS

Floor-Ceiling assemblies shall have a minimum 2 hour fire resistance rating.

2.4.1 Openings for Floor-Ceilings

Openings in floors shall comply with the requirements for vertical openings herein. Penetrations shall be protected in accordance with NFPA 5000, Section 8.8.

2.5 ROOFS AND ROOF-CEILINGS

Roof-Ceiling assemblies shall have a minimum 1-½ hour fire resistance rating. Roofing systems shall be permitted to include combustible supports, decking, or roofing in accordance with NFPA 101, Sections 18.1.6.5 and 18.1.6.6.

2.5.1 Openings for Roof-Ceilings

Openings in roof-ceiling assemblies shall be protected identically as openings for floor-ceiling assemblies herein. Skylights shall additionally be permitted per NFPA 5000, Section 8.2.2.3.3.

2.5.2 Roof Covering

The roof covering based on the type of construction specified herein, shall have a minimum classification of Class B per NFPA 5000 Table 38.2.2 and Chapter 38.

2.6 VERTICAL OPENINGS

2.6.1 Protection Requirements

Openings through floors shall be enclosed with 2-hour fire resistance rated barrier walls that shall be continuous from floor to floor, or floor to roof in accordance with NFPA 101, Section 8.6.

Exception No. 1: pneumatic tube conveyors protected in accordance with NFPA 101, 8.3.5.1.

Exception No. 2: atriums as permitted by NFPA 101, 8.6.7.

Exception No. 3: convenience openings protected in accordance with NFPA 101, 8.6.8.

Exception No. 4: escalators and moving walks protected in accordance with NFPA 101, 8.6.8.

Note: Unprotected openings in accordance with NFPA 101, Section 8.6.6, Communicating Space, shall not be permitted.

2.6.2 Shafts.

2.6.2.1 Enclosures

Shaft enclosures shall have minimum 2 hour fire resistance rating.

2.6.2.2 Extent of Enclosures

Shafts that do not extend to the bottom of the building or structure shall:

1. Be enclosed at the lowest or highest level of the shaft with construction of the same fire resistive rating as the lowest floor through which the shaft passes, but not less than the rating of the shaft enclosure, or,
2. Terminate in a room having a use related to the purpose of the shaft. The room shall be separated from the rest of the building by a fire barrier having a fire-resistance rating and opening protection at least equal to the protection required for the shaft enclosure, or,
3. Be protected by approved fire dampers installed in accordance with their listings at the lowest or highest floor level of the shaft, as applicable.

2.6.2.3 Opening Protection

Opening protection (doors) for 2-hour rated enclosures shall have a 1½ hour fire resistance rating and shall be self-closing or automatic - closing and positive latching. Openings shall be limited to only those that are necessary for the purpose of the shaft. Fire window assemblies are not permitted in interior walls of shafts.

2.6.2.4 Stair Penetrations

Penetrations into and openings through an exit enclosure assembly shall be prohibited except for the following:

- Electrical conduits, required exit doors, ductwork and equipment necessary for independent stair pressurization, water and steam piping necessary for the heating or cooling of the exit enclosure, sprinkler piping, standpipes

Penetrations shall also be prohibited between adjacent exit enclosures.

2.6.2.5 Refuse and Laundry Chutes

2.6.2.5.1 Access Rooms

Access openings for refuse and laundry chutes shall be located in rooms or compartments enclosed by a fire barrier that has a fire-resistance rating of not less than 1 hour. Openings into the access rooms shall be protected by opening protectives having a fire protection rating of not less than ¾ hour. Doors shall be self- or automatic-closing upon the detection of smoke in accordance with IBC Section 715.4.7.3.

2.6.2.5.2 Termination Rooms

Refuse and laundry chutes shall discharge into an enclosed room separated from the remainder of the building by a fire barrier that has a fire-resistance rating of not less than 1 hour. Openings into the termination room shall be protected by opening protectives having a fire protection rating of not less than ¾ hour. Doors shall be self- or automatic closing upon the detection of smoke in accordance with IBC Section 715.4.7.3.

2.7 PENETRATIONS

Penetrations of fire resistance rated or smoke resistant construction shall be protected as follows.

2.7.1 Fire Rated Assemblies

Fire stop systems and devices protecting through-penetrations and membrane-penetrations of fire resistance rated walls and horizontal assemblies shall be protected in accordance with NFPA 101, Section 8.3.5.

Where required per NFPA 5000, Section 8.8.8, fire dampers shall have minimum damper ratings as follows:

- 3 hours for fire resistance rated assemblies of 3 hours or greater
- 1-1/2 hours for fire resistance rated assemblies of less than 3 hours.

Fire dampers shall also comply with NFPA 101, Section 8.3.5 for penetrations.

2.7.2 Smoke Resistant Assemblies

Penetrations passing through smoke barrier or smoke partition assemblies shall be protected by a system or material capable of restricting the transfer of smoke per NFPA 101, Section 8.5.6.

Where a smoke resistant assembly is also constructed to have a fire resistance rating, penetrations shall also comply with the requirements in NFPA 101, Section 8.3.5 for purposes of limiting the spread of fire for a time period equal to the fire resistance rating of the assembly.

Where smoke dampers are provided, they shall be designed and tested in accordance with the requirements of UL 555S, Standard for Smoke Dampers. Where combination fire/smoke dampers are required, they shall be designed and tested in accordance with the requirements of UL 555, Standard for Fire Dampers.

3.0 SPECIAL HAZARDS

3.1 SEPARATION REQUIREMENTS

The following special hazard rooms and spaces shall be separated from the remainder of the building as follows.

3.1.1 Transformer Location

The location of different types of transformers, the required enclosure construction and enclosure fire-rating shall conform to Part B of Article 450 and Section 450-41 of NEC.

3.1.2 Rooms containing combustion engine or gas, turbines, emergency generator room

The enclosing construction of these rooms shall have a minimum 2-hour barrier fire resistance rating.

3.1.3 Boiler and Fuel-fired Heaters

The Boiler and fuel-fired heaters housing / room shall have a minimum 2-hour barrier fire resistance rating where the largest piece of equipment is over 15 psi and 10 HP.

3.1.4 Gift Shops

Gift shops not exceeding 46.45 m² in area shall be permitted to open onto a corridor or lobby without opening protective's, provided the building is protected throughout by an automatic sprinkler system.

3.1.5 Waste and Linen Rooms

Waste and linen rooms shall have a minimum 2-hour barrier fire resistance rating.

3.1.6. Storage Rooms and Laundries Greater than 9.29 m2

Storage rooms and laundries greater than 9.29 m2 shall have a minimum 2-hour barrier fire resistance rating.

3.1.7 Plant Maintenance Shops

Plant maintenance shops shall have a minimum 2-hour barrier fire resistance rating.

3.1.8 Trash Collection Rooms

Trash collection rooms shall have a minimum 2-hour barrier fire resistance rating.

3.1.9 Laboratories Using Hazardous Materials Considered a Severe Hazard

Laboratories using hazardous materials considered a severe hazard shall have a minimum 2-hour barrier fire resistance rating.

3.1.10 Paint Shops

Paint shops shall have a minimum 2-hour barrier fire resistance rating.

3.1.11 Vocational Shops Not Classified as Group H

Vocational shops not classified as Group H shall have a minimum of 1-hour barrier fire resistance rated construction.

3.1.12 Kitchens

Kitchens shall have a minimum 2-hour barrier fire resistance rating. Separate exhaust ducting for all kitchens/Cafeteria in the building shall be provided to discharge the smoke and hot gases outside the building. Kitchen and cafeteria/ dining shall not be located in basement. They shall be located at Ground, first or second floor.

3.1.13 Boiler Rooms

Provision of boiler and boiler room (if applicable) shall conform to Indian Boiler Act. The boilers shall be installed in a fire resistant room of 2-hours fire rating. Catch pits shall be provided at the low level. The boiler room shall be provided with fresh air inlets and smoke exhausts directly to atmosphere.

3.1.14 Medical Gas Storage Areas

Medical gas storage areas shall have a minimum 2-hour barrier fire resistance rating

3.1.15 Anesthetizing Locations

These storage areas are considered as hazardous and protected in accordance with Annex E of NFPA 99.

3.2 LOCATION OF CRITICAL SERVICES:

All critical services such as Operation theatres, ICU, ICCU etc. shall be located at lower floors in the Ground to 4th floor only

4.0 INTERIOR FINISHES**4.1 WALLS AND CEILINGS****4.1.1 Minimum Flame Spread**

The reduction in flame spread classification as indicated below shall be permitted where the building is fully sprinkler protected in accordance with NFPA 13. The occupancy group (Annexure-I) and minimum flame spread classification requirement are given below:

Group I-2 Occupancy (Health care)

- | | |
|------------------------------------|------------------|
| a. Exit enclosures and passageways | Class B minimum. |
| b. Corridors | Class B minimum |
| c. Rooms and spaces | Class B minimum |

Group A occupancies (Assembly)

- | | |
|------------------------------------|------------------|
| d. Exit enclosures and passageways | Class B minimum. |
| e. Corridors. | Class B minimum |
| f. Rooms and spaces. | Class C minimum |

Group B occupancies (Business)

- | | |
|------------------------------------|------------------|
| g. Exit enclosures and passageways | Class B minimum. |
| h. Corridors. | Class C minimum |
| i. Rooms and spaces. | Class C minimum |

Group S-1 occupancies (Storage)

- | | |
|------------------------------------|------------------|
| j. Exit enclosures and passageways | Class C minimum. |
| k. Corridors | Class C minimum |
| l. Rooms and spaces. | Class C minimum |

4.1.2 Textile Materials Applied to Walls and Ceilings

Class A, only permitted in rooms and areas protected throughout by an approved sprinkler system.

4.1.3 Special Insulation Requirements

Cellular or foamed plastic materials shall not be used as interior wall or ceiling finish unless specifically permitted by NFPA 101, Section 10.2.4.3.1 or 10.2.4.3.2.

5.0 MEANS OF EGRESS

5.1 GENERAL

All components of egress shall be in accordance with NFPA 101, Chapter 7 unless modified herein or by NFPA 101, Section 18.2.

5.1.1 Occupant Load Factors

The occupant load factors (square meter per person) provided in Annexure II shall be used for purposes of determining the required number of exits and exit capacity for rooms, floors, areas, and buildings.

5.1.2 Number of Exits

- a. There shall be a minimum of 2 exits per floor and 2 exits from each smoke compartment. Not less than one exit shall be one of the following:
 - i. Door leading directly outside the building
 - ii. Stair
 - iii. Smoke proof enclosure
 - iv. Ramp
 - v. Exit passageway
- b. Not less than 2 exits shall be provided from each smoke compartment. Egress shall be permitted through an adjacent compartment or compartments, but only if it shall not involve the return through the compartment of fire origin.
- c. The general guideline for the number of required exits from various spaces described by functional use is given below

Occupancy	Number of Exits
i) Hospital	Sleeping Rooms or Suites – Two exit access doors shall be required from any patient sleeping rooms or suites over 93 m ² . Non-Sleeping Rooms or Suites – Two exit access doors are required for rooms or suites exceeding 230 m ² .
ii) Assembly	At least 2 exits required.
iii) Office	At least 2 exits are required in rooms or spaces exceeding an occupant count of 49, or exceeding a common path of travel of 30 m. Other variations may apply per NFPA 101, Section 38.2.4.
iv) Kitchen	At least 2 exits are required in rooms or spaces exceeding an occupant count of 29, or exceeding a common path of travel of 30 m. Other variations may apply per NFPA 101, Section 42.2.4.
v) Mechanical	At least 2 exits are required in rooms or spaces exceeding an occupant count of 29, or exceeding a common path of travel of 30 m. Other variations may apply per NFPA 101, Section 42.2.4.
vi) Outpatient	At least 2 exits required for any room exceeding 232 m ² .
vii) Retail	Retail At least 2 exits are required in rooms or spaces exceeding an occupant count of 49, or exceeding a common path of travel of 30 m. Other variations may apply per NFPA 101, Section 36.2.4.

- d. A minimum 3 exit staircases shall be provided where the calculated occupant load on a floor is greater than 500 and does not exceed 1,000 persons.
- e. Minimum 4 Exit staircases shall be provided where the calculated occupant load on a floor exceeds 1,000 persons.

5.1.3 * Omitted

5.1.4 * Omitted

5.1.5 Guard Rails

Where the elevation along open sides of a means of egress is more than 760 mm above the adjacent grade level below, guards shall be provided in accordance with NFPA 101, Section 7.2.2.4.

5.1.6 Impediments to Egress

Devices installed to restrict or impede the use of a means of egress under normal conditions shall be designed and installed such that they will provide free and clear access to the means of egress under emergency conditions unless otherwise specified in the special locking arrangement provisions of 7.2.1.6 and Chapter 18 of NFPA 101.

5.1.7 Obstructions to Egress

Means of egress shall be maintained free of all obstructions or impediments at all times in the case of fire or other emergency.

5.2 ARRANGEMENT AND EXIT ACCESS

The exit access i.e. the portion of egress system that leads from any occupied portion of a building or structure to an exit shall comply with the following requirements.

5.2.1 Corridor Access

- a. Every habitable room shall have an exit access door leading directly to an exit access corridor unless otherwise specified herein and NFPA 101, Section 18.2.5.5.1.
Exception: Rooms with exit doors opening directly to the outside at ground level per NFPA 101, Section 18.2.5.5.3
- b. Sleeping suites and non-sleeping suites shall have a minimum of one means of egress be directly to a corridor. Where suites are required to have two means of egress, the second one shall be permitted through another suite, provided that the separation between the suites complies with the corridor separation requirements herein (NFPA 101, Sections 18.3.6.2 through 18.3.6.5).

5.2.2 Remoteness of Exits or Exit Access Doorways

When two means of egress are required, exits or exit access doorways shall be separated by a minimum of one-third the maximum diagonal of a space or building in a sprinklered building.

When three or more means of egress are required, two exits or exit access doorways shall meet the requirements above and the additional exits shall be arranged a reasonable distance apart, so that if one becomes blocked the others will remain available.

5.2.3 Maximum Allowable Exit Access Travel Distances

The maximum travel distance of 45.0 meters is only allowed according to clause 4.5 Table (22) Part (4) of NBC, 2005

a.	Sleeping Rooms – From any point in a health care sleeping room and an exit access door	15.24 m
b.	Sleeping Suites – From any point in a health care sleeping suite to an exit access door	30.48 m. without having to pass through more than one intervening room
c.	Non-Sleeping Suites – From any point in a health care non-sleeping suite to an exit access door	30.48 m where the suite is arranged with one intervening room 15.24 m where the suite is arranged with two intervening rooms
d.	From any room door required as an exit access door to a required exit	Within healthcare areas 45 m.
e.	From any point within a room to an exit	
f.	Group I-2 occupancy (includes Child Care)	45m
g.	Laboratories classified as Group H Occupancies	22.86 m. (H-1), 30.48 m. (H-2), 45 m. (H-3), 45 m (H-4) and 45 m. (H-5). (Classification as per IBC 2006 Section 307)
h.	Health Care	45 m.
i.	Business	45 m.
j.	Assembly	45 m. when protected throughout by an approved, supervised automatic sprinkler system.
k.	Storage	45 m
l.	Outpatient	45 m
m.	Common Path of Travel	
n.	Business	22.86 m
o.	Assembly	Permitted the first 6.10 m. from any point where serving any number of occupants and for the first 22.86 m. from any point where serving not more than 50 occupants.
p.	Storage	30.48

5.2.4 Travel through Intervening Rooms

Exiting from any portion of the building shall be directly to an exit or a corridor.

Exceptions:

- a. Access to exits shall be permitted to occur through foyers, lobbies and reception rooms when constructed as required for corridors (IBC 1017.5)..
- b. Access from rooms or spaces shall be permitted to be through adjoining or intervening rooms, provided that such adjoining rooms are accessory to the areas served and are of less or equal hazard, or as permitted herein for Suites in the section on Maximum Allowable Travel Distances.
- c. Patient sleeping rooms shall be permitted to have one intervening room if the intervening room is not used as an exit access for more than eight patient beds.
- d. Special nursing suites shall be permitted to have one intervening room where the arrangement allows for direct and constant visual supervision by nursing personnel.
- e. For rooms other than patient sleeping rooms located within a suite, exit access travel from within the suite shall be permitted through one intervening room where the travel distance to the exit access door is not greater than 30.48 m.
- f. For rooms other than patient sleeping rooms located within a suite, exit access travel from within the suite shall be permitted through two intervening rooms where the travel distance to the exit access door is not greater than 15.24 m.

5.2.5 Exit Access Components Corridors

i.	Width	
	1. In patient areas for bed movement	Minimum of 2.44 m
	2. Other than patient area	Minimum of 1.12 m
	3. Reduction in width	Doors in fully opened position and handrails must not reduce the required width by less than 0.18 m. Doors in any position must not reduce width by more than one-half. Projections into the clear width shall not exceed 0.11 m at or below the handrail height.
ii.	Dead Ends	Maximum of 9.14 m
iii.	Separation Requirements	See 2.2.3 Suites, and 2.2.4 Exit Corridors herein.
		Doors compliant with NFPA 101, Section 7.2.1 shall be permitted
i.	Clear width - minimum	
	Serving 1-2 portions used for movement of beds	2.0 m
	Other doors	1.2 m.
ii.	Width - maximum	2.0 m. max door leaf.
	1. Means of egress	Swing in the direction of exit travel when serving an occupant load of 50 or more.
	2. Roller latched doors	Not permitted.
iii.	In smoke barrier cross-corridor openings in the means of egress	45-minute fire resistance rated, smoke- and draft control doors shall be opposite swinging when installed across corridors with egress in both directions. Additionally these doors shall comply with the following:
		Have no center mullion.
		Have vision panels.
		Be closefitting and should be without undercuts, louvers or grilles.
		Have stops at the heads and jambs, and rabbet and astragals at the meeting edges.
		Be automatic closing by smoke detection. Positive latching devices are not required.
iv.	Other special doors	Special doors, such as revolving doors or sliding doors, may be used as egress doors per NFPA 101, Section 18.2.2.9.
v.	Panic hardware	Each door in a means of egress from a Group A having an occupant load of 50 or more and any Group H occupancy should not be provided with a latch or lock unless it is panic hardware or fire exit hardware.
vi.	Locking	Patient sleeping room doors shall not be permitted to be locked except as permitted by NFPA 101, Section 18.2.2.2.
		Doors within the required means of egress shall not be equipped with a latch or lock requiring a tool or key from the egress side except as permitted by NFPA 101, Section 18.2.2.4.
		Doors within the required means of egress that are permitted by exception to be locked shall have provisions made for the rapid unlocking of the locks or locking devices per NFPA 101, Section 18.2.2.5.
		Doors in an exit passageway, stairway enclosure, horizontal exit, smoke barrier, or hazardous area enclosure (except boiler rooms, heater rooms, and mechanical equipment rooms) shall be permitted to be held open only by an automatic release device that complies with NFPA 101, 7.2.1.8.2. The doors shall release upon an alarm signal from the fire alarm system.
		Where egress doors are used in pairs, approved automatic flush bolts may be used, provided that the door leaf having the automatic flush bolts has no doorknob from the inside or surface-mounted hardware. (IBC 1008.1.8.3)
		Manually operated flush bolts or surface bolts are only allowed where a pair of doors serves a storage or equipment room. In these cases, the manually operated edge- or surface-mounted bolts are permitted on the inactive leaf. (IBC 1008.1.8.3)

5.3 THE EXIT

Permissible exits shall be as follows:

- Doors leading directly to the outside of the building.
- Stairs
- Smoke proof Enclosures.
- Ramps
- Exit Passageways.
- Horizontal Exits.

5.3.1 Exit Width and Capacity

For exit stairways, a factor of 7.6 mm per occupant shall be applied. For other exit components, a factor of 5.0 mm per occupant shall be applied.

5.3.2 Stairs

Stairs shall comply with NFPA 101, Section 7.2.2 unless otherwise modified herein.

a.	Stair width	Minimum stair width shall be 2.0 m. clear width.
----	-------------	--

b.	Permissible projections	Shall not exceed 0.11 m. at or below the handrail height. Not limited above the headroom height required.
c.	Steps	
	Riser height	Minimum of 0.1 m; Maximum of 0.18 m
	Minimum tread	Minimum of 0.28 m
d.	Stair landing	Dimension in the direction of travel equal to the stair width
e.	Handrails	Required on both sides.
	Continuity	Shall be continuous, without interruption by newel posts or other obstructions for the full length of each flight of stairs.
	Height	Handrails shall be not less than 865 mm, and not more than 965 mm above the surface of the tread, measured vertically to the top of the rail from the leading edge of the tread.
f.	Roof access	In building four or more stories in height, one stair shall provide access to the roof.
g.	Stairway identification	Shall be provided per NFPA 101, Section 7.3.3.5.4.
h.	Variation of riser height	The variation of riser height for a flight of stairs shall not exceed 9.5 mm.
i.	Distance between landings	The vertical distances between landings as measured between the horizontal planes of adjacent landings shall not exceed 3.66 m.
j.	Exterior exit stairways	Not permitted as a required means of egress per IBC 1023.2 for Group I-2 occupancies or for any occupancies in high-rise buildings.
k.	Enclosures	Stair enclosures shall have minimum 2 hour barrier fire resistance rating. See Section 2.6.2 on Shafts herein.
l.	Openings	See protection of openings in Section 2.6.2.3 herein.
m.	Stairway marking	Stairway marking shall be in accordance with NFPA 101, Section 7.2.2.5.4.
n.	Stairway door locking	Stairway doors other than the exit discharge doors shall be permitted to be locked from stairway side. Stairway doors that are locked from the stairway side shall be capable of being unlocked simultaneously without unlatching upon a signal from the fire command center
o.	Stairway re-entry access	Re-entry access for health care occupancies shall be provided per NFPA 101 Section 7.2.1.5.7.

5.3.3 Smoke proof Exit Enclosures

Smoke proof enclosures shall comply with NFPA 101, Section 7.2.3 unless otherwise modified herein. Every required stairway serving floors more than 22.86 m. above the lowest level of fire department vehicle access shall comply with the provisions for smoke proof enclosures In accordance with NFPA 101: 7.2.3.

5.3.3.1 Enclosure

A smoke proof enclosure shall be enclosed from the highest point to the lowest point and shall be separated from the remainder of the building by not less than 2-hour fire barriers. Access to the stairway shall be by way of a vestibule. The vestibule shall be within the 2-hour rated enclosure and shall be considered part of the smoke proof enclosure. The smoke proof enclosure shall be without openings other than the required means of egress doors. Exception: When a stair pressurization system is used, a stair entrance vestibule is not required.

5.3.3.2 Vestibule

Access to the stairway shall be by way of a vestibule. The vestibule shall be within the 2-hour rated enclosure and shall be considered part of the smoke proof enclosure. The door opening into the vestibule shall be protected with an approved fire door assembly having a minimum 1 ½-hour fire protection rating. The door from the vestibule into the stairway shall have a minimum 20-minute fire protection rating. Doors shall be self-closing or shall be automatic-closing by actuation of a smoke detector located within 3.05 m of the vestibule entrance door.

5.3.3.3 Discharge

Every smoke proof enclosure shall discharge into a public way, into a yard or court having direct access to a public way, or into an exit passageway. Such exit passageways shall be without openings, other than the entrance to the smoke proof enclosure and the door opening to the outside yard, court, or public way. The exit passageway shall be separated from the remainder of the building by a 2-hour fire resistance rating.

5.3.3.4 Stair Pressurization Alternative

When a stair pressurization system is used, a stair entrance vestibule is not required. Smoke proof enclosures using stair pressurization shall use an approved engineered system with a design pressure difference across the barrier of not less than 12.5 N/m², and shall be capable of maintaining these pressure differences under likely conditions of stack effect or wind. The pressure difference across doors shall not exceed that which allows the door to begin to be opened by a force of 133 N.

5.3.3.5 System Activation

The activation of the stair pressurization system shall be initiated by smoke detectors installed at each floor level in an approved location within 3.05 m. of the entrance to the smoke proof enclosure. When the closing device for the stair shaft is activated by smoke detection or power failure, the mechanical equipment shall activate and operate at the required performance levels. The required mechanical systems shall operate upon the activation of the smoke detectors specified above and by manual controls accessible to the fire department. The required system shall also be initiated by the following, if provided:

1. Water flow signal from a complete automatic sprinkler system
2. General evacuation alarm signal

5.3.4 * The protected Elevators for Egress shall be provided in following manner:-

- a. Increase of Fire lifts (bed lifts) shall be calculated on a scale instead of 1200 sq.mts area it will be on one lift per 800 sq.mts of floor area each floor.
- b. Increase of Fire safe Enclosures with fire doors.
- c. Smoke partitions design by fire expert and Director General of Fire Services from one block to another block.
- d. Compartmentation shall be provided as per approved
- e. Minimum one Horizontal Exits shall be provided on every floor.
- f. There shall be 4 four vertical stair cases (BS 5588) available on all floors with width prescribed in National Building Code.
- g. There shall be minimum of 3 power backup in the Hospital one exclusively for building, second exclusively for all the lifts and third for all the emergency systems including the emergency lifts.”

5.3.5 Exit Passageways

- Exit passageways shall comply with NFPA 101, Section 7.2.6 unless otherwise modified herein.
- Separation of exit passageways from the rest of the building shall be by construction having a minimum barrier fire resistance rating of not less than 2-hours.
Exception: Where the exit connects three stories or less, the separation shall have a barrier fire resistance rating of not less than 1-hour.
- Fire windows shall be permitted in openings per NFPA 101, Section 7.2.6.2.
- Exit passageways that discharge from stair enclosures shall have fire resistance ratings and protection of openings not less than those required of the stair enclosure (also see Section 2.2.7 herein).
- The width of an exit passageway shall be adequate to accommodate the aggregate required capacity of all exits that discharge through it.
Exception: the capacity shall not be required to be aggregated where an exit passageway additionally serves occupants on the level of exit discharge.
- The floor of an exit passageway shall be solid and without perforations.

5.3.6 Horizontal Exits

Horizontal exits shall comply with NFPA 101, Section 7.2.4 unless otherwise modified herein or by NFPA 101, Section 18.2.2.5.

Accumulation space shall be provided on each side of the horizontal exit as follows:

- Not less than 2.8 (net) sq m per patient in a hospital or nursing home, or not less than 1.4 (net) sq m per resident in a limited care facility, shall be provided within the aggregated area consisting of corridors, patient rooms, treatment rooms, lounge or dining areas, and other similar areas
- On stories not housing bed or litter borne patients, not less than 0.56 (net) sq m per occupant shall be provided for the total number of occupants in adjoining compartments.

Horizontal exits shall be permitted for substitution of other exits to the extent that the total exit capacity shall not be reduced by more than 1/3 for healthcare or more than 50 percent for other occupancies

A single door shall be permitted across a corridor of a horizontal exit if all of the following conditions are met:

- The exit serves one direction only.
- Such door is a swinging door or a horizontal-sliding door complying with 7.2.1.14.
- The door is not less than 41 1/2 in. (1055 mm) in clear width.

Horizontal exits serving as a means of egress from both sides shall be permitted to be protected by a pair of swinging doors that swing in opposite directions from each other and each having a clear width as follows:

- Not less than 1055 mm for corridor widths of 2440 mm or greater, and,
- Not less than 810 mm for corridor widths of 1830 mm but less than 2440 mm..

Exception: Openings shall be permitted to be protected by horizontal sliding doors complying with NFPA 101 Section 7.2.1.14 that provide clear widths as follows:

- Not less than 2110 mm for corridor widths of 2440 mm or greater, and,
- Not less than 1625 mm for corridor widths of 1830 mm but less than 2440 mm

5.4 THE EXIT DISCHARGE

Exit discharge shall comply with NFPA 101, Section 7.7 unless otherwise modified herein.

5.4.1 Termination

Exits shall be permitted to terminate at the following:

- directly at a public way, exterior exit discharge, yard, court, open space, or other portions of the exit discharge that are of adequate width and size to provide occupants with a safe and unobstructed access to a public way,
- to an interior exit discharge in accordance with NFPA 101, Section 7.7.2,
- to a rooftop exit discharge in accordance with NFPA 101, Section 7.7.6, or,
- to a vestibule or foyer in accordance with NFPA 101, Section 7.7.2.5

5.4.2 Discharge inside of a building through the level of exit discharge

Not more than 50 percent of the required number of exits, and not more than 50 percent of the required egress capacity shall discharge through areas on the level of exit discharge. The discharge shall lead to a free and unobstructed way to the exterior of the building, and such way shall be readily visible and identifiable from the point of discharge from the exit.

The area on the level of discharge shall be separated from areas below by construction having a fire resistance rating not less than that required for the exit enclosure.

Exception: The separation shall not be required where the levels below are part of an atrium with the level of discharge and the atrium is protected in accordance with NFP Section 8.6.7.

5.4.3 Marking of Exit Discharge

Stairs shall be arranged and the exit discharge marked to make clear the direction of egress to a public way. Stairs that continue more than one-half story beyond the level of exit discharge shall be interrupted at the level of exit discharge by partitions, doors, or other effective means.

5.4.4 Exit Courts

The width shall not be less than 1.12 m. The required width shall be unobstructed to a minimum height of 2.13 m. An exit court serving an occupant load of 10 or more and less than 3.05 m. in width shall have court walls of 1-hour fire-resistive construction for a distance 3.05 m. above the floor of the court and openings protected by fixed or self closing assemblies having a 3/4 -hour fire-protection rating.

5.5 ACCESSIBLE MEANS OF EGRESS

Accessible means of egress shall comply with the IBC as follows:

1.	Where Required	Accessible spaces shall be provided with not less than one accessible means of egress. Where more than one means of egress is required from any accessible space, each accessible portion of the space shall be served by accessible means of egress in at least the same number as the minimum required number of exits. In addition, the means of egress which provides access to or egress from, buildings for persons with disabilities, shall also comply with the requirements.
	Exceptions:	<ol style="list-style-type: none"> 1. Not required in alterations to existing buildings. 2. One accessible means of egress is required from an accessible mezzanine.
2.	Continuity and components	<p>Shall be continuous to a public way and shall consist of one or more of the following components:</p> <ol style="list-style-type: none"> 1. Accessible routes. 2. Stairways with vertical exit enclosures. 3. Exterior exit stairways (not permitted in a Group I-2 occupancy). 4. Elevators. 5. Platform lifts. 6. Horizontal exits. 7. Ramps (exterior ramps not permitted for hospitals or high-rise buildings). 8. Areas of refuge.
	Exceptions:	<ol style="list-style-type: none"> 1. Where the exit discharge is not accessible, an exterior area of assisted rescue shall be provided. 2. Where the exit stairway is open to the exterior, the accessible means of egress shall include either an area of refuge or an exterior area for assisted rescue.
3.	Elevators	<p>One accessible means of egress shall be provided by an elevator in buildings where a required accessible floor is four or more stories above or below a level of exit discharge.</p> <p>In order to be considered part of an accessible means of egress, an elevator shall comply with the emergency operational and signaling device requirements of Section 2.227 of ASME A17.1. Standby power shall be provided and the elevator shall be accessed from either an area of refuge or a horizontal exit.</p>
4.	Exit Stairways	In order to be considered part of an accessible means of egress, an exit stairway shall have a clear width of not less than 1.22m between handrails and shall either incorporate an area of refuge within an enlarged floor-level landing or shall be accessed from either an area of refuge or a horizontal exit.
5.	Platform Lifts	Shall not be part of an accessible means of egress except where allowed as part of a required accessible route in IBC Section 1109.7. Standby power shall be provided and the lift should not be enclosed.
6.	Areas of Refuge	Shall be accessible from the space it serves by an accessible means of egress. Every required area of refuge shall have direct access to an enclosed stairway or an elevator. Where an elevator lobby is used as an area of refuge, the shaft and lobby shall be a smoke proof enclosure except where the elevators are in an area of refuge formed by a horizontal exit or smoke barrier.
a.	Size	Sized to accommodate a wheelchair space of not less than 30 inches by 48 inches for each 200 occupants or portion thereof, based on the occupant load of the area of refuge and areas served by the area of refuge. The wheelchair space shall not reduce the required means of egress width. Access to any of the required wheelchair spaces in an area of refuge shall not be obstructed by more than one adjoining wheelchair space.

b.	Separation	Each area of refuge shall be separated from the remainder of the story by a smoke barrier or a horizontal exit except those located within vertical exit enclosures.
c.	Two-way communication	Shall be provided between area of refuge and the central control point. If the central control point is not constantly attended, the area of refuge shall have access to a public telephone system. The two-way communication system shall include both audible and visible signals.
d.	Instructions	Shall be posted adjoining the two-way communication system.
e.	Identification	Each door providing access to an area of refuge shall be provided with a sign stating "Area of Refuge" and the International Symbol of Accessibility.
7.		At exits and elevators serving as a required accessible space but not providing an approved accessible means of egress, signage shall be installed indicating the location of accessible means of egress.
8	Exterior area for Assisted Rescue	Shall be open to the outside air and meet the requirements of IBC Section 1007.6.1. Separation walls shall comply with the requirements for exterior walls. Where walls or openings between the area for assisted rescue and the interior of the building, the building exterior walls within 3.048 m. horizontally of a non-rated wall or unprotected opening should have a fire-resistance rating of not less than 1 hour. Openings within such exterior walls should be protected by opening protective having a fire protection rating of not less than ¾ hour. This construction should extend vertically from the ground to a point 3.048 m. above the floor level of the area for assisted rescue or to the roof line, whichever is lower.
a.	Openness	Shall be at least 50 percent open.
b.	Exterior exit stairway	Not permitted in a Group I-2 occupancy.
c.	Identification	Shall be provided.

6.0 EMERGENCY SYSTEM REQUIREMENTS

6.1 MEANS OF EGRESS IDENTIFICATION

Signs shall comply with NFPA 101, Section 7.10 unless otherwise modified herein.

- a. **Required Locations:** Exits and exit access doors shall be marked by an approved exit sign readily visible from any direction of egress travel. Access to exits shall be marked by readily visible exit signs in cases where the exit or the path of egress travel is not immediately visible to the occupants. Exit sign placement shall be such that no point in a corridor is more than 30.48 m. or the listed viewing distance for the sign, whichever is less, from the nearest visible exit sign.

Exceptions:

- Exit signs are not required in rooms or areas that require only one means of egress.
 - Main exterior exit doors or gates that are obviously and clearly identifiable as exits need not have exit signs where approved by the Authority Having Jurisdiction.
- b. **Power Requirements:** Exit signs shall be illuminated at all times. To ensure continued illumination for duration of not less than 90 minutes in case of primary power loss, the sign illumination means shall be connected to an emergency power system provided from storage batteries, unit equipment or an on-site generator. Illumination of exit sign and directional signs shall be supplied by life safety branch of the electrical system as described in NFPA 99, Standard for Health Care Facilities.

6.2 MEANS OF EGRESS ILLUMINATION (NFPA 101, 7.8)

- a. **Lighting Requirements:** Means of egress illumination shall be a minimum of 10.8 lux at the floor level throughout the means of egress (including the exit discharge) at all times the building is occupied.
- b. **Power Requirements:** Means of egress illumination shall be on emergency power supplied by life safety branch of the electrical system as described in NFPA 99, Standard for Health Care Facilities.

The power supply shall normally be provided by the premises' electrical supply. In the event of power failure, an emergency electrical system shall automatically illuminate the following areas:

- Aisles and unenclosed stairways in rooms requiring two or more means of egress.
- Corridors, exit enclosures, and exit passageways in buildings required to have two or more exits.
- Interior exit discharge elements in buildings required to have two or more exits.

6.3 EMERGENCY POWER SYSTEMS

An emergency power system complying with IBC Section 2702 shall be provided for the following emergency power loads:

Exit signs and means of egress illumination

Elevator car lighting

Emergency voice/alarm communications systems

Automatic fire detection systems

Fire alarm and monitoring systems

Power and lighting for the fire command center

Electrically powered fire pumps

Ventilation and automatic fire detection equipment for smoke proof enclosures

Not less than one elevator serving all floors, with standby power transferable to any elevator

Mechanical equipment for smoke control systems.

Horizontal sliding doors

Standby generators shall be located in a room having a minimum 2 hour fire resistance-rated separation from the remainder of the building.

6.4 EMERGENCY AND STANDBY POWER BRANCH CIRCUITS

Emergency and standby power shall be provided in accordance with NFPA 99: 4.4.2.2.2 and shall be supplied by an on-site generator.

- i) Life Safety Branch
 - Illumination of means of egress.
 - Exit signs and exit directional signs.
 - Fire alarm systems.
 - Alarms required for systems used for the piping of non-flammable medical gases.
 - Hospital communication systems when used for emergency instructions.
 - Emergency generator room lighting and selected receptacles.
 - Elevator cab lighting, control, communication, and signal systems.
 - Automatically operated doors used for building egress.
 - Lighting in rooms where life-support systems are in use.
 - ii) Critical Branch
 - Critical care areas that use anesthetizing gases, task illumination, selected receptacles, and fixed equipment.
 - Isolated power systems in special environments.
 - Task illumination and selected receptacles in the following:
 1. Patient care areas including infant nurseries, selected acute nursing areas, psychiatric bed areas, and ward treatment rooms.
 2. Medication preparation areas.
 3. Pharmacy dispensing areas.
 4. Nurses' stations.
 - Additional specialized patient care task illumination and receptacles where required.
 - Nurse call systems.
 - Blood, bone, and tissue banks.
 - Telephone equipment rooms and closets.
 - Task illumination, select receptacle and selected power circuits for:
 1. General care beds (at least one duplex receptacle per patient bedroom).
 2. Angiographic labs.
 3. Cardiac catheterization labs.
 4. Coronary care units.
 5. Hemodialysis rooms or areas.
 6. Emergency room treatment areas (selected).
 7. Human physiology labs.
 8. Intensive care units.
 9. Post-operative recovery rooms (selected).
 - Additional task illumination, receptacles, and selected power circuits needed for effective facility operation. Single-phase fractional horsepower exhaust fan motors that are interlocked with three-phase motors on the equipment system shall be permitted to be connected to the critical branch.
- a) **Source:** On-site generator.
 - b) **Transfer Time:** For life safety and critical branch 10 seconds or UPS where required.
 - c) **Fuel Supply:** An on-premises fuel supply sufficient not less than 2 hours full demand operation of the system shall be provided.

7.0 ELEVATORS

Minimum Dimensions: Elevators shall be sized in accordance with requirements of ANSI / ASME A17.1, unless otherwise modified herein. Elevators shall be sized to accommodate a 4-bed minimum to provide for bed / stretcher coupled with life saving equipments.

- a) **Elevator Operation and Installation:** Elevators shall comply with ANSI / ASME A17.1.
- b) **Fire Emergency Controls:** Elevators shall be provided with Phase I emergency recall operation and Phase II emergency in-car operation in accordance with ANSI / ASME A17.1.
- c) **Hoistway Venting:**
 - i. **Required Locations:** For elevator shafts extending through more than three stories.
 - ii. **Vent Area:** Not less than 3.5 percent of the area of the hoistway nor less than 0.28 m² for each elevator car, and not less than 3.5 percent nor less than 0.047 m² for each dumbwaiter car in the hoist way, whichever is greater.
 - iii. **Vent Configuration:** Of the total required vent area not less than one-third shall be permanently open. Closed portions of the required vent area shall consist of openings glazed with annealed glass not greater than 3.2 mm. in thickness.
 - iv. **Equipment Venting:** When solid-state equipment is used to operate the elevators the elevator equipment room shall be provided with an independent ventilator or air conditioning system to prevent overheating:

8.0 FIRE PROTECTION SYSTEMS

8.1 AUTOMATIC SPRINKLER SYSTEM

The building shall be fully sprinklered and supervised in accordance with NFPA 13, and modified herein.

A secondary water supply equal to the hydraulically calculated sprinkler demand, including the hose stream requirement, shall be provided for high-rise buildings in Seismic Design category C, D, E or F as determined by the IBC. The secondary water supply shall have a duration of not less than 30 minutes as determined by the occupancy hazard classification in accordance with NFPA 13.

A Class I standpipe system shall be provided.

Listed quick-response or listed residential sprinklers shall be used throughout smoke compartments containing patient sleeping rooms.

8.2 PORTABLE EXTINGUISHERS

- a) Portable extinguishers shall be provided at each compartment / floor of the building in accordance with the more stringent requirements of IS 2190 and NFPA 10.

- b) Mist equipment i.e., 9 liters (2 nos) per floor and 600 liters Mist (Trolley mounted) with 60.00meters hose in Fire Control Room shall be provided.

8.3 HOSE REELS

One First Aid hose reel shall be provided for every 1000 sq.m. Floor area, located in the vicinity of an exit staircase.

8.4 YARD HYDRANTS AND WET STANDPIPES

Yard hydrants and wet standpipe connections shall be provided per NFPA Standards unless otherwise modified herein. The most stringent of the requirements shall apply. Requirements are as follows:

Wet standpipes shall be provided for every 1000 sq. m of floor area with a minimum of the greater of 2 per floor, or one for each exit staircase. Yard hydrants shall be provided around the perimeter of the building at a distance of every 45 m.

8.5 FIRE PUMPS

Fire pumps and jockey pumps shall be designed and installed per NFPA 20 based on the hydraulic demands of the fire protection systems provided.

8.6 WATER SUPPLY TANKS

Terrace tank with a minimum capacity of 100,000 Liters shall be installed to provide an adequate water supply for fire protection systems.

An underground water tank with a minimum capacity of 4.00 lakhs Liters shall be provided for firefighting purposes.

9.0 FIRE DETECTION AND ALARM SYSTEMS

Health care occupancies (per NFPA 101, Section 18.3.4) shall be provided with fire alarm and detection systems. They shall be Designed and installed per the more stringent of IS 2189 and NFPA unless as modified herein.

9.1 ALARM INITIATING DEVICES

Initiation of the required fire alarm systems shall be by manual means and by means of any required detection devices, detection systems, or sprinkler system water flow alarms. When activated, alarm initiating devices shall activate audible and visible alarm signals. The general evacuation alarm signal shall operate throughout the entire building.

Operation of any control initiating device in the fire alarm system shall automatically accomplish the fire safety control function(s) for which the device is designed.

9.1.1 Manual Fire Alarm Stations

Manual call points (Pull stations) shall be provided in the natural path of escape near every exit door at each floor including basements. The travel distance to a Manual call point shall not be more than 60.96 m.

Manual pull stations may alternatively be located at nurses' stations in patient sleeping areas in lieu of required exits provided they are visible and continuously accessible, and do not exceed 60.96 m. travel distance.

9.1.2 Smoke Detectors

- Duct smoke detectors shall be provided in air supply systems over 0.94 m³/s, located in the main return air and exhaust air plenums.
- Duct smoke detectors shall be provided in return air systems serving more than 1 story and 7.08 m³/s, located at each connection to a vertical duct or riser.
- Smoke detectors shall be provided in spaces open to corridors unless they are directly supervised from the nurse's station. This includes waiting and similar spaces open to the corridor.
- Smoke detectors shall be provided in elevator lobbies and machine rooms to recall elevators.
- Smoke detector shall be provided at each smoke damper for damper activation.
- Smoke detectors shall be provided at hold-open doors, located on each side of the doors.
- Smoke detectors, which receive primary power from the building wiring, shall be provided in the patient sleeping rooms with visual display in corridor outside room and at the nurses' station.
- In each mechanical equipment, electrical, transformer, telephone equipment or similar room which is not provided with sprinkler protection, elevator machine rooms and in elevator lobbies.
- Corridor smoke detection is not required in smoke compartments containing patient sleeping units where patient sleeping units are provided with smoke detectors that comply with UL268. Such detectors shall provide a visual display on the corridor side of each patient sleeping unit and an audible and visual alarm at the nursing station attending each unit.
- Corridor smoke detection is not required in smoke compartments containing patient sleeping units, where patient sleeping units are equipped with automatic door –closing devices with integral smoke detectors on the unit sides installed in accordance with their listing, provided that the integral detectors perform the required alerting function.

9.1.3 Sprinkler System Water Flow Devices

A supervised control valve tamper switch and water flow detection device shall be provided at the lateral connection to the sprinkler system on each floor.

All valves controlling the water supply for automatic sprinkler systems, pumps, water levels and temperatures, critical air pressures and water-flow switches on all sprinkler systems shall be electrically supervised.

Exceptions:

1. Jockey pump control valves that are sealed or locked in the open position.
2. Control valves to commercial kitchen hoods, paint spray booths or dip tanks that are sealed or locked in the open position.
3. Valves controlling the fuel supply to fire pump engines that are sealed or locked in the open position.

9.2 ALARM INITIATION

Where an alarm notification system is required, it shall be activated by the following devices sending signals to the fire alarm system:

- Automatic detection devices.
- Sprinkler water-flow devices and other extinguishing system operation Manual fire alarm boxes.

9.3 ALARM ANNUNCIATION AND ZONING

Alarm annunciation and zoning shall be per NFPA 101, Section 9.6.7 unless modified as follows. Alarm zones shall be permitted to coincide with the areas of compliant smoke compartments.

9.4 OCCUPANT NOTIFICATION

Audible and visual alarms shall be provided in all non-patient areas and shall be listed for their purpose. Automatic occupant notification of alarm shall be provided in accordance with NFPA 101, Section 9.6.3 with the following exceptions:

Exceptions:

- Smoke detectors located at doors for the exclusive operation of automatic door release shall be required to activate the building evacuation alarm, provided that the power supply and installation wiring to the detectors are monitored by the building fire alarm system, and the activation of the detectors initiates a supervisory signal at a constantly attended location.
- Visual alarms shall be permitted to replace audible alarms for critical-care areas of Group I-2 occupancies.

9.5 FIRE SERVICES NOTIFICATION

Notification of the fire services shall be in accordance with NFPA 101 Section 9.6.4.

10.0 EMERGENCY VOICE ALARM COMMUNICATION SYSTEMS

10.1 EMERGENCY VOICE/ALARM SYSTEM

An emergency voice/alarm communication system shall be required.

The operation of any automatic fire detection, sprinkler water-flow device or manual fire alarm box shall automatically sound an alert tone followed by voice instructions giving approved information on a minimum of the alarming floor, the floor above and the floor below in accordance with Section 404 of the International Fire Code. Speakers shall be provided throughout the building by paging zones. As a minimum, paging zones shall be provided as follows:

1. Elevator groups
2. Exit stairways
3. Each floor
4. Areas of refuge as defined in IBC Section 1002.1

In Group I-2 occupancies, the alarm shall sound in a constantly attended area and a general occupant notification should be broadcast over the overhead page.

10.1.1 Manual Override

A manual override for emergency voice communication shall be provided on a selective and all-call basis for all paging zones.

10.1.2 Live Voice Messages

The emergency voice/alarm communication system shall also have the capability to broadcast live voice messages through paging zones on a selective and all-call basis.

10.1.3 Design and Installation

The emergency voice/alarm communication system shall be designed and installed in accordance with NFPA 72.

10.2 FIRE DEPARTMENT COMMUNICATIONS SYSTEM

An approved two-way fire department communications system shall be provided for fire department use and shall be designed and installed in accordance with NFPA 72. It shall operate between a fire command centre and elevators (lifts), elevator lobbies (lift landings), emergency and standby power rooms, fire pump rooms, areas of refuge, and inside enclosed exit stairways. The main control unit shall be located in the fire command centre. Fire department communication devices / telephones shall be provided at the following areas:

- Stairway landings at each floor level within enclosed stairways
- Lifts and lift landings
- Refuge areas
- All critical service areas such as Operation theatres, ICU, ICCU etc.

Fire department radio systems shall be permitted to be provided where approved by the fire department.

10.3 FIRE COMMAND CENTER

A fire command center shall be provided. The location and accessibility shall be approved by the fire department. The fire command center shall be separated from the remainder of the building by not less than 1-hour fire barrier or horizontal assembly, or both. The room shall be a minimum of 9 m² with a minimum dimension of 2.44 m. A layout of the fire command center and all features required shall be submitted for approval prior to installation. The fire command center shall comply with NFPA 72 and contain the following features:

1. The emergency voice/alarm communication system unit
2. The fire department communications unit
3. Fire detection and alarm system annunciator unit
4. Annunciator unit visually indicating the location of the elevators and whether they are operational
5. Status indicators and controls for air-handling systems.
6. The fire-fighter's control panel required for smoke-control systems.

7. Controls for unlocking stairway doors simultaneously.
8. Sprinkler valve and water-flow detector display panels.
9. Emergency and standby power status indicators.
10. A telephone for fire department use with controlled access to the public telephone system.
11. Fire pumps status indicators.
12. Schematic building plans indicating the typical floor plan and detailing the building core, means of egress, fire protection systems, fire-fighting equipment and fire department access Worktable.
13. Generator supervision devices, manual start and transfer features.
14. Public address system, where specifically required by other sections of the IBC.
15. Evacuation Chairs and Evacuation Stretchers (each 4 no's per floor) shall be provided for evacuation in case of emergency.

11.0 ATRIUM REQUIREMENTS

11.1 DEFINITION

A large-volume space created by a floor opening or series of floor openings connecting two or more stories that is covered at the top of the series of openings and is used for purposes other than an enclosed stairway; elevator hoist way; escalator opening; or utility shaft used for plumbing, electrical, air-conditioning, or communication facilities.

11.2 USES PERMITTED WITHIN ATRIA

The occupancy within the atrium space shall meet the specifications for classification as low or ordinary hazard contents.

11.3 SEPARATION

An atrium shall be separated from the adjacent spaces by fire barriers of not less than 1-hour fire resistance rating with opening protective for corridor walls.

Exceptions:

1. Any number of levels of the building shall be permitted to open directly to the atrium without enclosure based on the results of the smoke control engineering analysis described above.
2. Glass walls and inoperable windows shall be permitted in lieu of the fire barriers where automatic sprinklers are spaced along both sides of the glass wall and the inoperable window at intervals not to exceed 1.83 m. The automatic sprinklers shall be located at a distance from the glass not to exceed 0.3 m. and should be arranged so that the entire surface of the glass is wet upon operation of the sprinklers. The glass shall be tempered, wired, or laminated glass held in place by a gasket system that allows the glass framing system to deflect without breaking (loading) the glass before the sprinklers operate. Sprinklers shall not be required on the atrium side of the glass wall and the inoperable window where there is no walkway or other floor area on the atrium side above the main floor level. Doors in such walls shall be glass or other material that resists the passage of smoke. Doors shall be self-closing or automatic-closing upon detection of smoke.
3. A glass-block wall assembly in accordance with IBC Section 2110 and having a $\frac{3}{4}$ -hour fire protection rating.
4. The adjacent spaces of any three floors of the atrium shall not be required to be separated from the atrium where such spaces are included in the design of the smoke control system.

11.4 SMOKE CONTROL

11.4.1 System Design Criteria

Where an atrium exceeds 2 stories, an engineering analysis shall be performed to demonstrate that the building is designed to keep the smoke layer interface above the highest unprotected opening to adjoining spaces, or 1.83 m. above the highest floor level of exit access open to the atrium for a period equal to 1.5 times the calculated egress time or 20 minutes, whichever is greater. A smoke control system, where required, shall be installed in accordance with IBC Section 909.

11.4.2 System Activation

Where an engineered smoke control system is installed, the system shall be independently activated by each of the following:

1. The required automatic sprinkler system or automatic smoke detection device designed to activate the smoke control system.
2. Manual controls that are readily accessible to the fire department.

11.5 EGRESS TRAVEL

In other than the lowest level of the atrium, where the required means of egress is through the atrium space, the portion of exit access travel distance within the atrium space shall not exceed 60.96 m.

12.0 RISK ASSESSMENT REPORT

The fire and life safety risk assessment report of High Rise Hospital Building conforming to NFPA-1031 (Sec 5 &7) shall be prepared by, but not limited to any of the following reputable Institutions or organizations:

- a. Institution of Fire Engineers (IFE, India) (or) BE Fire Engineers.
- b. Authorized agency / experts panel of Institution of Fire Engineers (IFE) (or)
- c. National Association of Fire Officers (NAFO, India) (or)
- d. Any recognized university or any other agency approved by the Director General of Fire and Emergency Services, A.P., Hyderabad.

13.0 BASEMENT PROTECTION

13.1 General

- i) Basements shall comply with the IBC for S-2 Storage occupancies.
Exception: Means of Egress shall be in accordance with NFPA 5000 and NFPA 101.
- ii) Basements shall not be used for any other purpose except parking and building services Exception: Specialized medical facilities/services compliant with NFPA 99 shall be permitted in the second level basement.

13.2 VENTILATION AND SMOKE MANAGEMENT

Basements Ventilation shall be provided as below: (NBC Part-4 (C.1.6).

- i) The building shall be provided with the ventilation strictly in accordance with Part- VIII Section-I and Clause C-1.6.1 to C — 1.6.6 of Part-IV of National Building Code of India. The smoke control/extraction system shall be designed as per NBC Part-4/IBC Section909 and NFPA-92. Where conflicts exist, the most stringent provisions shall apply.
- ii) Each basement shall be separately ventilated. Vents with cross-sectional area (aggregate) not less than 2.5 percent of the floor area spread evenly round the perimeter of the basement shall be provided in the form of grills, or breakable stall board lights or pavement lights or by way of shafts. Alternatively, a system of air inlets shall be provided at basement floor level and smoke outlets at basement ceiling level. Inlets and extracts may be terminated at ground level with stall board or pavement lights should be in position easily accessible to the fire brigade and clearly marked ' SMOKE OUTLET' or" AIR INLET" with an indication of area Served at or near the opening. (NBC Part-4(C.1.6.1).
- iii) The staircase serving basements shall be of enclosed type with a fire resistance the greater of not less than 2 hours or the floor/ceiling construction that it is Penetrating, and shall be situated at the periphery of the basement to be entered at ground level only from the open air and in such positions that smoke from any fire in the basement shall not obstruct any exit serving the ground and upper Stories of the building and shall communicate with basement through a lobby Provided with fire resisting self closing doors of 1 hour resistance. (NBC Part-4 (C.1.6.2), or as otherwise specified herein.
- iv) In multi-storey basements, intake ducts may serve all basements levels, but each basement level shall have separate smoke outlet duct or ducts. Ducts so provided shall have the same fire resistance rating as the compartment itself. (NBC Part-4 (C.1.6.3) or as otherwise specified herein.
- v) Mechanical extractors for smoke venting system from lower basement levels shall also be provided. The system shall be of such design as to automatically operate on activation of heat/smoke sensitive defectors or sprinklers. It shall also have an arrangement to be capable of a manual start. (NBC Part-4 (C.1.6.4).
- vi) Mechanical extractors shall have an internal locking arrangement, so that extractors shall continue to operate and supply fans shall stop automatically with actuation of fire detectors. (NBC Part-4 (C.1.6.4.1).
- vii) Mechanical extractors shall be designed to permit 30 air changes per hour in case of fire or distress call. (NBC Part-4 (C.1.6.4.2).
- viii) Mechanical extractor shall have an alternative source of supply. (NBC Part-4 (C.1.6.4.3).
- ix) Ventilating ducts shall be integrated with the structure and made out of brick masonry of reinforced cement concrete as far as possible and when this duct crosses the transformer area or electrical switchboard, fire dampers shall be provided. (NBC Part-4 (C.1.6.4.4).
- x) If cutouts are provided from basements to the upper floors, these openings shall be protected by sprinkler head at close spacing so as to form a water curtain in the event office. (NBC Part-4 (C.1.6.6).

14.0 SMOKE COMPARTMENTATION

- i) For every storey used by patient for sleeping or treatment, or other stories with an occupant load of 50 or more persons, floors shall be divided into separate fire/ smoke compartments with areas not exceeding 500 m² and enclosing construction having a minimum 2 hour fire rating, unless otherwise specified herein.
- ii) The services, standby generator and store must be segregated from others by erecting fire-resistant wall of not less than 2 hours rating. Each of the compartments must be individually ventilated and the opening for entry into each of these compartments must be fitted with self-closing fire / smoke check doors of not less than 1-1/2 hour fire rating.
- iii) All electric cables shall be laid in separate shafts and shall be sealed at every floor with fire resistant material of similar rating. The wall in between and all around the shafts shall also be of minimum two hours fire rating. (clause 6.3 and C-9 Part-4 NBC, 2005).
- iv) The entry to the staircase from all levels shall be segregated with a self-closing fire /smoke check door of not less than a 1-1/2 hour fire rating. All vertical and horizontal openings at each floor level throughout the building shall be sealed properly with the non-combustible material in order to maintain the rating of the barrier element. Wherever false ceiling / suspended ceiling is provided, it shall be of one hour fire rated material. The compartmentation shall be extended up to ceiling level. (clause 6.3 and C-9 Part-4NBC, 2005). Fire rated compartments shall extend slab to slab when a suspended ceiling is used.
- v) The maximum travel distance to a smoke compartment door within a smoke compartment shall be 45.0 m.
- vi) The smoke compartment shall be sized to accommodate occupants of the compartment plus occupant from adjacent compartments using 2.8 m² per non-ambulatory occupants and 0.56 m² for others.
- vii) A means of egress shall be provided from each smoke compartment created by smoke barriers without having to return through the smoke compartment from which the egress path originated.
- viii) Smoke compartments shall have 1-hour fire-resistive, smoke tight construction extending from exterior wall to exterior wall, or smoke barrier to smoke barrier, slab to slab, or any combination.
Exception: Smoke barriers shall not be required in interstitial spaces, where such spaces are designed and constructed with ceilings that provide resistance to the passage of fire and smoke equivalent to the provided by the smoke-barrier walls.
- ix) Smoke compartment doors and draft assemblies shall have a minimum fire resistance rating of 45-minutes per 2.2.8.2 herein. Where doors are installed across corridors, a pair of opposite swinging doors without a center mullion or horizontal sliding doors shall be installed having vision panels consisting of fire- rated glazing materials in approved frames, the area of which should not exceed that tested. The doors shall be close fitting within operational tolerances, and shall not have undercuts, louvers or grilles. The doors shall have head and jamb stops, astragals or rabbets at meeting edges and should be automatic closing by smoke detection. Positive-latching devices are not required.
- x) Where ducts penetrate smoke compartments, a listed smoke damper designed to resist the passage of smoke shall be provided at each point a duct or air transfer opening penetrates a smoke barrier. Smoke dampers and smoke damper actuation methods shall comply with IBC Section 716.3.2.1.
Exception: Smoke dampers are not required where the openings in ducts are limited to a single smoke compartment and the ducts are constructed of steel.
- xi) Buildings containing health care facilities shall be subdivided by smoke barriers into compartments as follows:
 1. To divide every story used by inpatients for sleeping or treatment into not less than two smoke compartments,
 2. To divide every story having an occupant load of 50 or more persons, regardless of use, into not less than two smoke compartments,

3. To limit the size of each smoke compartment required by (1) and (2) to an area not exceeding 2100m², unless the area is an atrium separated in accordance with NFPA 101 Section 8.6.7, in which case no limitation in size is required, and,
 4. To limit the travel distance from any point to reach a door in the required smoke barrier to a distance not exceeding 45.0 m.
- xii) The smoke barrier subdivision requirement in Item xi) herein shall not apply to the following:
- (1) Stories that do not contain a health care occupancy located directly above the healthcare occupancy,
 - (2) Areas that do not contain a health care occupancy and that are separated from the health care occupancy by a fire barrier complying with NFPA 101, Section 7.2.4.3,
 - (3) Stories that do not contain a health care occupancy and that are more than one story below the health care occupancy, and,
 - (4) Open-air parking structures protected throughout by an approved, supervised automatic sprinkler system in accordance with Section 9.7.

15.0 ELECTRICAL REQUIREMENTS

Only Dry Type Transformer should be installed if located in the basements.

The construction of electric sub-station and installation of Transformer, LT & HT panels shall be as per the provisions specified by the Electrical Authority. However, the following points shall be followed:

- i) The HT & LT panels shall be separated with walls of 2 hours fire resistance rating. Enclosure walls shall extend up to one meter above the highest point of the transformer.
- ii) LT & HT panels shall be protected with manually operated CO₂ protection system designed and installed per NFPA 12. Two dry chemical powder type fire extinguishers of 10 kg with BIS Certification marks shall be provided outside the transformer room.
- iii) Insulated mats tested on 11 KV and at least one pair rubber gloves shall be provided in every electrical switch/panel room of substation. Independent ventilation system shall be provided for LT/HT panel and transformer rooms.

15.1 EMERGENCY ELECTRICAL SERVICES

Provide separate electrical circuits to feed emergency services and systems such as firefighting pumps, lifts, automatic fire detection, emergency voice/communication, fire alarm, staircase and emergency lighting, and exit signage shall be provided. Smoke venting and signage circuit shall be laid in separate conduit so that fire in one circuit will not affect the others. Master switches controlling essential services circuits shall be clearly labeled.

See Section 6.0 herein for additional requirements.

15.2 ELECTRICAL WIRING

- i) The electrical wiring shall be provided in metal / FRLSPVC conduits. MCBs and ELCB shall be installed. The electrical services shall be strictly in accordance to Clause C.1.12 of Appendix-D' of NBC Part-IV/NFPA – 70. Fire resisting cables or fire resistance achieved by enclosing construction shall be used in the building. Power supply cables and the ducting shall not be taken through the staircase or any passage way used as an escape route. All the cables shall be only of Fire Resistant Low Smoke type when the fire resistance rating is derived solely from the cable use.
- ii) Fault tolerant wiring in alarm system to be used (NFPA, 72 (3-4)).

15.3 EMERGENCY POWER SUPPLY

- a. The standby electric generator installed shall be of adequate capacity to supply power to staircase and emergency lighting circuits, lifts, exit signs, automatic fire detection, emergency voice/communication, fire alarm, and fire pumps in case of failure of normal electric supply. The generator shall be capable of taking starting current of all the machines and circuits stated above simultaneously and must be automatic in action (NFPA-110). The engine starting Battery system should be duplicated.
- b. UPS shall be installed to cater to the critical load of Alarm and Public Address System (NFPA-111).
- c. A dedicated 25 KW emergency electrical generator should be installed to back up the main standby generator for alarm system, Public Address System and UPS.

See Section 6.0 herein for additional requirements.

16.0 DECORATIVE MATERIALS AND FURNISHINGS

- i) All the fabric used for seats, curtain, covering on sidewall, matting/ carpeting etc. shall also have Class-I rating as prescribed in NBC Part-IV/NFPA,99.
- ii) Draperies, curtains, furnishings and decorations shall comply with Chapter 10 – Interior Finish, Contents and Furnishings, NFPA 101.
- iii) Only flame retardant material shall be used for interior decoration and upholstery top recent generation of toxic smoke / fumes. (NBC Part-4 (3.4.15))

See NFPA 101 Section 18.7.5 for additional requirements.

17.0 AIR-CONDITIONING SYSTEM

Air conditioning system shall conform to Clause D-1.17 of part IV and Section 3 of Part VIII of National Building Code of India. However, following points shall be ensured:

- a) Air ducts serving main floor areas, corridors etc. shall not pass through the staircase enclosures.
- b) Automatic fire dampers shall be provided in the ducts at the inlets of the fresh air and return air of each compartment /floor on every floor. The fire dampers shall be so arranged so as to close by gravity in the direction of the air movement and to remain tightly closed automatically upon operation of smoke/ heat detectors and signal transmittal to the fire alarm system.
- c) The air handling units shall be separate for each floor/each compartment at each floor level. The air ducts for every floor/compartment shall be separated and not interconnected with the ducting of any other compartment.

See NFPA 101 Section 18.5.2 for additional requirements.

18.0 REFUGE FLOOR/AREA

- a) One refuge floor at a height of 30.0 meters shall be provided for safe evacuation with maximum of 2.5 meters floor height.
- b) Refuge areas as per clause 4.12.3 part 4 of NBC 2005, i.e., 0.3m² per person of two consecutive floors at the height of 24m, 39m and 54m levels shall be provided.
- c) Refuge area - definition: An area of refuge is a location in a building designed to hold occupants during a fire or other emergency, when evacuation may not be safe or possible. Occupants can wait there until rescued by firefighters. This can apply to the following:
 - any persons who cannot access a safe escape route
 - any persons assisting another person who is prevented from escaping
 - patients in a hospital
 - sick people
 - people with disabilities
 - old people
 - very young children or infants

Medical personnel who may be operating on a patient at the time of the emergency.

- d) Technical requirements: An Area of refuge is typically equipped with a steady supply of fresh outside air. The ducting that must supply such fresh air is referred to as pressurization ductwork. Such ductwork are items of passive fire protection, subject to fire testing, product certification, and listing and approval use and compliance. The idea is that the ductwork must remain operable even while exposed to fire for a duration of two hours. The electrical equipment supplying power must also be equipped with approved circuit integrity measures. (NFPA 70 & 99).
- e) Refuge area shall not be utilized for any other purpose and shall be kept vacant for the assembly of occupants in case of any emergency.

19.0 OTHER REQUIREMENTS

- a) Provision for Helipad should be made on the terrace floor (roof) according to the guidelines issued by the Director General, Civil Aviation, Government of India, New Delhi in Section (4) Series 'B' Part-II dt. 21.12.2005. NFPA 418 shall be used as guidance.
- b) Fluorescent colored floor strips / glowing paint signs on the walls shall be provided on all floors at each level to guide the direction for escaping towards a safe place in case of an emergency.
- c) Separate Ramps to the Basement for entry and exit of vehicles shall be provided.
- d) The hospital developer/firm shall provide all the required Fire Safety measures (Passive & active) and Fire prevention procedures and planning, training and drills programmers' for the isolation of fire, transfer of occupants to areas of refuges or total evacuation of the building during the course of constructing Hospitals. The builder shall submit the certificates from the manufacturers of all Fire Fighting Equipments installed.

Also see Section 5.5, Item 6 herein for additional requirements pertinent to Areas of Refuge.

20.0 MANAGEMENT AND MAINTENANCE OF GENERAL FIRE SAFETY MEASURES

The Management of the High Rise Hospital Building shall observe the following: General Fire Safety measures that shall be adhered to at all times for purposes of fully complying with the Manufacturer's instructions and NBC/NFPA stipulations. NFPA 13,25,99,101, and 110 provide several options so that the more suitable option is adopted. The particular option adopted shall be clearly indicated and approval from Fire Services should be obtained.

20.1 FLAMMABLE LIQUIDS

The maximum allowable quantities (MAQ's) of flammable materials shall comply with NFPA 30. The handling of such liquids shall not be permitted by unauthorized persons. (NFPA 99)

20.2 HEATING EQUIPMENT:

The doors to furnace room shall be equipped with automatic closers and be kept closed.
The flues, pipes and steam lines shall be in good condition and properly insulated.
There shall be a gas cut-off outside the building.

20.3 KITCHENS :

- i. The cooking equipment shall be provided with a steel range hood.
- ii. The cooking facilities shall be provided with a pre-engineering fire suppression system..
- iii. The discharge of automatic extinguishing system shall be monitored by the fire alarm system and provide occupant notification.
- iv. Cooking facilities shall be protected per NFPA 101, Section 18.3.2.5.

20.4 LAUNDRY:

- i. The laundry doors to the main building shall be kept normally closed.
- ii. The electric devices and irons shall have operative automatic heat controls.
- iii. Keep the tumbler free from lint and dust.
- iv. Safety pilot lights shall be operative.

20.5 LABORATORY:

- i. Flammable liquids shall be stored properly in listed flammable liquids cabinets or an other approved manner.
- ii. The acids stored shall be handled and properly stored.
- iii. The connections of gas fired or open flame equipment shall be in good condition.

20.6 OXYGEN & NITROUS OXIDE STORAGE :

- i. The oxygen and nitrous oxide cylinders shall be stored separately from other gases in accordance with the applicable NFPA standards.
- ii. 'No Smoking' signs and nitrous oxide warnings shall be posted on store room doors.
- iii. The cylinders shall be protected from the sun.
- iv. The cylinders shall be removed from steam pipes or radiators to prevent contact.

20.7 GENERATORS:

- i. Generators shall be in good operating condition.
- ii. Generators shall start automatically.
- iii. Generators shall be tested under load monthly.

20.8 WATER HEATERS:

- i. The water heaters shall be properly vented.
- ii. The water heaters shall be equipped with 100% safety pilots.
- iii. The water heaters shall be equipped with pressure relief valves.

20.9 GENERAL

- i. Corridors shall be kept free from storage of beds, linen, carts, etc.
- ii. The space beneath stairs and elevators shall be kept free from storage of any materials.
- iii. The trash and laundry chutes shall be sprinklered and additionally comply with NFPA

101 Section 18.5.4.

- i. The covers on breaker panels and face plates shall be kept in good condition.
- ii. The appliance cords shall be kept in good condition.
- iii. The appliance cords shall be protected against mechanical injury.
- iv. Only approved metal containers shall be used for all oily waste, polishing or cleaning materials.
- v. Combustible liquids shall be kept in approved metal cans.
- vi. The refuse should be removed from the premises or burned daily.
- vii. The sprinkler heads shall be unobstructed and adequate clearances maintained.
- viii. All employees shall be made aware of the location of fire extinguishers and be trained in its use and operation.
- ix. The fire alarm devices on each floor shall be maintained in good working condition.
- x. The signs giving location of pull stations should be properly maintained.
- xi. The pull stations shall be unobstructed and plainly marked.
- xii. The plan for evacuation of patients shall be prepared and displayed at appropriate places.

20.10 FIRE ALARM SYSTEM SEQUENCE OF OPERATION:

Operation of any manual pull station, automatic smoke detector, heat detector, and duct mounted smoke detector or water flow switch shall cause the following actions and indications:

- a) The system common alarm LED on the CPU shall flash. The internal audible device shall sound.
- b) The 80 character backlit alphanumeric display, shall display the device type, device location, time and date of alarm and a unique custom message.
- c) Transfer common alarm contacts for sending an alarm signal to an approved central station. (Two dedicated telephone lines, connection and service by owner).
- d) Activate the fire alarm audio/visual signals throughout the facility.
- e) Shutdown all AHUs over 2000 cfm.

Operation of any operating room ceiling mounted smoke detector or return air duct smoke detector shall cause the following actions and indications:

- a) Return air damper shall transfer to fully closed.
- b) Outside air damper shall transfer to fully open.
- c) Exhaust damper shall transfer to fully open and activate exhaust fan.

Operation of outside air or supply air duct smoke detector unit shall shut down. Exhaust damper shall remain in full open position or transfer to that position and activate exhaust fan.

21.0 FIRE MANAGEMENT

- a. **FIRE CONTROL ROOM:** - Fire control room shall be established on the ground floor, near the entrance and shall be manned round the clock.
- b.
 - i) The world class integrated building management system (BMS) shall have to be established with most modern automatic fire safety and life safety systems and equipments.
 - ii) The builder has to contribute 25% cost of the establishment and strengthening of the jurisdiction of Fire station under private and public partnership model.
 - iii) The Fire Service and Disaster Management Department will evolve a public private model code within 2 months on ratification by the Government of Andhra Pradesh it will be part of this clause and will be binding on all Hospitals."
- c. **FIRE OFFICER AND CREW** :- A Fire Officer with experience of not less than 3 years in Government / public Sector undertakings / corporate Sector in the rank of Station Fire Officer or above shall be available on the premises along with security personnel trained in firefighting and rescue for purposes of maintaining fire safety systems in trim working condition at all times and to conduct training in first aid firefighting and fire drills. The Fire Officer with trained fire personnel shall respond to all emergency calls in the Hospital round the clock
- d. **FIRE SAFETY PLAN : (NFPA – 101 (18.7.2.1))**
Fire Safety plan should be developed by the management and should be approved by the Director General of Fire and Emergency Services before occupancy. The following shall be provided in the written Fire safety Plan to train response teams, maintenance staff, nursing staff and fire wardens.
 - i) The use of alarms
 - ii) Staff response to alarms
 - iii) Fire Confinement
 - iv) Occupant evacuation of the immediate area
 - v) Occupant evacuation of Individual smoke compartment
 - vi) Total building evacuation
 - vii) Fire extinguishment.

- e. **BUILDING EVACUATION SUPERVISOR:** The Owner / Occupier shall appoint a Building Evacuation Supervisor for conducting and documenting results of periodical Fire Drills for compliance of timed egress provisions in the NBC.
- f. **FIRE DRILLS:** Fire drills shall be conducted once in every month and shall include the employees and staff members of all shifts. Fire Drills shall include assignment of staff to close doors where necessary to prevent spread of smoke or fire, to search the lavatories or other rooms, to account for all occupants, to achieve prompt, quiet, orderly evacuation of the building or relocation to area of refuge, (refer Annexure - E part - 4 of NBC of India, 2005).

22.0 OTHER STIPULATIONS

(Reproducing as provisioned in department draft guidelines)

INSPECTION:- Inspections shall be undertaken at periodic intervals as below:

The inspection of High Rise Building shall be conducted once in a year for the issuance of renewal of No Objection Certificate for occupancy. A certificate to the effect that all the required fire safety measures are provided and functioning satisfactorily shall be enclosed to the application duly signed by the Fire Protection Engineer for considering the renewal of No Objection Certificate for occupancy. Random checks will be done by the State Disaster Response & Fire Services Department.

Periodical Inspection by the officers of State Disaster Response & Fire Services Department shall be once in six months after receipt of certificate as above and it is the responsibility of the Management to ensure that all fire prevention and Safety Systems installed are maintained in good working condition.

INSURANCE: The builder shall duly insure all the occupiers (i.e., Doctors, Nurses, employees, patients, visitors attendants and emergency service personnel etc.) of High Rise Hospital including Building and equipment against all Disasters after obtaining No Objection Certificate for Occupancy from Fire Services Department.

- a) **MAINTENANCE & MANAGEMENT:** Such High Rise Hospital Building shall be under the overall control and management of a single management body who shall be responsible for the fire and life safety. Maintenance shall comply with applicable standards and NFPA.
- b) **PENALTIES:** The owner/firm or occupier and Fire Protection Engineer of the premises who contravenes these stipulations shall be guilty of an offence and is liable for penal action under Section 31 of the A.P. Fire Service Act, 1999 and other relevant laws.

23.0 PLANNING AND EXECUTION

- i) The Fire Prevention and Life safety requirements shall be met by engaging the services of an experienced engineering firm with a track record of having designed and executed minimum five such Buildings of similar in height as per NFPA. Apart from providing facilities for undertaking external firefighting measures, internal fire safety and protection measures are required to be provided and maintained as given in these stipulations. (NFPA-1-17.8.4.5, NFPA – 1031-5.7)
- ii) The designer shall ascertain local conditions like availability of Water, reliable power, material and equipment certified to be fit for fire service, maintenance resources, traffic conditions, communications, record of compliance of similar hospitals and any additional information provided by the Department. He shall be familiarized with nature of occupants including non- patients who would have to be safely exited in emergencies. He shall confirm and explain how the above have been factored in the design.
- iii) Adverse local conditions, known to have contributed to poor compliance with fire safety shall have mandatory to be factored in by stipulating possible compensative measures to ensure effective compliance, enforcement and provide for human errors, duly considering local constraints, so that safety is not compromised and INTENT of any code provision is not violated. The above is in line with, sec.13 of AP Fire Act, CL.10 part-2 of NBC and NFPA – 1.
- iv) Intelligent Smoke management to ensure safe evacuation and non-erasable record of alarm to monitor integrity of critical safety equipment like Sprinkler system, Public Address system and emergency generators shall be provided.

(BY ORDER AND IN THE NAME OF THE GOVERNOR OF ANDHRA PRADESH)

T.S. APPA RAO
PRINCIPAL SECRETARY TO GOVERNMENT

ANNEXURE – V
(Rule-15.a.v)

SPECIAL REQUIREMENTS FOR PLANNING OF PUBLIC BUILDINGS MEANT FOR USE OF PHYSICALLY CHALLENGED
(AS PER Part-III clause 12.21 of NBC-2005)

D-1 GENERAL

D-1.1 These requirements apply to all buildings and facilities used by the public. These apply to temporary or emergency conditions as well as permanent conditions. It does not apply to private residences.

These requirements are concerned with non-ambulatory disabilities, semi-ambulatory disabilities, sight disabilities, hearing disabilities, disabilities of in coordination, aging, allergies, heart and lung diseases, epilepsy, haemophilia, incontinence and enterostomy.

It is intended to make all buildings and facilities used by the public accessible to, and functional for the physically challenged through and within their doors, without loss of function, space or facility where the general public is concerned. It supplements the general requirements of the Code, and reflects greater concern for safety of life and limb. In case of practical difficulty, unnecessary hardship, or extreme differences, the Authority may grant exceptions from the literal requirements of this Annex or permit the use of other methods or materials, but only when it is clearly evident that equivalent facilities and protection are thereby secured.

D-1.2 For the purpose of this Annex, the following definitions shall apply.

D-1.2.1 Aging

Those manifestations of the aging processes that significantly reduce mobility, flexibility, co-ordination, and perceptiveness but are not accounted for in the categories mentioned in D-1.2.3.1 to D-1.2.3.9.

D-1.2.2 Appropriate Number

The number of a specific item that would be necessary, in accordance with the purpose and function of building or facility, to accommodate individuals with specific disabilities in proportion to the anticipated number or individuals with disabilities who would use a particular building or facility.

D-1.2.3 Disabilities

D-1.2.3.1 Non-ambulatory disabilities

Impairments that, regardless of cause or manifestation, for all practical purposes, confine individuals to wheelchairs.

D-1.2.3.2 Semi-ambulatory disabilities

Impairments that cause individuals to walk with difficulty or insecurity. Individuals using braces or crutches, amputees, arthritis, spastics and those with pulmonary and cardiac ills may be semi-ambulatory.

D-1.2.3.3 Sight disabilities

Total blindness or impairments affecting sight to the extent that the individual functioning in public areas is insecure or exposed to danger.

D-1.2.3.4 Hearing disabilities

Deafness or hearing handicaps that might make an individual insecure in public areas because he is unable to communicate or hear warning signals.

D-1.2.3.5 Disabilities of into-ordination

Faulty co-ordination or palsy from brain spinal, or peripheral nerve injury.

D-1.2.3.6 People with allergies

People with allergies may be sensitive to dust, mildew, pollen, animal hair, formalin, turpentine, etc. Some are sensitive to contact with substances and materials, such as, nickel, chromium and rubber.

D-1.2.3.7 People with heart and lung diseases

People with heart and lung diseases may only be able to walk short distances and may be unable to climb stairs. The requirements of these people are similar to those with impaired mobility.

D-1.2.3.8 People with epilepsy, hemophilia, etc

The requirements of those with epilepsy, hemophilia, etc, are related primarily to the design of buildings and the need to minimize the risk of injury caused by falling or encountering obstacles.

D-1.2.3.9 People with incontinence, enterostomy operations, etc

The requirements of people with incontinence, enterostomy operations, etc (colostomies, ileostomies and urostomies) are mainly related to bathroom provision. In certain circumstances, for example, in public water-closet compartments, it may be desirable to provide a special sink for emptying urine bags.

D-1.2.4 Fixed Turning Radius, Front Structure to Rear Structure

The turning radius of a wheelchair, left front-foot platform to right rear wheel, or right front-foot platform to left rear wheel, when pivoting on a spot.

D-1.2.5 Fixed Turning Radius Wheel

The tracking of the caster wheels and large wheels of a wheelchair when pivoting on a spot.

D-1.2.6 Involved (Involvement)

A portion or portions of the human anatomy or physiology, or both, that have a loss or impairment of normal function as a result of genesis, trauma, disease, inflammation or degeneration.

D-1.2.7 Ramps, Ramps with Gradients

Because the term 'ramp' has a multitude of meanings and uses, its use in this text is clearly defined as ramps with gradients (gradual slope joining two level surfaces) that deviate from what would otherwise be considered the normal level. An exterior ramp, as distinguished from a 'walk', would be considered an appendage to a building leading to a level above or below the existing ground level.

D-1.2.8 Walk Walks

Because the terms 'walk' and 'walks' have a multitude of meanings and uses, their use in this standard is clearly defined as a predetermined prepared surface, exterior pathway leading to or from a building or facility, or from one exterior area to another, placed on the existing ground level and not deviating from the level of the existing ground immediately adjacent.

D-2 SITE DEVELOPMENT

D-2.1 Almost any building can be made accessible to physically challenged persons by so planning the site that the terraces, retaining walls and winding walks are used effectively.

D-2.1.1 Site development is the most effective means to resolve the problems created by topography, definitive architectural designs or concepts, water table, existing streets, and typical problems, singularly or collectively, so that ingress, egress and access to buildings by physically challenged maybe facilitated while preserving the desired design and effect of the architecture.

D-2.2 Walks

D-2.2.1 Public walks should be at least 1200 mm wide and should have a gradient not greater than 1 in 20.

D-2.2.1.1 It is essential that the gradient of walks and driveways be less than that prescribed for ramps, since walks would be devoid of handrails and kerbs and would be considerably longer and more vulnerable to the elements. Walks of near maximum grade and considerable length should have level areas at intervals for purposes of rest and safety. Walks or driveways should have a non-slip surface.

D-2.2.2 Such walks shall be of a continuing common surface not interrupted by steps or abrupt changes in level.

D-2.2.3 Wherever walks cross other walks, driveways, or parking lots they should blend to a common level.

D-2.2.3.1 This requirement, does not require the elimination of kerbs, which, particularly if they occur at regular intersections, are a distinct safety feature for all of the challenged, particularly the blind. The preferred method of meeting the requirement is to have the walk incline to the level of the street. However, at principal intersections, it is vitally important that the kerbs run parallel to the street, up to the point where the walk is inclined, at which point the kerb would turn in and gradually meet the level of the walk at its highest point. A less preferred method would be to gradually bring the surface of the driveway or street to the level of the walk. The disadvantage of this method is that a blind person would not know when he has left the protection of a walk and has entered the hazards of a street or driveway (see Fig. 9).

D-2.2.4 A walk shall have a level platform at the top which is at least 1500 mm long, if a door swings the platform or towards the walk. This shall extend at least 300 mm beyond each side of the doorway.

FIG. 9 SUITABLE METHOD OF BLENDING PAVEMENT AND ROADWAY SURFACES

D-2.2.5 A walk shall have a level platform at least 900 mm deep, if the door does not swing onto the platform or towards the walk. This platform shall extend at least 300 mm beyond each side of the doorway.

D-2.3 Parking Space

D-2.3.1 Spaces that are accessible and approximate to the facility should be set aside and identified for use by individuals with physical disabilities.

D-2.3.2 A parking space open on one side, allowing room for individuals in wheelchairs or individuals on braces and crutches to get in and out of an automobile onto a level surface, is adequate. It should have a minimum width of 2700 mm preferably 2 800 mm for ambulant disabled and minimum 3 000 mm preferably 3300 mm for wheel chair users.

D-2.3.3 Parking spaces for individuals with physical disabilities when placed between two conventional diagonal or head-on parking spaces should be 3.6 m to 3.8 m wide and the length of the aisle should 7.3 m, 6.1 m and 6.5 m for head-on, 90° and 60° parking respectively.

D-2.3.4 Care in planning should be exercised, so that individuals in wheelchairs and individuals using braces and crutches are not compelled to wheel or walk behind parked cars.

D-2.3.5 Consideration should be given to the distribution of spaces for use by the disabled in accordance with the frequency and persistency of parking needs.

D-2.3.6 Walks shall be in conformity with D-2.2.

D-3 BUILDINGS

D-3.1 Ramps with Gradients

Where ramps with gradients are necessary or desired, they shall conform to the following requirements (see Fig. 10).

D-3.1.1 A ramp when provided should not have a slope greater than 1 in 20 or maximum of 1 in 12 for short distance up to 9000 mm.

D-3.1.2 A ramp shall have handrails on at least one side, and preferably two sides, that are 900 mm high, measured from the surface of the ramp, that are smooth, and that extend 300 mm beyond the top and bottom of the ramp. Where major traffic is predominantly children, the handrails should be placed 760 mm high.

NOTES

1 Where handrails are specified to be of heights other than 80 cm, it is recommended that two sets of handrails be installed to serve all people. Where major traffic is predominantly children, particularly physically disabled children, extra care should be exercised in the placement of handrails, in accordance with the nature of the facility and the age group or groups being serviced (see also D-3).

2 Care should be taken that the extension of the handrails is not in itself a hazard. Extension up to 300 mm may be made on the side of a continuing wall.

D-3.1.3 A ramp shall have a surface that is non-slip surface and if length is 3500 mm, the minimum width shall be 1500 mm.

D-3.1.3.1 The provision of non-slip surfaces on ramps greatly assists the challenged persons with semi ambulatory and ambulatory disabilities. Non-slip surfaces are provided by many finishes and materials. The surfaces of the concrete ramps can be made nonskid by brooming the surface or by finishing with an indenting roller.

FIG. 10 EXAMPLE OF RAMPED APPROACH

D-3.1.4 A ramp shall have a level platform at the top which is at least 1 800 mm long, if a door swings out onto the platform or toward the ramp. This platform shall extend at least 300 mm beyond each side of the doorway (see Fig. 11). D-3.1.5 Each ramp shall have at least 1800 mm of straight clearance at the bottom.

D-3.1.6 Ramps shall have level platforms at 10 m to 12 m intervals for purposes of rest and safety, and shall have platforms minimum 1.5 m length wherever they turn.

D-3.1.7 For visually impaired people, ramps may be colour contrasted with landing.

D-3.1.8 To minimize rise to wheelchair users, ramps should be equipped with kerbs approximately 50 mm high at exposed sides.

D-3.2 Entrances

D-3.2.1 At least one primary entrance to each building shall be usable by individuals in wheelchairs (see Fig. 12A) and shall be indicated by a sign (see Fig. 12B).

D-3.2.2 At least one entrance usable by individuals in wheelchairs shall be on a level that would make the elevators accessible.

D-3.3 Doors and Doorways

D-3.3.1 Doorwidth

To enable wheelchair users to pass through doors, the minimum clear width should be 900 mm and shall be operable by a single effort. In certain cases the clear width should be 900 mm to 1000 mm, for example, if the wheelchair has to be turned in the doorway, where there is a door-closer or at entrance doors to public buildings and in other situations where there is considerable traffic.

D-3.3.1.1 Two-leaf doors are not usable by those with disabilities defined in D-1.2.1, D-1.2.2 and D-1.2.5 unless they operate by a single effort, or unless one of the two leaves meets the requirements of D-3.3.1.

D-3.3.1.2 Side-hung doors

To facilitate wheelchair manoeuvre, doors should be hung with the hinges in room corners. Doors opening out into corridors or circulation spaces should be avoided as far as possible.

D-3.3.1.3 It is recommended that all doors have kick plates extending from the bottom of the door to at least 400 mm from the floor, or be made of a material and finish that would safely withstand the abuse they might receive from canes, crutches, wheelchair foot platforms, or wheelchair wheels.

D-3.3.2 Wheelchair Manoeuvring Space

To enable wheelchair users to approach doors manoeuvring space is needed as shown in the Fig. 13. A corridor should have a width of at least 1 200 mm to allow a 90° turn to be made through a door. In narrow spaces sliding doors may be preferable.

D.3.3.3 Thresholds

Raised thresholds should be avoided, but where this is not possible, their height should not exceed 25 mm. Rubber thresholds are advantageous for wheelchair users.

D.3.3.3.1 Care should be taken in the selection, placement and setting of door closers so that they do not prevent the use of doors by the physically disabled. Time-delay door closers are recommended.

D.3.3.3.2 Self –Closing doors

Wheelchair user and other with impaired mobility have difficulty in using self –closing doors. The force required to open them should be reduced as far as possible. Public buildings should preferably have sliding automatic doors.

D.3.3.4 Door Identification

To help people with impaired vision to see doors, the door and frame should be in a colour which contrasts with the adjoining wall. Glass or glazed doors should be marked with a coloured band or frame a little below eye-level.

D.3.3.5 Handles

Door handles and locks should be easy to manipulate. To facilitate the closing of a door by wheelchair users (for example, a white closet compartment). The door should have a horizontal handle approximately 800mm from the floor. Self –closing doors should be equipped with an easy gripped vertical pull-handle with a length of at least 300-mm, and with the lower end approximately 800mm above floor. For many people and specially those with impaired vision. It is helpful to make clear whether doors are to be pulled or pushed.

D-3.4 Windows

Windows should be designed to avoid the glare which is a particular problem for people with impaired vision. Large glass areas close to circulation spaces should be marked a little below eye-level with a coloured band or frame. To enable wheelchair users to see through a window comfortably, the sill should be easy to open and close. Their controls should be placed in the zone 900 to 1200 mm from floor (see Fig.15)

D-3.5 Stairs

Stairs should not be the only means of moving between floors. They should be supplemented by lifts or ramps.

D-3.5.1 Straight flights of steps are preferred by ambulant disabled people. Treads should be approximately 300

mm deep and risers not higher than 150 mm. Steps should be of a consistent height and depth throughout the stair. Projecting nosings and open stairs should be avoided to minimize the risk of stumbling.

FIG. 16 EXTENSION OF HANDRAIL IN STAIRS

FIG. 17 SUGGESTED PLAN OF WC COMPARTMENT FOR THE WHEELCHAIR BOUND

FIG. 18 SECTION THROUGH WC COMPARTMENT FOR THE WHEELCHAIR BOUND

D-3.5.2 Handrails should be provided to both sides of any stairway. They should be continuous and extend not less than 300 mm beyond the top and bottom step (otherwise it is difficult for the disabled to use the rail at the first and last step. See Fig 16).

D 3-3.5.3. For people with impaired vision, there should be a colour contrast between landings, and top and bottom steps of a flight of steps, or the front edge of each step should have a contrasting colour.

D-3.6 Floors

D-3.6.1. Floors shall have a non-slip surface.

D-3.6.2 Floors on a given storey shall be of a common level throughout or be connected by a ramp in accordance with D-3.1.1 to D-3.1.8

D-3.6.2.1 A gentle slope up to 10 mm may be given between the level of the floor of the corridor and the level of the floor of the toilet rooms.

D-3.6.2.2 There should not be a difference between the level of the floor of a corridor and the level of a meeting room, dining room, or any other room, unless proper ramps are provided.

D-3.7 Sanitary Facilities

It is essential that sanitary facilities, in accordance with the nature and use of a specific building or facility, be made accessible to and usable by, the physically challenged.

D-3.7.1 Sanitary facilities shall have space to allow traffic of individuals in wheelchairs (see Fig.17 and 18.)

D-3.7.2 Sanitary facilities shall have at least one water- designs demand, so that they are usable by individuals closet cubical for the ambulant disabled (see Fig. 19 in wheelchairs. and 20), that: D-3.7.3.1 The drain pipes and hot-water pipes under

- is 900 mm wide;
- is at least 1500 mm, preferably 1600 mm deep;
- has a door (where doors are used), that is, 800 mm wide and swings out;
- has handrails on each side, 780 mm high and parallel to the floor, 40 mm clearance between rail and wall, and fastened securely at ends and centre; and
- has a water-closet with the seat 500 mm from the floor.

NOTE— The design and mounting of the water-closet is of considerable importance. A wall-mounted water closet with a narrow understructure that recedes sharply is most desirable. If a floor mounted water-closet must be used, it should not have a front that is wide and perpendicular to the floor at the front of the seat. The bowl should be shallow at the front of the seat and turn backwards more than downwards to allow the individual in a wheelchair to get close to the water-closet with the seat of the wheelchair.

D-3.7.3 Sanitary facilities shall have wash basin with narrow aprons. Which when mounted at standard height are usable by individuals in wheelchair : or they shall have wash basins mounted higher, when particular designs demand, so that they are usable by individuals In wheelchair.

FIG. 19 SUGGESTED PLAN WC COMPARTMENT FOR THE AMBULANT

D-3.7.3.1 The drain pipes and hot-water pipes under a sanitary appliance that be covered or insulated so that a wheelchair individual do not find it inconvenient.

D-3.7.4 Some mirrors and shelves shall be provided above the wash basins at a height as low as possible and not higher than 1 m above the floor, measured from the top of the shelf and the bottom of the mirror.

D-3.7.5 Sanitary facilities for men shall have wall mounted urinals with the opening of the basin 460 mm from the floor, or shall have floor-mounted urinals that are on level with the main floor of the toilet room.

D-3.7.6 Toilet rooms shall have an appropriate number of towel racks, towel dispensers, and other dispensers and disposal units mounted not higher than 910 mm from the floor.

D-3.8 Drinking Fountains

An appropriate number of drinking fountains or other

D-3.7.3 Sanitary facilities shall have wash basins with water-dispensing means shall be accessible to and usable by the physically disabled. narrow aprons, which when mounted at standard height are usable by individuals in wheelchairs: or they shall

D-3.8.1 Drinking water fountains or water coolers . have wash basins mounted higher, when particular shall have up front spouts and control.

D-3.8.2 Drinking water fountains or water coolers shall be hand-operated, or hand and foot-operated.

D-3.8.2.1 Conventional floor mounted water coolers may be convenient to individuals in wheelchairs if a small fountain is mounted on the side of the cooler 800 mm above the floor.

D-3.8.2.2 Fully recessed drinking water fountains are not recommended.

D-3.8.2.3 Drinking water fountains should not beset into an alcove unless the alcove is wider than a wheelchair.

D-3.9 Public Telephones

An appropriate number of public telephones should be made accessible to and usable by the physically disabled.

NOTE — The conventional public telephone booth is not usable by most physically disabled individuals. There are many ways in which public telephones may be made accessible and usable. It is recommended that architects and builders confer with the telephone companies in the planning of the building or facility.

D-3.9.1 Such telephones should be kept so that the dial is placed at minimum 1 200 mm from floor and the handset may be reached by individuals in wheelchairs.

D-3.10 Handrails

Handrails are used as a vocational and mobility aid by blind and visually impaired people, and as a support for people with mobility impairments. The handrail should be securely fitted to the wall to withstand heavy pressure. Handrails should turn in towards the wall at either end.

All dimensions in millimetres.

FIG. 21 FIXING OF HAND RAIL

D-3.10.1 Handrails should be approximately 900 mm from the floor. The rail should be easy to grip, having a circular section with a diameter of approximately 40 mm and fixed as shown in

D-3.10.2 To aid identification, the color of the rail should contrast with the wall behind.

D-3.11 Elevators

In a multi-storey building, elevators are essential to the successful functioning of physically disabled individuals. They shall conform to the requirements given in D-3.11.1 and D-3.11.2.

D-3.11.1 Elevators shall be accessible to, and usable by the physically disabled on the level that they use to enter the building, and at all levels normally used by the general public.

D-3.11.2 Elevators shall allow for traffic by wheelchairs (see also D-3.3).

D-3.12 Controls

It is advantageous for wheelchair users if controls are placed at low level. For visually impaired people, they should be at eye-level.

D-3.12.1 To enable wheelchair users to reach controls while not placing them too low for visually impaired people, controls should be in the zone 500 mm to 1200 mm from the floor. It is advantageous if controls in, for example, lifts are placed at an angle of approximately 45° to the wall so that they are easier to read and operate. To cater for wheelchair users, controls should be placed not less than 400 mm from room corners. All the power and electric points should be placed at one metre above the floor level and should not project outside walls.

D-3.12.2 Again, to cater for visually impaired people, controls should be colour-contrasted with backgrounds. Information should preferably be in relief for tactile reading.

D-3.12.3 To aid operation for people with impaired co-ordination or impaired vision, switches, etc, should have large push plates.

D-3.12.4 Controls for powered door openers to hinged doors should be located so that the doors do not conflict with wheelchairs, sticks, walking aids, etc.

D-3.12.5 To facilitate operation for people with limited strength in arms and hands, handles should be easy to grip and turn.

D-3.13 Identification

Appropriate identification of specific facilities within a building used by the public is particularly essential to the blind.

D-3.13.1 Raised letters or numbers shall be used to identify rooms or offices.

D-3.13.2 Such identification should be placed on the wall, to left of the door, preferably at a height of 1500 mm from the floor.

D-3.13.3 Doors that are not intended for normal use, and that might prove dangerous if a blind person were to exit or enter by them, should be made quickly identifiable to the touch by knurling the door handle or knob (see Fig. 22).

D-3.14 Warning Signals

D-3.14.1 Audible warning signals shall be accompanied by simultaneous visual signals for the benefit of those with hearing disabilities.

D-3.14.2 Visual signals shall be accompanied by simultaneous audible signals for the benefit of the blind. To assist blind people, lettering and symbols on signs should be in relief for tactile reading.

D-3.14.3 Signs should be designed and located so that they are easy to read. For visually impaired people, signs should preferably be at eye-level and it should be possible to approach them closely. Text and symbols should be color-contrasted with the background. The letters should not be less than 12 mm high.

D-3.14.4 Signs should be well illuminated and surfaces should not cause mirroring or reflections. Signs should not be behind glass or similar materials.

D-3.14.5 Information based on colour codes only should be avoided; colorblind people may find them difficult to understand.

D-3.15 Work Bench

This should be at least 800 mm wide, 600 mm deep and 650 mm to 700 mm high. For wheelchair users, the convenient height of work tops is between 750 mm and 850 mm; flexible provision is preferred. Further, for wheelchair access to a work bench, wash basin or table, a clear space for knees and footrests is needed.

D-3.16 Hazards

Every effort shall be exercised to obviate hazards to individuals with physical disabilities.

D-3.16.1 Access panels or manholes in floors, walks, and walls may be extremely hazardous, particularly when in use, and should be avoided.

D-3.16.2 When manholes or access panels are open and in use, or when an open excavation exists on a site, particularly when it is in proximity of normal pedestrian traffic, barricades shall be placed on all open sides, at least 8.5 m from the hazard, and warning devices shall be installed in accordance with D-3.14.2.

D-3.16.3 Low-hanging door closers that remain within the opening of a doorway, when the door is open or that protrude hazardously into regular corridors or traffic ways when the door is closed, shall be avoided.

D-3.16.4 Low-hanging signs, ceiling lights, and similar objects or signs and fixtures that protrude into regular corridors or traffic way shall be avoided. A minimum height of 2.1 m measured from the floor is recommended.

D-3.16.5 Ramps shall be adequately lighted. D-3.16.6 Exit signs shall be in accordance with good practices [3(5)].

D-3.16.7 Equipment and materials causing allergic reactions should as far as possible be avoided in dwellings and buildings.

D-4 DESIGNING FOR CHILDREN

The dimensions given in this Annex are for adults of average stature. In designing buildings for use by children, it may be necessary to alter some dimensions, such as, height of handrails, in accordance with accepted standards [3(6)].

D-5 For additional information regarding other facilities and conveniences required in buildings meant for use of physically challenged, reference may be made to accepted standards [3(7)].

ANNEXURE – VI
(Rule-15.a.vii)

GOVERNMENT OF ANDHRA PRADESH
ABSTRACT

Conservation and Harvesting of Rain water Structures in construction of buildings in all Municipal Corporations / Urban Development Authorities / Municipalities - Orders - Issued.

MUNICIPAL ADMINISTRATION & URBAN DEVELOPMENT (M1) DEPARTMENT

G.O.Ms.No.350 M.A.,

Dated:9th June,2000

Read the following:-

1. G.O.Ms.No.422 M.A., dt.31.07.1998.
2. G.O.Ms.No.423 M.A., dt.31.07.1998
3. G.O.Ms.No.611 M.A., dt.26.10.1999

* * *

ORDER:-

The ever increasing population and its increasing trend concentration in urban areas has a direct effect on the availability of water. The excess tapping of ground water and absence of its recharge has lead to depletion of ground water table to greater extent. This is evident from the increasing number of dry bore wells and digging of bore wells to a greater depth of every new bore well that is taken up. Most of the urban area is in their paved or covered by buildings leaving little scope for charging the ground water during the monsoons.

Keeping in view the above, provisions have already been made in G.O.s 1st to 3rd read above that it is mandatory to provide required facilities land infrastructure for conservation and harvesting of rain water in all Group Housing and commercial

Further there have been number of representations and provisions from environmentalists to make it mandatory the provisions of such rain water harvesting structure of all types or buildings including residential buildings as large parts of the towns are covered by residential layouts.

Government after careful examination of the matter decided to make the provisions for rain water harvesting contained in the third read above as mandatory for all categories of proposed buildings including residential buildings on the interest of rural public. Accordingly the following orders issued.

1. The Competent Authorities i.e., Director of Town and Country Planning, Vice Chairman of Urban Development Authorities, Commissioners of Municipal Corporations/Municipalities shall insist for facilities and infrastructure for conservation and harvesting rain water in all layouts and sub division for sanctioning the same.
2. Every building proposed for constructing plots having extent of 300 Sq. Mtrs. and above shall be provided with required facilities and infrastructure for conservation and harvesting of rain water viz. Part-A is compulsory and part-B & C or D is optional.
3. All existing buildings in Municipalities / Municipal Corporations shall construct rainwater harvesting the structure within a period of one year from the issue of this G.O.

Percolation pits or Trenches

The paved surface around the building shall have percolation pits or Trenches or combination of pits & Trenches in such a way that total volume of such structure shall not less than 6 cum for each 100 Sq.Metres of roof top area and multiples there on. Depending on the geomorphological and topographical condition, the pits can of size 1.2m wide x 1.2 m long x depth of 2 to 2.5 m. The trenches can of width of 0.6 x length of 2 to 6m x depth of 1.5 to 2.0 meters terrace water shall be channeled, to pits and or trenches. The pits shall be back filled with filter media comprising of the following materials.

- i) 40 mm Road metals the bottom layer upto 50% of the depth.
- ii) 20 mm road metal as the lower middle layer upto 20% of the depth.
- iii) Course sand as the upper middle layer upto 20% of the depth.
- iv) Top 10% of the Pits/Trenches will be empty and a splash pad is to be provided in such a way that roof top water falls on the splash pad.
- v) Brick masonry wall is to be constructed and cement mortar plastered on the exposed surface. The depth of wall below the ground shall be in such a way that the wall prevents loose soil going into pits/Trenches. The projection of the all above ground could be minimum of 15 cm.
- vi) Perforated concrete slabs shall be provided on the pits and trenches.

Terrace water collection

The terrace shall be connected to a sump or the wall through a filtering tank by PVC pipe. A value system shall be incorporated to enable the first part of the rain water collected to discharge out to the ground, if it is dirty.

A filtering tank measuring 1mx1mx1m meter can be constructed near sump. The tank can be divided by a portion slab and the one part shall be filled by fine sand and by coarse sand. The bottom portion of the tank should have a slope to avoid stagnation of water.

Open ground;-

Whenever there is an open ground, the top soil shall be removed over a portion of the ground and back filled with coarse sand to allow percolation of rain water.

(or)

Any other methods proved to be effective in conservation and harvesting of rainwater may be adopted each and every construction taken up.

The Commissioners of all Urban Local Bodies shall open a "rain water harvesting cell" to motivate existing building owners to implement the scheme before the arrival of monsoons and take up area wise interactive programme at regular intervals to educate the people on the importance of Ground water recharging and Rain water Harvesting / Water Conservation.

Failure to follow the above orders by the concerned and for penal action u/s 41 of A.P. Urban Development Authority Act, 1975 or U/s 596 & 597 of Hyderabad Municipal Corporation Act, 1955 or U/s 340 of A.P. Municipalities Act, 1965 as the case may be.

A copy of this order is available on the internet and to be accessed at the address <http://apts.gov.in/apgos>.

(BY ORDER AND IN THE NAME OF THE GOVERNOR OF ANDHRA PRADESH)

N.S.HARIHARAN
PRINCIPAL SECRETARY TO GOVERNMENT

ANNEXURE – IX

[Rule-29(a)]

.....(ULB)

REGULATIONS FOR REGISTRATION OF LICENSED BUILDER / REAL ESTATE DEVELOPER / FIRM

1. **Short Title, extent and applicability:**

- 1.1. **Short Title:** These regulations may be called “**Regulations for Builder / Real Estate Developer / Firm License of.....(ULB)**”.
- 1.2. **Extent:** These regulations shall apply to the entire area of(ULB)
- 1.3. **Applicability:** These regulations shall apply to the building activity in accordance with the provisions of A.P. Building Rules-2012 and as amended from time to time.

2. **Definitions:**

For the purpose of these regulations, the following definitions shall have the meaning indicated against each:

- 2.1. **‘Act’** means,(the relevant act) and as amended from time to time.
- 2.2. **‘Approved’** means, approved by the authority having jurisdiction.
- 2.3. **‘Authority’** having jurisdiction means, the Commissioner or an officer authorized by him to administer these regulations.
- 2.4. **‘Commercial complex’** means, the commercial building proposed for a plot area having more than 300 Sq.mts and above 10 Mtrs height.
- 2.5. **‘Licensed Builder / Real Estate Developer’** means, the Builder / Real Estate Developer / Firm who has been licensed by the Authority.

3. **General Requirements for License:**

- 3.1. Person who applies for license as a Builder shall be a graduate in Architecture or Civil Engineering or in Construction Management or equivalent educational qualifications or 5 years of experience as Class – II Civil Contractor.
- or**
- 3.2. A Company which applies for a License as a Real Estate Developer / Firm shall submit the application by an authorized qualified person on behalf of the Company and the company should employ a qualified person as prescribed in Rule 3.1 and submit the particulars of the person appointed and such company shall be registered.
- or**
- 3.3. The Builder / Real Estate Developer who is in the profession of construction activity as on date of notification of revised building rules, is also eligible for license provided that he shall submit the proof of Income Tax Assessment for the past five years that he is engaged in the profession of Builder / Real Estate Developer. A copy of PAN Card shall be submitted along with the application.

4. **The Licensing Authority and Procedure for obtaining License:**

- 4.1. The Commissioner or an officer authorized by him is the authority for issuing the license for practicing the profession of Builder / Real Estate Developer / Firm.
- 4.2. The fee for License shall be as per the Schedule of Rates as approved by the Municipal Corporation from time to time.
- 4.3. The format of application for obtaining license as Builder / Real Estate Developer / Firm is as at Form – 1. The applicant shall apply in the prescribed form duly enclosing the required copies of certificates and duly paying the prescribed fee.
- 4.4. Form of Certificate of License for Builder / Real Estate Developer / Firm is as given at Form – 2.
- 4.5. A register of licensed Builder / Real Estate Developer / Firm shall be maintained by the(ULB) and up to date list of such licensed Builder / Real Estate Developer / Firm showing the addresses and the period for which the licenses are valid shall be kept for inspection in the office of the(ULB) during the office hours.

5. **Conditions for issuing License:**

- 5.1. The Authority has the right to cancel the license for contravention of any of the provisions of the Act, Rules or Bye-laws framed there under or for contravention of any of the conditions of the license or for failure in discharging the duties and responsibilities as prescribed in these regulations.
- 5.2. In case the license is cancelled, he is not eligible for obtaining a fresh license and for practicing as a Builder / Developer / Firm for a period of three (3) years from the date of cancellation.
- 5.3. If for any reason the license is cancelled, the licensed Builder / Real Estate Developer / Firm shall return the license to the Authority within 24 hours of such cancellation.
- 5.4. Every application for the renewal of license shall be submitted to the(ULB) together with a renewal fee as prescribed from time to time and shall be accompanied by the license in respect of which the renewal is required.

6. **Duties and Responsibilities of Builder / Real Estate Developer / Firm:**

- 6.1. F Construction to be Commenced Before									
G Construction to be Completed Before									
The Building permission is sanctioned subject to following conditions:									
Commissioner									

The Building permission is sanctioned subject to following conditions:

1. **The permission accorded does not confer any ownership rights, At a later stage if it is found that the documents are false and fabricated the permission will be revoked.**
2. **If construction is not commenced within one year, building application shall be submitted afresh duly paying required fees.**
3. **Sanctioned Plan** shall be followed strictly while making the construction & shall be displayed at the site.
4. **Commencement Notice** shall be submitted by the applicant before commencement of the building.
5. **Completion Notice** shall be submitted after completion of the building.
6. **Occupancy Certificate** is compulsory before occupying any building.
7. **Public Amenities** such as Water Supply, Electricity Connections will be provided only on production of occupancy certificate.
8. **Prior Approval should be obtained separately for any modification in the construction.**
9. **Tree Plantation** shall be done along the periphery and also in front of the premises.
10. **Tot-lot** shall be fenced and shall be maintained as greenery at owners cost before issue of occupancy certificate.
11. **Rain Water Harvesting Structure** (percolation pit) shall be constructed.
12. **Space for Transformer** shall be provided in the site keeping the safety of the residents in view.
13. **Garbage House** shall be made within the premises.
14. **Cellar and stilts approved for parking** in the plan should be used exclusively for parking of vehicles without partition walls & rolling shutters and the same should not be converted or misused for any other purpose.
15. This sanction is accorded on surrendering of **Road affected portion of the site** to(ULB) at free of cost with out claiming any compensation at any time as per the undertaking submitted.
16. **Stocking of Building Materials** on footpath and road margin causing obstruction to free movement of public & vehicles shall not be done, failing which permission is liable to be suspended.
17. The Developer/Builder/Owner to provide service road wherever required with specified standards at their own cost.
18. A safe distance from Electrical Lines shall be followed as per rules.
19. If greenery is not maintained 10% additional property tax shall be imposed as penalty every year till the condition is fulfilled.
20. All Public and Semi Public buildings shall provide facilities to physically handicapped persons.
21. The mortgaged built up area shall be allowed for registration only after an Occupancy Certificate is produced.
22. The Registration authority shall register only the permitted built up area as per sanctioned plan.
23. The Financial Agencies and Institutions shall extend loans facilities only to the permitted built up area.
24. The Services like Sanitation, Plumbing, Fire Safety requirements, lifts, electrical installations etc., shall be executed under the supervision of Qualified Technical Personnel.
25. **Architect / Structural Engineer** if changed, the consent of the previous Architect / Structural Engineer is required and to be intimated to the Commissioner.
26. Construction shall be covered under the contractors all risk Insurance till the issue of occupancy certificate (wherever applicable).
27. **As per the undertaking executed in terms of A.P. Building Rules-2012,**
 - a. The construction shall be done by the owner, only in accordance with sanctioned Plan under the strict supervision of the Architect, Structural Engineer and site engineer failing which the violations are liable for demolition besides legal action.
 - b. The owner, builder, Architect, Structural Engineer and site engineer are jointly & severely responsible to carry out and complete the construction strictly in accordance with sanctioned plan.
 - c. The Owner, Builder, Architect, Structural Engineer and Site Engineer are jointly and severely are held responsible for the structural stability during the building construction and should strictly adhere to all the conditions.
 - d. The Owner / Builder should not deliver the possession of any part of built up area of the building, by way of Sale / Lease unless and until Occupancy Certificate is obtained from ULB after providing all the regular service connections to each portion of the building and duly submitting the following.
 - (i) Building Completion Notice issued by the LTP duly certifying that the building is completed as per the sanctioned plan.
 - (ii) Structural Stability Certificate issued by the Structural Engineer duly certifying that the building is structurally safe and the construction is in accordance with the specified designs.
 - (iii) An extract of the site registers containing inspection reports of Site Engineer, Structural Engineer and Architect.
 - (iv) Insurance Policy for the completed building for a minimum period of three years.

D	Inspection Report (To be filled by inspecting officer)		Inspected on	d	d	m	m	y	y	y	y
			Inspected the site and its surroundings and verified the measurements, Schedule of boundaries documents etc. of the site under reference.								
E	Ground Position										
1	Site falls in Approved Layout Area										
2	Site is a Regularized Plot										
3	Site falls in already developed area										
4	Site falls in unapproved layout area										
5	Plain Land / Undulated / Elevated from road level / Below the road level /										
7	Site enclosed with Fence / Compound wall / No Compound wall / Boundary Stones if no compound wall										
8	Work Commenced / Not Commenced										
9	If commenced, the status of construction at the time of inspection										
10	Site Surrounded by (physical features)										
	EAST										
	SOUTH										
	WEST										
	NORTH										
11	Whether the above physical features are tallying / Not tallying with the schedule of the Documents.		YES			NO					
			Remarks								
F	Restrictions of building activity in the vicinity of certain areas: (Vide Rule 3) Whether the site falls in the area where there are restrictions of building activity as stated in the A.P. Building Rules – 2012.		YES			NO					
			If yes, give the details and specify the action to be taken:								

G Location of the Site (vide rule 4 of A.P. Building Rules 2012)							
1 SITES IN OLD/EXISTING BUILT-UP AREAS / CONGESTED AREAS / SETTLEMENT (GRAM KHANTAM/ABADI)							
A	Areas of Annexure I	Minimum abutting road width required (in m)	Specify the area:				
			Ward No.	Block No.	Name of the Locality		
	All Buildings (Other than Group Housing) – Maximum permissible up to 10m height	9*					
*In case of Sites in Category-A, if a Site is abutting to a road which is less than 9m in width, a building may be permitted with a maximum height of 10m in such site, after leaving 4.5m from the Centre Line of such road for widening and the same shall be handed over to the Local Body and shall leave the prescribed setback as per Table-III after the said road widening portion. No relaxations are permissible in such cases.							
B SITES IN NEW AREAS / APPROVED LAYOUT AREAS The type of buildings & intensity of development shall be w.r.t. the abutting road width, viz.,							
1	Specify the area:		Ward No.	Block No.	Name of Locality		
2	Proposal falls in (Tick appropriate type)		B1	B2	B3	B4	
	Minimum abutting road width required (in m)		9**	12	18	30m & above	
3	Road width as per ground position						
**In case of Sites in Category-B, if a Site is abutting to a road which is less than 9m in width, individual residential building may be permitted with a maximum height of 12m, after leaving 4.5m from the Centre Line of such road for widening and the same shall be handed over to the Local Body and shall leave the prescribed setback as per Table-III after the said road widening portion. No relaxations are permissible in such cases.							
4	IF THE PROPOSALS ARE FOR HIGH RISE BUIDLING, WHETHER IT IS PERMISSIBLE IN THE SITE		YES		NO		
	REMARKS						
H Land Use							
1	Whether the Extract of Land Use Map of MP/ZDP is enclosed			YES		NO	
2	Land Use in which the site falls as per of MP/ZDP						
3	Proposed Use of the Building						
4	Whether permissible as per Zoning Regulations			YES		NO	
5	Whether the site falls in the category of the uses permissible as per						
a	GOMS.NO.508 M.A. dt 15.11.02 (in GHMC area)						
b	GOMS.NO.766 M.A. dt 18.10.07 (in GHMC area)						
c							
d							
e							
f							
I Access (in m)							
1	Direction	Min. required road width	Existing road width	Proposed road width as per ZDP/RDP/MP/ as per rule-4(b)/(c)	Affected in road widening		Remarks
					Depth	Area (Sq. m)	
	East						
	South						
	West						
	North						
2	If the site u/r is affected in road widening, whether the road affected portion has been handed over already?					YES	NO

3	Whether the road is already formed in the widened portion		YES	NO				
4	Whether the road widening portion has been handed over free of cost by the applicant in full extent. If yes, when was it handed over?		YES	NO				
5	Whether the applicant has agreed to hand over the advance possession of the area affected physically at site free of cost through a prescribed undertaking and plan showing affected area.		YES	NO				
6	Whether the applicant is eligible to claim any relaxations as per rule -16		YES	NO				
7	If Yes, whether the applicant is claiming any relaxations		YES	NO				
8	If so, what are the relaxations being claimed							
9	If so, give the permissible details as per A.P. Building Rules-2012.		Total Permissible Floor area (m ²)					
	Permissible floor area before road widening = a Areas effected in road widening = b Total permissible floor areas = a + b		Proposed Floor area (m ²)					
			Remarks					
J	Details of Plot area (in Sq. m)							
1	Total Plot Area as per Documents	Total Plot Area as per Site	Affected area, if any	Net Plot Area				
2	Whether the site involves a sub-division of plot / land.		YES	NO				
3	If yes, whether the residual plot fulfils the minimum requirements as per rules.		YES	NO				
4	If yes, sub-division charges are to be collected		YES	NO				
K	Height of the Building (in m.) (vide rule 5 (a), (b); Table III & IV)		Net Plot area (m ²)	No. of floors				
S. No.	Item	Permissible Height		Proposed Height		Excess / Shortfall		Remarks
		Stilt/ Ground	Upper floors	Stilt/ Ground	Upper floors	Stilt/ Ground	Upper floors	
1	As per A.P Building Rules 2012 (vide Rule 5 (a), (b); & Table III, IV & conditions)							
2	As per NOC of AAI							
3	As per Approved Plan of A.P. State Disasters Response & Fire Services Department. (vide Rule 5(f)(xv)							
As per the provisions of the A.P. Fire Service Act, 1999, Residential buildings of height more than 18 m, Commercial buildings of height 15m and above and buildings of public congregation like Educational Buildings, Cinema Theatres, Function Halls and other Assembly Buildings on plot area of 500Sq.m. and above or of height above 6m are required to obtain prior clearance from A.P. State Disasters Response & Fire Services Department from fire safety point of view.								
L	All-round Open Spaces (all in mts) (vide rule 5 (a), (b); Table III & IV)							
1	Plot area (Net area) (in m ²)							
2	Height of the proposed building excluding the parking floors (in m.)							
Sides	Direction	Road width (in m)	Set back (in m)		Remarks

ii	above 10m & up to 15m	2m	R					
			S1					
			S2					
6	Whether the proposals are more than 1 block (vide rule 5(f)(xii), (Table-iii) / 7(a)(xi), (Table-iv))		YES		NO			
	Space between two blocks shall not be less than the site setbacks of tallest block as per Table III & IV as the case may be		Height of the block (m)					
			Between 2 Blocks		Required	Proposed	Remarks	
M Lighting and Ventilation [vide rule 5(f)(xi) / 7(a)(xiv)]								
1	Whether the lighting and ventilation of a building is through the means of a chowk		YES			NO		
			Minimum area			Minimum width		

	or inner courtyard or interior open space/duct	Required 9/25 m ²	Proposed	Remarks	Required 2/3 m	Proposed	Remarks
2	If there are no ducts, whether the lighting and ventilation proposed for the building is satisfying the rules	YES	NO	Remarks			
3	Ventilation to parking floors i.e. cellar & sub-cellars	Required	Provided	Remarks			
		2.5% of each parking floor area					
4	Width of the corridors (m)	2.0					

N Greenery/Lawn [vide rule 5(f)(iii),(iv) / 7(a)(viii) whichever is applicable] :

1	A strip of at least 1.0 m greenery / lawn along the frontage of the site within the front setback.	Marked on the plans and hence Satisfied	
		Not Marked on the plans and hence not satisfied	
2	For the plots area above 300 m ² from the 1 mt Greenery/lawn along the front and periphery are left.	Marked on the plans and hence Satisfied	
		Not Marked on the plans and hence not satisfied	
3	For high rise buildings a minimum 2 mt Greenery/lawn along the front and periphery are left.	Marked on the plans and hence Satisfied	
		Not Marked on the plans and hence not satisfied	

0	Recreational open space (Tot-lot) [vide rule 5(f)(v) / 7(a)(vii) / 8(g) whichever is applicable] (To be provided for all residential / institutional / industrial plots above 750 m² of plot area)					
1	Proposed Use of the Building	Residential	Institutional	Industrial	Others	
2	Plot area of the site m ²					
3	Permissible	Proposed		Excess / Shortfall		Remarks
	%	in m ²	%	in m ²	%	
4	No. of Locations where this open space is provided					
5	Minimum width of 3m and extent not less than 15 m ² in case of Non-High Rise Buildings (rule-5(f)(v) and 50m ² in case of High Rise Buildings (rule-7(a)(vii) is provided				YES	NO

P	Public Utility [vide rule 5(f)(vii)]			
1	For Plots 750 m ² and above, whether an area of 3m x 3m for the purpose of setting of public utilities like Distribution transformer etc., is provided within the owners site subject to mandated public safety requirements.	YES	NO	
		(If yes, Provided towards):		
2	Whether the space for garbage bin is proposed	YES	NO	
3	Whether the drainage & water lines are existing	YES	NO	
4	If so, whether the same is indicated on the plans			

Q	Common amenities & facilities [vide rule 15(x)]					
1	No. of Units proposed					
2	Whether Common amenities & facilities like convenient shopping, committee hall / club house, crèche, gymnasium etc. are required (where no. of units are more than 100)	YES	NO			
3	If Yes, the extent of Built up area for Common amenities & facilities provided	Required		Provided		Remarks
		% to total Built up area	Extent (m ²)	% to total Built up area	Extent (m ²)	
		3				

R	Parking Space [vide rule 13 & table V & rule 15(a)(iv)]	
	(Rule 5 (d) & 13(c)(iv))	In m²
1	Cellar 1	
2	Cellar 2	
3	Cellar 3	
4	Cellar 4	
5	Stilt	
6	Any upper floor	

7	Visitors Parking area (Space over & above 6m (excluding green strip) set back is considered) <i>(rule 13(c)(xii))</i>				
8	TOTAL PARKING AREA (m²)				
9	Proposed Built Up Area(m²)	a	Residential		
		b	Commercial		
		c	Institutional		
		d			
		Total			
10	Parking area to total built up area	%

a					
b					
c					
d					
13	Facilities provided in the stilt floor <i>(rule 13.c.vi)</i>		Required M²	Proposed M²	Remarks
			< 25		
14	The parking spaces should be efficiently designed and clearly marked and provided with adequate access, aisle, drives and ramps required for manoeuvring of vehicles. <i>(rule 13.c.ii)</i>		Permissible(m)	Proposed(m)	Remarks
15	Minimum width of Single Ramp <i>(rule 13.c.vii)</i>		5.4		
16	Minimum width of ramps if proposed more than one ramp <i>(rule 13.c.vii)</i>		3.6		
17	Minimum Setbacks for Cellars from ground level				
a	For sites of extent of up to 1000sq.m <i>(rule 13.c.x)</i>		1.5		
b	For sites of extent of above 1000sq.m up to 2000 m ² <i>(rule 13.c.x)</i>		2.0		
c	For sites of extent of above 2000sq.m <i>(rule 13.c.x)</i>		3.0		
d	Minimum Setback in case of more than one cellar <i>(rule 13.c.x)</i>		0.5 m additional setback for every additional cellar floor		
18	Cellar area proposed for utilities & non habitable purposes like A/C Plant room, Generator room, STP, Electrical installations, Laundry, etc, <i>(rule 13.c.xi)</i>		10%		
19	Height of the Cellar floor proposed (m)		Minimum 2.5		
			Maximum 4.5 in case of mechanical system		
20	Height of the Stilt Floor proposed (m)		Minimum 2.5		
PART: V	SPECIAL CATEGORY BUILDING INFORMATION In continuation of the above data, following information shall be filled up, if the building proposed is one of the following special buildings.				
	SPECIFY THE TYPE OF BUILDING		Tick the relevant item		
A	HIGH RISE BUILDINGS/COMPLEXES <i>[vide rule 7.a]</i>				
B	TOWER AND PODIUM TYPE BUILDING <i>[vide rule 7.b]</i>				
C	"STEPPED TYPE" OR "PYRAMIDAL TYPE" BUILDING <i>[vide rule 7.c]</i>				
D	GROUP DEVELOPMENT SCHEMES <i>[vide rule 8.]</i>				
E	ROW TYPE HOUSING / ROW TYPE SHOPPING PRECINCTS <i>[vide rule 9]</i>				
F	CLUSTER HOUSING <i>[vide rule 10]</i>				
G	BUILDINGS WITH CENTRAL COURT-YARDS FOR COMMERCIAL USE <i>[vide rule 12]</i>				

HIGH RISE BUILDING /COMPLEXES [vide rule 7.a] [FOR 'B' & 'C' ALSO THE FOLLOWING INFORMATION EXCEPT SET BACK REQUIREMENTS SHALL BE FILLED UP]*						
1	WHETHER THE SITE IS ELIGIBLE FOR HIGH-RISE BUILDING [vide rule 7]	YES		NO		
		Remarks				
2	Minimum size of plot (in sq. m) [vide rule 7.a.ii] "In respect of site proposed for high rise buildings and affected in road widening where there is shortfall of the net plot size, up to 10% of such shortfall in net plot area would be considered with the proposed height and corresponding minimum all round setbacks".	Required	Provided		Remarks	
		2000 Without road widening				
		1800 With road widening				
3	NOC from Airport Authority of India is obtained [vide rule 7.a.v]	YES		NO		
4	If Yes , AAI letter No. & date					
5	Height Permitted by AAI	MSL (ground)	MSL (construction)	Height		
6	NOC form Fire Services Department is obtained [vide rule 7.a.vi]	YES		NO		
7	If Yes, Letter No. & date of approval of Fire Services Department					
8	No. of Floors permitted by Fire Services Department					
9	Height Permitted (in m) by Fire Services Department					
10	Use of the proposed building permitted by Fire Services Department					
11	Setbacks permitted (in m) by Fire Services Department	Front	Rear	Side1	Side2	
12	Whether the plans submitted are tallying with the Plans permitted by the Fire Services Department					
13	Whether there are proposals for transfer of setbacks in case of buildings of height less than 30m [vide rule 7.a.xii]	YES		NO		
		If Yes, give the details				
		Side	Permissible setback	Provided setback	Permissible plinth area without transfer m²	Proposed plinth area after transfer m²

					Area(m²)	Width(m)	Area(m²)	Width (m)
					50	3		
5	Type of Buildings proposed (Tick appropriate item)							
a	Group Housing	Non High Rise						
		High Rise						
b	Row Housing							
c	Cluster Housing							
6	A thorough public access road of width (m) with 2-lane black-topped is proposed on any one side at the periphery. <i>[vide rule 8.k.]</i>				Required	Proposed	Remarks	
					12			
7	Common amenities & facilities like shopping center, community hall or center / club house etc. in case where the units are above 100. <i>[vide rule 15.a.x]</i>				3 % of the built up area			
8	In case of Row Housing & Cluster Housing Projects of more than 5 ac Common amenities & facilities like shopping center, community hall or center / club house <i>[vide rule 9.o & 10.i]</i>				5 % of the site area			
E	ROW TYPE HOUSING / ROW TYPE SHOPPING PRECINCTS <i>[vide rule 9]</i>							
			Required	Provided	Remarks			
1	Minimum site area (sq. m)		1000					
2	Minimum size of individual plot / Row shops (sq. m)		50					
3	No. of plots in a Row Housing		8					
4	Separation between two blocks (m)		6.0					
5	Minimum width of internal roads(m)		9.0					
6	Width of Internal cul-de-sac road with maximum length of 50m (m)		6.0					
7	Minimum open space area		10% of total area					
8	Height of the building for plot up to 125 sq. m		2 floors Or 6m					
9	Height of the building for plot above 125 sq. m		G+2 floors					
10	Setbacks (m) (The setbacks in a row can be interchangeable)			Required	Provided	Remarks		
a	Front			3				
b	Rear			1.5				
c	In case of row type shopping precincts, back to back shops front setback of 3m is allowed.							
11	In case of projects more than 5 acres common amenities & facilities are required to be provided with 5% of the Site Area. <i>[vide rule 9.o.]</i>							
12	Parking Area (sq. m)							
F	CLUSTER HOUSING <i>[vide rule 10]</i>							
			Required	Provided	Remarks			
1	Minimum site area (sq. m)		1000					
2	Minimum size of plot (sq. m)		25					
3	Maximum no. of Houses in cluster		20					

4	Minimum size of cluster open space(sq. m)	36		
5	Minimum width of cluster open space(m)	6		
6	Height of the building (m)	2 floors or 6m		
7	Minimum access road in (m)	9		
8	Internal access (m)	6		
9	Minimum space between two clusters (m)	6		
10	Setbacks shall be as per building line as per Table III			
a	Front			
b	Rear			
c	Side 1			
d	Side 2			
11	In case of projects more than 5 acres common amenities & facilities are required to be provided with 5% of the Site Area. [vide rule 10(i)]			
G BUILDINGS WITH CENTRAL COURT-YARD [vide rule 12]				
	Setback (m)	Required	Provided	Remarks
1	Front			
2	Rear			
3	S1			
4	S2			
5	Area so saved which is transferred in the Central Court-yard (sq. m)			
6	Depth of Court yard which shall be at least 50% of the proposed 'U' type building depth (m)			
PART VI PROVISION FOR EWS / LIG CATEGORY(Rule 11)				
1	Site (m ²)			
2	Whether EWS / LIG need to be provided	YES	NO	
3	IF Yes, developed area reserved for EWS/LIG (m ²)	Required	Provided	
PART VII OTHER DOCUMENTS TO BE SUBMITTED				
A COMPLIANCE BY OWNER FOR ENSURING CONSTRUCTION IS UNDERTAKEN AS PER SANCTIONED PLAN [vide rule 25]				
1	Whether Affidavit/Declaration duly Notarised is submitted [vide rule 25.a]	YES	NO	
		Remarks		
2	Floor or 10% of the total built-up area proposed to be handed over [vide rule 25.d]	Required	Proposed	Remarks
	Ground floor			
	First floor			
	Second floor			
3	In respect of gated development schemes like row houses / independent houses / cluster housing 5% of the units shall be handed over to sanctioning authority. [vide rule 25.(d)]	Required No. of units	Proposed No. of units	Remarks
4	Whether the Notarized Affidavit submitted [vide rule 25.(d)]	YES	NO
